Topic Tenant Bill of Rights
BCC Agenda Date 6-21-2022
Your Stand on the Issue Oppose

Comments
I work in the rental housing industry in Pinellas County and am very concerned with the draft Tenant Bill of Rights that the Pinellas County Commission will consider on June 21. The ordinance will require rental properties to participate in the housing choice voucher program, but doesn't provide any protections against the excessive costs that come with the program. Long inspection times, costly changes to the property, and higher insurance rates can all add significant costs for housing providers. The ordinance also has vague and confusing language that increases legal risks and could require housing providers to accept residents with little to no income who may not be able to afford regular living expenses like utilities. If these issues are not addressed, the ordinance could harm housing affordability, not just for voucher recipients, but for all renters. Please do not move forward with the ordinance without addressing these issues.

As someone who lives and/or works in Pinellas County, and as a member of both the National Apartment Association (NAA) and its local affiliate the Bay Area Apartment Association (BAAA), I am very concerned with the draft Tenant Bill of Rights that was published as part of the June 21 Pinellas County Commission agenda. That draft includes provisions that will lead to excessive costs and other unintended consequences. To address these issues, I ask that you please consider making the following changes: • Remove the provision that will force landlords to use an income standard that will guarantee every voucher recipient will income qualify for a rental, even if they have zero income. • Include safeguards that will minimize the cost of working with vouchers, such as limiting the time for inspections, help landlords avoid increased insurance costs associated with vouchers, and prevent rentals from having to make expensive alterations if they meet local code. • Make clear that covered assistance programs must provide support for at least a year to ensure rent for the full term of a lease can be met. • Clear up vague language so that a notice of rights is provided before a resident occupies a rental. Thank you for considering these changes. Together they will clear up confusing language and help stem some of the largest costs housing providers may incur under the ordinance. Adopting these changes will also bring the County's ordinance much more in-line with a similar ordinance already in place in the City of St. Petersburg, making it easier for both housing providers and residents to know what their rights and responsibilities are. Sincerely,
Alan Foresta
