Comments	I suggest a distance based definition for excessive noise (i.e noise plainly audible 50 feet from the source of origin between 10pm-7am and 100 feet from the source of origin 7am-10pm). Seven other municipalities utilize this method. IF DISTANCE IS NOT REALISTIC. Reduce the decibel threshold to 65dba 7am-10pm and retain 55dba 10pm-7am. ADD a distance based clause similar to the above for when a decibel meter is not easily attainable to allow for code enforcement enforceability via notice of violation and subsequent citation. Eight other municipalities have stronger ordinances to protect against excessive noise pollution in terms of decibel thresholds and initiation of quiet hours. Please consider reducing the decibel threshold to 65dba 7am-10pm and retain 55dba 10pm-7am.
