

November 16, 2020

Pinellas County Commissioners
315 Court Street
Clearwater, FL 33756

Ladies and Gentlemen:

Enclosed are our joint proclamation and the Florida Policy Institute analysis of potential budget savings and revenue gains from Medicaid expansion in Florida as well as our backup Report and Discussion.

We would very much appreciate the support and assistance of the Pinellas County Commission in petitioning the Florida Legislative leaders to expand Medicaid to fully utilize available Federal funding. As indicated in the attached Florida Policy Analysis, this could actually reduce costs to Florida taxpayers.

Should you have any questions, please do not hesitate to contact either of us.

Sincerely,

William Johnson, President
LWV North Pinellas County

Dr. Linsey Grove, President
LWV of the St. Petersburg Area

/gdl

Enclosures: Pinellas Board of County Commissioners Resolution
LWVNPC & LWVSPA Report and Discussion (11-12-2020)
2019 Florida Policy Institute Report

Pinellas Board of County Commissioners Resolution

Title: RESOLUTION URGING THE FLORIDA LEGISLATURE TO APPROVE MEDICAID EXPANSION FOR CERTAIN QUALIFIED ADULTS UNDER THE AGE OF 65 IN AN EFFORT TO IMPROVE THE HEALTH OF FLORIDIANS

WHEREAS the Pinellas County Board of County Commissions prides itself on the well-being of all of its residents; and

WHEREAS over 32,389 Pinellas County adults (Pre-Covid number) in between the age of 19-64 are earning below 138 percent of the Federal Poverty Level and are uninsured; and

WHEREAS, the Patient Protection and Affordable Care Act provides federal funding for states to expand Medicaid to all citizens earning less than 138 percent of the federal poverty level; and

WHEREAS, this Medicaid expansion would extend insurance coverage to more than 800,000 Floridians; and

WHEREAS, according to the Florida Policy Institute, Florida would see a reduction in General Revenue expenditure of roughly \$200 million in Fiscal Year 2022-23 by expanding the Medicaid program; and

WHEREAS, our state decision to not expand Medicaid means that some of our poorest citizens – especially adults without children with incomes below 100 percent of the federal poverty level – will go without insurance coverage; and

WHEREAS, in light of COVID-19 and for public health purposes, it is necessary that Floridians who are most in need have access to health insurance; and

WHEREAS, the Pinellas County Board of Commissioners believe all residents should have access to quality, affordable health coverage.

NOW THEREFORE, BE IT RESOLVED, that we, the members of the Pinellas County Board of Commissioners do hereby urge the Florida legislature and the Governor to accept federal funds to expand Medicaid in Florida.

BE IT FURTHER RESOLVED that a copy of this resolution be sent to Governor Ron DeSantis, FL Senate President Wilton Simpson and Speaker of the House Chris Sprowls.

Signed:

Date:

August 31, 2020

Title: Resolution of Support for the Florida Legislature's Expansion of Medicaid Eligibility
Date: 12 Nov 2020

Report and Discussion

Background:

This item seeks Board consideration of a Resolution of support (Attachment #1) urging the Florida Legislature to expand the Medicaid program under the Affordable Care Act. This expansion would provide Medicaid coverage eligibility for adults under the age of 65 with incomes up to 138% of the federal poverty level, and the federal government would provide an enhanced federal match to provide coverage to newly eligible people. The proposed Resolution is requested and supported by the Medicaid Matters for Florida Coalition, the League of Women Voters of Florida, the North Pinellas County League of Women Voters, and the League of Women Voters of the St. Petersburg Area.

Analysis:

Authorized under the Social Security Act, Medicaid was established in 1965 as a federal-state-local partnership to provide health insurance coverage to low-income children and their families, seniors, and people with disabilities. The federal government provides oversight and broad guidelines for Medicaid, such as minimum eligibility and benefit requirements, while states have flexibility within these guidelines in administering the program, often in partnership and with assistance from counties. This flexibility allows states to respond to unforeseen increases in health care needs and costs due to factors such as changing demographics, new medical technology and ways to deliver care as well as public health emergencies such as Zika and most recently, COVID-19.

The Affordable Care Act (ACA) granted states the ability to expand Medicaid eligibility to nearly all low-income adults, including those without children, earning up to 138% of the federal poverty level. In 2012, the U.S. Supreme Court ruled that this expansion of the Medicaid program is optional for states (*National Federation of Independent Business v. Sebelius*). Florida is currently one of twelve states that have not opted to expand coverage to low-income adults without children under the ACA. Voters in Missouri and Oklahoma approved referenda earlier this year to expand Medicaid in their states.

According to a 2019 report by the Florida Policy Institute (Attachment #2), to qualify for Medicaid in Florida, a family of three with dependent children must not earn more than 32% of the federal poverty level, or \$6,825 per year. To qualify for marketplace health insurance assistance, a family of three with dependent children must earn at least \$21,330 per year. Families between \$6,825 and \$21,330 annual income are not eligible for any coverage, representing what is known as the "coverage gap." If Florida were to expand Medicaid, the Legislature's Office of Economic and Demographic Research has projected that for FY 2022-23, 964,056 Floridians would gain access to affordable health care. This includes adults in the coverage gap and those with incomes up to 138% of poverty.

