#### **Question/Response**

**Question No. 1:** Upon our review of the "Invitation to Bid" for the Side Slope Closure project at the Bridgeway Acres Class 1 Landfill, we are requesting that the prequalification provision contained within this document be waived. The scope of this project is unique in that the required landfill side slope closure work does not neatly fall into any of the categories listed in the pre-qualification provision and this type of work is not typically governed by the FDOT. In our view, the attributes of a Contractor qualified to construct a landfill closure project in Florida would be that they are a licensed General Contractor in the State of Florida

and that they have demonstrable experience as a General Contractor on many successful projects including excavation, handling and embankment of solid waste, construction of leachate and landfill gas collection and conveyance systems, installation of geosynthetic lining systems, and placement/grading of intermediate and final cover soils for landfills.