To offset the financial burden of covering additional individuals, the federal government covered 100% of the Medicaid costs for newly eligible enrollees in 2016, 94% of costs starting in FY 2018, and 90% in 2020 and thereafter. **According to the Florida Policy Institute report referenced above, the State of Florida would realize an estimated net savings of nearly \$200 million in FY 2022-23 by accessing these enhanced federal matching funds for income-based Medicaid beneficiaries under expansion.** Additionally, in a paper published in 2020 in the *New England Journal of Medicine*, researchers from Harvard and the Massachusetts Institute of Technology concluded that Medicaid spending has been subsidized entirely by increased federal funding to states that have expanded access, with no significant changes in spending from state revenues associated with Medicaid expansion and no evidence that Medicaid expansion forced states to cut back on spending on other priorities, such as education, transportation, or public assistance. The paper also found that the enhanced federal matching dollars from Medicaid in expansion states also offset costs incurred by public hospitals, mental health centers, and health care providers for people involved in the criminal justice system.

As a result of the COVID-19 pandemic, the number of people needing medical care has increased significantly, as well as the number of Florida and Pinellas County residents who have fallen into low-income brackets due to unemployment. Given these considerations, the Medicaid Matters for Florida Coalition and the League of Women Voters of North Pinellas and the St. Petersburg Area have requested the Board's support in advocating for the State of Florida to accept federal funding to expand Medicaid coverage. Should the Board wish to adopt the Resolution, copies of the Resolution will be shared with the members of Pinellas County's legislative delegation, the Governor, the Speaker of the House, and the Senate President.

Options:

1. Adopt the Resolution of support for Medicaid expansion in Florida (Attachment #1).
2. Do not adopt the Resolution of support for Medicaid expansion in Florida.
3. Board direction.

Recommendation:

Option #1

**POTENTIAL BUDGET SAVINGS AND REVENUE GAINS FROM
MEDICAID EXPANSION IN FLORIDA**

June 2019

OVERVIEW

Section 1: The Takeaway

Section 2: The Context

Section 3: By the Numbers

Section 4: Potential Savings from Accessing Enhanced Federal Matching Funds

Section 5: Potential Savings from Replacing General Revenue Funds with Federal Medicaid Funds

Section 6: Summary of Savings and Revenue Gains

SECTION 1:

The Takeaway

THE TAKEAWAY: OUTCOMES

Based on the experience of other states, legislative projections, and our own analysis, Medicaid Expansion could:

- Significantly reduce the number of uninsured Floridians.
- Reduce state costs for uncompensated health care.
- Result in significant budget savings and increased state revenues.
- Free up state general revenue funds for other priorities.

Bachrach et al. *States Expanding Medicaid See Significant Budget Savings and Revenue Gains. Early Data Shows Consistent Economic Benefits Across Expansion States*. Robert Wood Johnson Foundation. March 2016. http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2016/rwjfa19097

THE TAKEAWAY: NET SAVINGS

TOTAL NET ESTIMATED SAVINGS OF MEDICAID EXPANSION IN FLORIDA FOR FY 2022-2023:

\$198,995,000

Notes:

This report focuses on specifically identified state programs where budget savings could be realized with Medicaid expansion. However, it is important to note that there are additional state funded programs, not analyzed in this report, where millions more in savings could be generated. This includes multiple public health programs delivered through county health departments and disease prevention and treatment programs, such as those focused on HIV/AIDS, STDs and TB.

Also not considered in this estimate is new revenue likely to be generated for state and local governments from overall increased economic activity due to the infusion of billions of new federal dollars.

Additional state costs that would be imposed are based on Office of Economic & Demographic Research (EDR) projections for FY 2022-23. Medically Needy gross savings are based on EDR's projected savings for FY 2022-23. We chose FY 2022-2023 assuming that expansion enrollment would be close to fully ramped up at this time.

Other Medicaid program estimated savings are based on the most recently available Agency for Health Care Administration (AHCA) enrollment and cost data, typically 2018-19 data. However, these costs are likely to rise in the future, meaning that potentially there are even greater savings that could be gained through expansion.

The report also considers the experience of other Medicaid expansion states.

THE TAKEAWAY: LONG-TERM SAVINGS

- Even with the lower enhanced federal match, the state will experience long term savings.
- Other states that have already expanded Medicaid have experienced state budget gains since expansion.

SECTION 2:

The Context

SECTION 2:

The Context

THE CONTEXT: WHAT IS EXPANSION?

- Medicaid expansion under the Affordable Care Act (ACA) includes adults under the age of 65 with incomes up to 138 percent of the Federal Poverty Level (FPL). For 2019, this is \$17,236 for an individual and \$29,435 for a family of three.
- A June 2012 U.S. Supreme Court ruling made expansion of Medicaid optional for states.
- Florida is one of 14 states that have opted not to expand Medicaid.
- For Medicaid expansion states, the federal government covered 100 percent of the Medicaid costs for newly eligible enrollees in 2016, and covered 94 percent of costs starting in FY 2018. The federal share phases down to 90 percent in 2020 and thereafter.

U.S. Dept. of Health & Human Services. *2019 Federal Poverty Guidelines*. <https://aspe.hhs.gov/2019-poverty-guidelines>

THE CONTEXT: WHEN CAN STATES EXPAND?

- There is no deadline for states to expand Medicaid.
- The current Medicaid expansion Federal Medical Assistance Percentage (FMAP) would apply:

	FMAP for New Enrollees			
Fiscal Year	2017	2018	2019	2020
FMAP	95	94	93	90

U.S. Dept. of Health & Human Services. *2019 Federal Poverty Guidelines*. <https://aspe.hhs.gov/2019-poverty-guidelines>

THE CONTEXT: WHO QUALIFIES NOW?

- To qualify for Medicaid in Florida, a family of three with dependent children must not earn more than 32 percent of the FPL, or \$6,825 per year.
- To qualify for marketplace health insurance assistance, a family of three with dependent children must earn at least \$21,330 per year. Families between \$6,825 and \$21,330 annual income are not eligible for any coverage, representing the coverage gap.
- Adults without dependent children are currently ineligible for Medicaid unless they have severe, long-term disabilities.

The Florida Legislature, Office of Economic and Demographic Research (EDR). *Impact Analysis of SB 2-4, As Filed (With Preliminary numbers for proposed Amendment)*. June, 2015. edr.state.fl.us/content/presentations/affordable-care-act/SB2-AHousePresentation_ImpactAnalysisAsFiled.pdf

THE CONTEXT: WHO WOULD BENEFIT?

- With Medicaid expansion, families with incomes up to 138 percent of the FPL would be eligible for Medicaid coverage - \$17,236 for an individual and \$29,435 for a family of three in 2019.
- Expansion would guarantee healthcare coverage to:
 - Floridians who are currently in the coverage gap.
 - Floridians who are struggling to afford marketplace health insurance.
- If Florida were to expand Medicaid, EDR projects that for FY 2022-23, 964,056 Floridians would gain access to affordable health care. This includes adults in the coverage gap and those with incomes up to 138% of poverty.

Notes:

This report assumes enrollment based on EDR's FY 2022-2023 enrollment projections. We selected FY 2022-2023 because we expect enrollment will be close to fully ramped up by this time.

Sources:

The Florida Legislature, Office of Economic and Demographic Research (EDR). *Impact Analysis of SB 2-4, As Filed (With Preliminary numbers for proposed Amendment)*. THE CONTEXT: FMAP

- The Federal Medical Assistance Percentage (FMAP) is a formula through which the federal government pays a larger portion of Medicaid costs in states with lower per capita incomes relative to the national average and smaller portion for states with higher per capita incomes.
- For the current federal fiscal year, Florida's regular FMAP is 61.47 and the state share is 38.53. This means for every \$1 Florida spends on Medicaid, it receives \$0.61 from the federal government while only \$0.38 comes from Florida funds.
- However, with expansion the state would get an enhanced federal match for newly-eligible people. In 2020 the enhanced match is 90 percent.

THE CONTEXT: BENEFITS TO STATES

- States that expand Medicaid benefit financially by accessing enhanced federal matching funds for income-based Medicaid beneficiaries under expansion.
- If Florida were to expand Medicaid, at least 90 cents of every dollar spent could come from the federal government for newly eligible low-income adults, and other services would qualify for this higher reimbursement.
- The current Medicaid coverage groups that would benefit from higher FMAP include:
 - Medically Needy program
 - Pregnant Women
 - Adults with Disabilities
 - Adults with Breast and Cervical Cancer
 - Adults with AIDS

Notes: The ACA definition of “newly eligible” or income-based Medicaid beneficiaries under expansion includes some groups currently covered by Medicaid with full or limited benefits (e.g., “Medically Needy” or pregnant women). With expansion some individuals who would have otherwise been covered under these existing Medicaid coverage categories would now be covered in the expansion group. For these individuals, the state will be able to access the enhanced federal match, thereby replacing state dollars with federal dollars.

THE CONTEXT: BENEFITS TO STATES

- States that expand Medicaid benefit financially by replacing state health care funding with federal funds.
 - Many states have supported programs and services for the uninsured — mental and behavioral health programs, public health programs, health care services for prisoners etc. — with state general fund dollars.
 - With expansion, many of the beneficiaries of these programs and services are able to secure Medicaid coverage in the new adult category, which means states can fund these services with enhanced federal — not state — dollars.
- If Florida were to expand Medicaid, the services that would be newly covered by federal funds include:
 - State mental health and substance abuse services
 - Hospital inpatient care services for prisoners
 - Uncompensated care services for uninsured and underinsured Floridians

Source:

Bachrach et al. States Expanding Medicaid See Significant Budget Savings and Revenue Gains. Early Data shows consistent Economic Benefits Across Expansion States. Robert Wood Johnson Foundation. March 2016. http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2016/rwjf19097

THE CONTEXT: BENEFITS TO STATES

States that expanded Medicaid have benefited financially by:

- Increasing revenue
 - States raise revenue through individual income taxes or sales taxes. Many also have corporate income taxes, property taxes and other revenue sources. When economic activity increases, these revenue sources yield more funds.
 - Medicaid expansion increases economic activity within a state. The additional federal dollars buy more health care services. A “multiplier effect” ensues when health care providers use their increased revenue to employ more personnel and buy more goods and services within the state.
- Increasing revenue generated from existing taxes on health plans and health care providers.
 - Many states raise revenue through assessments or fees on providers and health plans. Provider and health plan revenues increase with expansion, the fees generate additional revenue.
 - Florida would gain additional tax revenue from provider assessments.

Note: This report does not address potential state revenue gains from increased economic activity throughout the state with Medicaid expansion. A 2013 economic analysis found that over a 10 year period the infusion of additional federal dollars into Florida's economy would generate more than \$400 million annually in additional state and local taxes. An updated analysis is expected to be released shortly.

THE CONTEXT: OTHER STATES' SAVINGS

Virginia

Expansion will lead to \$422 million in state budget savings in FY 2019-20.

- Virginia has already forgone more than \$10.5 billion in federal funding for failing to expand prior to FY 2019.
- Expansion will create \$342 million in state budget savings over the next biennium as newly covered populations will receive the enhanced federal matching rate.
- By replacing general fund dollars currently being spent on inpatient healthcare for inmates and substance abuse and mental health care services for low income Virginians, the state will save another \$86 million.
- All told, even after the required state matching funds, Virginia will cover more than 400,000 new people and save more than \$121 million over the next biennium.

THE CONTEXT: OTHER STATES' SAVINGS

Michigan

State costs of expansion continue to be fully covered by savings and new revenue.

- Michigan has already received more than \$18 billion in federal funding to provide coverage for more than 630,000 people.
- MI has saved nearly \$1.3 billion in state spending on mental health and other programs, while generating more than \$1.6 billion in new state revenue through contributions from hospitals, health plans, and new economic activity.
- The state has cumulatively saved nearly \$2.3 billion since it expanded Medicaid.
- In FY 2020 and FY 2021, the state will save \$235 million each year by replacing previous state spending on mental health and other programs and generate \$318 million and \$319 million in revenue gains from hospitals, health plans, and from new economic activity, resulting in net savings for the state for the next two years of \$101 million and \$95 million, respectively.

THE CONTEXT: OTHER STATES' SAVINGS

Louisiana

Expansion will lead to net savings of \$361 million in FY 2018-19.

- With a higher federal match rate for Medicaid populations previously funded at the regular matching percentage and additional revenue from a premium tax on managed care organizations, Louisiana recognized state savings in FY 2016-17 of \$199 million due to expansion.
- This is expected to continue as fees from hospitals and insurance providers are projected to generate \$260 million and savings from replacing general fund spending on the uninsured and the incarcerated populations will total \$313 million. Combined, these sources will exceed the state share by more than \$361 million.

Source:

Medicaid expansion not diverting resources from traditional Medicaid, Louisiana Budget Project, Sept. 2018. https://www.labudget.net.org/wp-content/uploads/2018_09/Medicaid-HCBS.pdf

THE CONTEXT: OTHER STATES' SAVINGS

Arkansas

State savings and new revenues continue to more than cover the cost of expansion.

- In FY 2020 and FY 2021, Arkansas expects to save \$131 million and \$137 million, respectively, through enhanced federal matching dollars by shifting populations from traditional Medicaid to expansion coverage, and another \$43 and \$45 million, respectively, by reducing state spending on uncompensated care.
- Further, it expects to generate new premium tax revenues of \$26 million and \$27 million and another \$74 million and \$77 million in new revenue due to increased state economic activity.
- Between the new revenues and state savings in FY 2020 and FY 2021, the state will continue to cover 320,000 more Arkansans and even with the state share of the expenses, come out ahead by \$101 million in FY 2020 and \$71 million in FY 2021.

SECTION 3:

By the Numbers

BY THE NUMBERS: FY 2018-19

Average Monthly Caseload	3,845,450
Per Member, Per Year (PMPY) Cost	\$7,210
Total Costs (Federal and State)	\$27.7 billion
FMAP	60.87%
Total State Appropriations	\$10.5 billion

Notes:

The current FMAP for federal FY 2019-2020 is 61.47%.

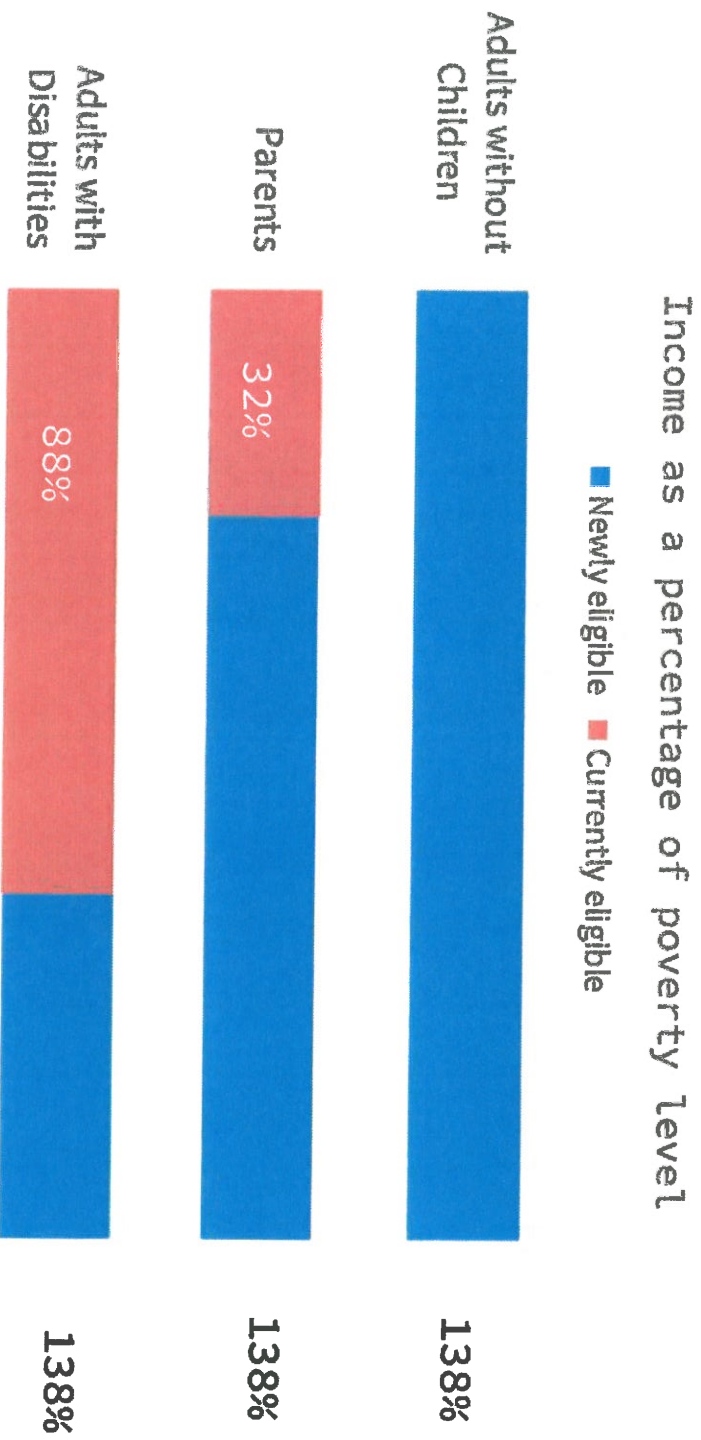

Sources:

AHCA, Medicaid Eligibility Groups for 2018-19, estimated costs, average monthly caseload & PMPM, based on March 2019 EDR Social Services Estimating Conference. (Copy provided by AHCA to FPI). <http://edr.state.fl.us/Content/conferences/medicaid/index.cfm>
EDR, Medicaid Federal Share of Matching Funds, Feb. 28, 2019. <http://edr.state.fl.us/Content/conferences/fmap/fmap.pdf>

BY THE NUMBERS: WHO GETS BENEFITS?

New coverage groups would be added and income eligibility would increase up to 138% of the Federal Poverty Level for most adults.

BY THE NUMBERS: POTENTIAL SAVINGS WITH EXPANSION OUTWEIGH COSTS

Medicaid expansion could result in a substantial net savings to Florida's budget.

Potential Budget Impacts of Medicaid Expansion in Florida, FY 2022-2023

Estimated Costs of Expansion	\$441,900,000
Estimated Savings from Accessing Enhanced Federal Matching Funds	\$266,385,000
Estimated Savings from Replacing State General Revenue funds with Medicaid Funds	\$355,400,000
Estimated Revenue Gains	\$19,110,000

Net Estimated Savings of Medicaid Expansion in Florida	\$198,995,000
---	----------------------

Note: Based on available data, estimates from the Office of Economic and Demographic Research (EDR) and Agency for Health Care Administration. Source: Dorn, S., et al. *The Cost to States of Not Expanding Medicaid*. Urban Institute. 2016. <http://www.urban.org/sites/default/files/alfresco/publication-pdfs/2000886-The-Cost-to-States-of-Not-Expanding-Medicaid.pdf>

BY THE NUMBERS: EXPANSION CASELOAD

Fiscal Year	Expansion Caseload	State Cost of Expansion
2022-23	964,056	\$441.9 million

It's important to note that for the same fiscal year, \$4.1 billion of new federal funding would flow to Florida. As state costs grow, so would federal dollars.

New federal dollars are also projected to stimulate substantial increased economic activity throughout the state.

Notes:

- The newly eligible caseload projection (which includes the crowd-out, new uninsured presenters and the conversion of the Medically Needy into the expansion program based on 2011-2013 ACS Public Use Microdata Sample). The total and state cost of expansion is based on the Office of Economic and Demographic Research (EDR) projection. However, the caseload projection does not include Floridians who are currently eligible, but not enrolled in Medicaid.
- The currently eligible, but not enrolled population might be already realized. With economic recovery, more people can benefit from health insurance marketplace subsidies.
- The state cost of expansion reflects the specific cost for new uninsured presenters and the crowd-out population.
- Hodges, A. and Rahmani, M. *Economic Impacts of Extending Health Care Coverage in Florida*, May 2013, p. 10. <http://www.fha.org/reports-and-resources/show-details/Economic-Impacts-of-Extending-Health-Care-Coverage-In-Florida/75>. An updated study will be issued shortly.

Source: The Florida Legislature, Office of Economic and Demographic Research (EDR). *Impact Analysis of SB 2-4, As Filed (With Preliminary numbers for proposed Amendment)*, June 1, 2015. http://edr.state.fl.us/content/presentations/affordable-care-act/SB2-AHousePresentation_ImpactAnalysisAsFiled.pdf

SECTION 4:

Potential State Savings from Accessing Enhanced Federal Matching Funds

POTENTIAL SAVINGS: SOURCES

- **Florida could generate budgetary savings by accessing enhanced FMAP for programs serving:**
 - Medically Needy Floridians
 - Adults with Disabilities
 - Adults with AIDS
 - Adults with Breast and Cervical Cancer
 - Pregnant Women

POTENTIAL SAVINGS: AMOUNTS FROM ENHANCED FEDERAL MATCHING FUNDS

Potential Budget Impacts of Medicaid Expansion in Florida, FY 2022-2023

Medically Needy Program	\$172,300,000
Adults with Disabilities	\$36,437,000
Adults with AIDS	\$3,876,000
Adults with Breast and Cervical Cancer	\$1,291,000
Pregnant Women	\$52,481,000

Total	\$266,385,000
--------------	----------------------

POTENTIAL SAVINGS: MEDICALLY NEEDY

STATE BUDGETARY SAVINGS FROM THE MEDICALLY NEEDY PROGRAM:

\$172,300,000

Notes and Key Assumptions:

- EDR projects that the state will save \$172.3 million from the Medically Needy program due to a higher FMAP in FY 2022-2023.
- Expansion states' experience reveals that, "High-need and high-cost individuals who previously would have only qualified for Medicaid by 'spending down' their incomes to the medically needy eligibility group instead were able to enroll in the new adult group, where the federal government provides enhanced match for their services. This is a significant area of savings for states with medically needy programs..."
- Other expansion states have realized savings in their medically needy programs.

Sources:

The Florida Legislature, Office of Economic and Demographic Research (EDR). *Impact Analysis of SB 2-4, As Filed (With Preliminary numbers for proposed Amendment)*. June, 2015. p. 7 http://edr.state.fl.us/Content/presentations/affordable-care-act/SB2-AHousePresentation_ImpactAnalysisASFiled.pdf
Bachrach, D. et al. *States Expanding Medicaid See Significant Budget Savings and Revenue Gains. Early Data shows consistent Economic Benefits Across Expansion States*. Robert Wood Johnson Foundation. March 2016. http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2016/rwjf1419097

POTENTIAL SAVINGS: ADULTS WITH DISABILITIES (SSI & MEDS-AD PROGRAMS)

STATE BUDGETARY SAVINGS FROM SSI & MEDS-AD PROGRAMS:

\$36,437,000

Notes and Key Assumptions:

- Savings from enrollees in these programs assume that some low-income individuals who previously would have had to pursue a disability determination to qualify for Medicaid will enroll into the new adult group based on income alone. Accordingly, there should be a reduction in the number of individuals seeking disability determinations for Medicaid eligibility and reduced corresponding administrative costs.
- AHCA April 2019 enrollment data show a total of 318,012 adults ages 19-64 enrolled in the SSI and MEDS-AD programs. We assume 4% annual attrition in program enrollment-12,720. The 2018-19 annual PMPM for these groups is \$10,450.68. Applying the regular state match for FY 2022-23 (37.41%) and comparing it to the enhanced match with expansion, the state is projected to save \$36,437,000. Savings would be cumulative over time.
- A study commissioned by AHCA also confirms that potential budgetary savings from the Disabled Adults Program are possible if the state chooses to expand Medicaid. Additionally, other expansion states have realized savings in these coverage categories.

POTENTIAL SAVINGS: ADULTS WITH AIDS

STATE BUDGETARY SAVINGS FROM ADULTS WITH AIDS:

\$3,876,000

Notes and Key Assumptions:

- The 2017 Florida Legislature amended section 409.904, Florida Statutes to allow certain individuals diagnosed with AIDS to qualify for Medicaid coverage. They must meet the following eligibility criteria: Have income at or below 222% of the federal poverty level (or 300% of the federal benefit rate), and meet hospital level of care, as determined by the Department of Elder Affairs, Comprehensive Assessment and Review for Long-term Care Services (CARES). We assume that individuals at or below 138% of poverty who previously would have had to pursue an assessment by CARES to qualify for Medicaid would instead opt to enroll in the new adult expansion group based on income alone. Accordingly, there should be a reduction in the number of individuals seeking assessments from CARES and reduced corresponding administrative costs.
- For 2018-19, the average monthly caseload was 18,028. We assume that 62% of the caseload had income at or below 138% of poverty (138/222) –or 11,177 eligible for Medicaid expansion. As with other adult disability coverage groups, we assume a 4% annual attrition rate from this program which would be 447 individuals. Based on a PMPM cost of \$2,636.19 and a regular match rate of 37.41, state savings are projected to be \$3,876,000 for one year. Savings would be cumulative over time.
- Since this eligibility group was created through a federal waiver AHCA could opt to amend it if expansion was implemented. Then this coverage group could be limited to persons with income 139-222% of poverty. All individuals with income at or below 138% of poverty could instead qualify through expansion coverage. It is projected that this change could save the state \$98.5 million.

Sources:

AHCA Medicaid Eligibles Report, Age by Program, April 30, 2019. https://ahca.myflorida.com/m Medicaid/Finance/data_analytics/eligibles_report/index.shtml
AHCA Medicaid Eligibility Groups for 2018-19, provided to FPI by AHCA.

POTENTIAL SAVINGS: BREAST AND CERVICAL CANCER PROGRAM

STATE BUDGETARY SAVINGS FROM THE BREAST AND CERVICAL CANCER PROGRAM:

\$1,291,000

Notes and Key Assumptions:

- Based on data available from the state Medicaid office, for FY 2016-17 the total budget allocated for the Breast and Cervical Cancer Program was \$6,823,518. Using the 2022-2023 FMAP of 37.41 percent, the state share would be \$2,552,678 based on the state's 2022-2023 FMAP of 37.41%.
- Cost savings are achieved by transitioning women below 138% FPL to Medicaid.
- Accordingly, FPI assumed even distribution of the current income requirement of 200% Federal Poverty Level (FPL) for all program-eligible low-income, uninsured and underinsured women. (138%/200%=69% of enrollees). With expansion the state share would be reduced to just 10 percent resulting in estimated net savings of \$1,291,000.
- Other expansion states have realized savings from their Breast and Cervical Cancer programs.

Sources:

AHCA Medicaid Eligibility Groups for 2016-17. (provided to FPI by AHCA).
Bachrach et al. *States Expanding Medicaid See Significant Budget Savings and Revenue Gains. Early Data shows consistent Economic Benefits Across Expansion States.* Robert Wood Johnson Foundation March 2016. http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2016/rwjf1419097

POTENTIAL SAVINGS: PREGNANT WOMEN

STATE BUDGETARY SAVINGS FROM PREGNANT WOMEN PROGRAM:

\$52,481,000

Notes and Key Assumptions:

- The pregnant women program covers women up to 196% of the poverty level. AHCA's April 2019 Medicaid eligibles report only shows enrollment for pregnant women who are at or below poverty level (87,505). To account for the lack of data for women earning 100-138% we constructed a ratio based on 2016-2017 AHCA data for women in both categories. We estimate the current total for both groups to be 104,433. Based on the PMPMs for both groups included in AHCA's 2016-17 data and applying the 2022-2023 state match of 37.41%, the state could realize total savings exceeding \$130 million, if all pregnant women converted to the expansion group. However, a conservative estimate is that 45% of these women would shift to the expansion group in FY 2022-2023 amounting to \$52,481,000 in state savings.
- Expansion states' experience reveals that "Many women who are enrolled in the new adult group and become pregnant will remain in the new adult group, where the states receive the enhanced federal match for their services, at least until women renew their coverage. Savings occur even if states maintain their previous Medicaid eligibility levels for pregnant women."

FLORIDA

POLICY

INSTITUTE

SECTION 5:

Potential State Savings
from Replacing General
Revenue Funds with
Federal Medicaid Funds

POTENTIAL SAVINGS: SOURCES

- **Florida could generate budgetary savings by replacing state General Revenue (GR) funds with Medicaid funds for:**
 - Mental Health and Substance Abuse Programs
 - Prisoner Hospitalization Costs
 - Uncompensated Care

POTENTIAL SAVINGS: AMOUNTS FROM ENHANCED FEDERAL MATCHING FUNDS

Potential Budget Impacts of Medicaid Expansion in Florida, FY 2022-2023

Substance Abuse and Mental Health Services	\$200,482,000
Prisoner Hospitalization Costs	\$57,524,000
Uncompensated Care (Low Income Pool)	\$97,394,000

Total **\$355,400,000**

POTENTIAL SAVINGS: MENTAL HEALTH AND SUBSTANCE ABUSE

STATE BUDGETARY SAVINGS FROM MENTAL HEALTH AND SUBSTANCE ABUSE PROGRAM:

\$200,482,000

Notes and Key Assumptions:

- The Department of Children and Families estimates that there are 132,940 adults receiving general revenue funded mental health/substance abuse services and that \$412,411,814 in general revenue could be used for state Medicaid match. These numbers are from 2016 and are likely to be higher today. Savings are projected using AHCA 2018/19 MMA Capitation rates for SSI SMI Ages 14+. A weighted average across all regions of \$1,328.48 PMPM was used. The cost of converting these adults into coverage under Medicaid expansion has been deducted from the savings.
- These savings could help mitigate critical mental health funding priorities of the state, particularly for community-based agencies providing mental health care services.
- Other states' experience reveal that "the largest savings in this category come as individuals who previously relied on state-funded behavioral health programs and services—including mental health and substance use disorder services—are able to secure Medicaid coverage in the new adult group, which means states can fund these services with federal—not state—dollars without reducing services."
- The Georgetown University Center for Children and Families has estimated even higher savings- \$250 million annually- from the community substance abuse and mental health program if the state opted to expand Medicaid.

Sources:

- Agency for Health Care Administration, *Behavioral Health Services Revenue Maximization Plan, Report to the Florida Legislature*, December 31, 2016. https://ahca.myflorida.com/medicaid/recent_presentations/SB_12_Behavioral_Health_Services_Revenue_Maximization_Plan_123016.pdf

- Bachrach, D. et al. *States Expanding Medicaid See Significant Budget Savings and Revenue Gains. Early Data Shows Consistent Economic Benefits Across Expansion States*, p. 4, Robert Wood Johnson Foundation, March 2015. http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2015/rwjf1419097

POTENTIAL SAVINGS: PRISONER HOSPITALIZATION COSTS

STATE BUDGETARY SAVINGS FROM HOSPITAL INPATIENT CARE FOR PRISONERS:

\$57,524,000

Notes and Key Assumptions:

- “Medicaid’s ‘inmate exclusion’ prohibits payment of care of services for any individual who is an inmate of a public institution. However, Medicaid will cover services provided to an inmate during an inpatient stay of at least 24 hours in a medical institution such as an acute care facility. To qualify, the inmate must be otherwise Medicaid-eligible. Expansion states are seeing health care related savings in their correction budgets for newly Medicaid-eligible prisoners who are treated in an inpatient medical facility outside of the state correctional system.”
- FPI presumes that nearly all state prisoners are likely to qualify for the new adult group. Applying an expansion take-up rate of 85.8 percent, we assume that the state could save \$45,903,000 of its \$53,500,000 hospital inpatient care spending based on costs for FY 2016-17 (the last year of data available to FPI). From FY 2016-17 to FY 2018-19, state appropriations for inmate health services increased 24%. Applying this increase to the 2016-17 costs, we project \$57,524,000 in savings.

Sources:

The Florida Department of Corrections. Florida’s FY 2016-17 allocated budget for inmate health care services is \$383,388,630, of which \$53,500,000 is allocated for Inpatient Cost of Care for inmates. (Information provided to FPI by the Department of Corrections.) General Appropriations Acts, FYS 2017-18, 2018-19. http://laws.flrules.org/files/Ch_2017-071.pdf; http://laws.flrules.org/files/Ch_2018_009.pdf

POTENTIAL SAVINGS: UNCOMPENSATED CARE / LOW INCOME POOL

STATE BUDGETARY SAVINGS FROM UNCOMPENSATED CARE COSTS:

\$97,394,000

Notes and Key Assumptions:

- Medicaid expansion is projected to lower the number of uninsured by 29% with a moderate caseload enrollment. This figure is based on a 29% reduction of the state's uncompensated care costs. The FY 2017-2018 General Appropriations Act allotted \$586,762,066 for the state share to access a total pool of \$1.5 billion of combined state and federal funding. (Nearly identical amounts have been appropriated in subsequent fiscal years.) However, local entities, such as counties and hospital taxing districts, which are charged with raising the state share, raised just \$335,839,712 for FY 2017-18. The LIP savings projection is based on this reduced amount.
- Another potential source of state savings due to a reduction in the uninsured rate is the disproportionate share hospital (DSH) payments program. Through this program, the state spends millions of dollars annually for uncompensated hospital care. This analysis does not include these potential savings.

Urban Institute. 2016. <https://www.urban.org/sites/default/files/altfresco/publication-pdfs/2000866-What-if-More-States-Expanded-Medicaid-in-2017-Changes-in-Eligibility-Enrollment-and-the-Uninsured.pdf>

POTENTIAL REVENUE GAINS FROM PROVIDER TAXES

\$19,110,000

Notes and Key Assumptions:

- Figure is based on 1.5% tax on inpatient care and 1% on outpatient, with a revenue distribution of 73% and 27%, respectively. This distribution is applied to \$2.1 billion in increased revenue if the state expanded Medicaid in FY 2016. Also, 1/3 of Medicaid revenue gains are offset by lost marketplace revenues, resulting in net revenues of \$19.11 million.
- Other states' experience reveals increased state revenue from existing assessments on insurers and providers. These gains occurred as local insurer and provider revenues increased, resulting in higher state collections on insurer and provider assessments.
- Other states have also experienced macroeconomic benefits from billions of new federal dollars flowing through their local and state economies generating more state and local revenues. Those potential fiscal gains are not addressed in this report.

SECTION 6:

Summary of Savings and Revenue Gains

POTENTIAL FY 2022-2023 STATE BUDGET SAVINGS & REVENUE GAIN ESTIMATES IN FLORIDA

Potential FY 2022-2023 State Budget Savings And Revenue Gain Estimates In Florida

State-only Cost of Expansion

\$441,900,000

SAVINGS FROM ENHANCED FEDERAL MATCHING RATES

Medically Needy Program	\$172,300,000
Adults with Disabilities	\$36,437,000
Adults with AIDS	\$3,876,000
Breast and Cervical Cancer Program	\$1,291,000
Pregnant Women	\$52,481,000
Total	\$266,385,000

SAVINGS FROM REPLACING STATE FUNDS WITH FEDERAL MEDICAID FUNDS

Substance Abuse and Mental Health Services	\$200,482,000
Prisoner Hospitalization Costs	\$57,524,000
Uncompensated Care (Low Income Pool)	\$97,394,000
Total	\$355,400,000

ESTIMATED REVENUE GAINS

Increased Hospital Taxes/Provider Tax Assessments	\$19,110,000
Total	\$19,110,000

Total Savings and Revenue Gains	\$640,895,000
Net Savings with Medicaid Expansion	\$198,995,000
