Subject: Mask-induced asthma
Date: Thursday, October 15, 2020 11:35:51 PM

CAUTION: This message has originated from **Outside of the Organization**. Do Not Click on links or open attachments unless you are expecting the correspondence from the sender and know the content is safe.

My wife, Amy, and I spoke out at the last Pinellas County School Board meeting to be pro-choice for masks. You all ignored the stats that I provided to you. The media even ignored my analysis at the school board meeting, despite picking up most of the other speakers, which just further verifies it is accurate. One day later, and our worst nightmare came true... basically, my son had a masked-induced asthma attack.

Board and Commissioners, I know you don't know us, but please help. This is his first asthma attack ever during this Wednesday's baseball practice; never any other breathing problems like this prior to wearing the masks. Everything we said is true, and now has happened to us. If this doesn't move you to see the truth... see attached. The Pinellas County Commissioners keep saying "the school board is still masking" and the school board keeps saying "Pinellas County is still masking," blaming it on each other and even neighboring counties. Take a stand before *you* harm any other children (please see prior emails on how influenza is 2.7x to 11x more deadly than COVID-19 and all the continuous examples from my wife of how masking the children is NOT benign).

In your own words, this is a fluid situation. No matter what your attorneys have told you in the past, the fluid has shifted and things have changed. You are now advising the public against the facts and will be held accountable. We appreciate those of you who are listening. There are many experiencing the same thing. If you care about our children, you will be pro-choice for masks.

There are tons of witnesses before and after Tyler's asthma attack, be ready for the jury to hear a little boy's dream getting stripped away by your actions. We are not exaggerating. With what just happened, you all are already in deep stuff... I am truly sorry for the tone of this email, but given you all ignored what I, and many other parents, said from the last meeting, and what just happened to my son, I have no other choice.

Please, like I stated before, give me a call if you need any assistance digesting the data I sent to you previously. I am willing to help at your workshops if you'd like another expert opinion.

God Bless,
Michael Mack

Oppose LSOE and Fake Face Covering fear orders. Crimes Against humanity. Suggest you watch. . Dr. Margarite Griesz-Brisson MD, PhD has this to say about masks and their effects on our brains in a recent report entitled, Covid-19 masks are a crime against Humanity and child abuse "The rebreathing of our exhaled air will without a doubt create oxygen deficiency and a flooding of carbon dioxide.

We know that the human brain is very sensitive to oxygen deprivation. There are nerve cells for example in the hippocampus, that can't be longer than 3 minutes without oxygen – they cannot survive. The acute warning symptoms are headaches, drowsiness, dizziness, issues in concentration, slowing down of the reaction time – reactions of the cognitive system."

Topic NO on masks

BCC Agenda Date 10-20-2020

Your Stand on the Issue

Comments

Submitting this for the public record. 1. Please vote NO on masks 2. For the 14th week in a row, I am requesting you issue the specific criteria by which your "emergency" face mask order will be repealed 3. I am requesting that Dr. Cho whose department has a financial conflict of interest recuse himself from recommendations on continuance 4. I am requesting that the commission not derelict their responsibilities to an unelected employee for decision making on the SOE 5. I am requesting that commissioner Welch cease and desist using his "commissioner" title on Twitter to like hate speech, including wishing people ill with covid, and most recently fat shaming people 6. I am requesting that commissioner Justice stop violating the law by making his VOTEJUSTICE twitter page private. Should he win re-election and not make this page public, I will be seeking assistance from the ACLU to sue both Justice and Pinellas to correct this 7. I am asking commissioner Long to please follow campaign finance laws for the few remaining days of this election Science dictates you #FreePinellas from your ridiculous and non-tenable face mask ordinance. Follow the precedence set by neighboring communities and make this optional. Thank you! See you all at the polls. As this will be my last opportunity to address commissioners Long and Justice, thank you for your service to Pinellas County and may God bless you in your future endeavors.

I have just become aware of the vote tomorrow to rescind the mask ordinance in Pinellas County. I am writing to express my strong opposition. The result will be mixed messages, confusion, and likely another shut down of businesses. How will you approach requiring masks again when this happens? Frankly, I'm surprised this would even be up for consideration. As an elected official I trust you will do the right thing to protect the public, yourself, and your families. Thank you,

Topic Face Covering Ordinance 20-14

BCC Agenda Date 10-15-2020

Your Stand on the Issue Oppose

Comments

Oppose Mask and SOE I VOTE NO Evidence!!!! OCTOBER 12, 2020 By Jordan Davidson A Centers for Disease Control report released in September shows that masks and face coverings are not effective in preventing the spread of COVID-19, even for those people who consistently wear them. A study conducted in the United States in July found that when they compared 154 “case-patients,” who tested positive for COVID-19, to a control group of 160 participants from the same health care facility who were symptomatic but tested negative, over 70 percent of the case-patients were contaminated with the virus and fell ill despite “always” wearing a mask. “In the 14 days before illness onset, 71% of case-patients and 74% of control participants reported always using cloth face coverings or other mask types when in public,” the report stated. In addition, over 14 percent of the case-patients said they “often” wore a face covering and were still infected with the virus. The study also demonstrates that under 4 percent of the case-patients became sick with the virus even though they “never” wore a mask or face covering. Despite over 70 percent of the case-patient participants’ efforts to follow CDC recommendations by committing to always wearing face coverings at “gatherings with ≤10 or >10 persons in a home; shopping; dining at a restaurant; going to an office setting, salon, gym, bar/coffee shop, or church/religious gathering; or using public transportation,” they still contracted the virus. While the study notes that some of these people may have contracted the virus from the few moments that they removed their mask to eat or drink at “places that offer on-site eating or drinking,” the CDC concedes that there is no successful way to evaluate if that was the exact moment someone became exposed and contracted the virus. “Characterization of community exposures can be difficult to assess when widespread transmission is occurring, especially from asymptomatic persons within inherently interconnected communities,” the report states. In fact,

the report suggests that “direction, ventilation, and intensity of airflow might affect virus transmission, even if social distancing measures and mask use are implemented according to current guidance.” Despite this new scientific information, the CDC, Director of the National Institute of Allergy and Infectious Diseases Dr. Anthony Fauci, and many political authorities are still encouraging people to wear masks. Many states and cities have even mandated masks, citing them as one of the main tools to “slow the spread” of coronavirus and keep case numbers in their area down.

Topic Mask Mandate

BCC Agenda Date 10-15-2020

Your Stand on the Issue Oppose

Comments

"Americans need to learn to live with the virus." These are the words of 3 world renown infectious disease experts.. Harvard doctor Martin Kulldorff; Oxford, Dr. Gupta; Stanford, Dr. Bhattacharya; and 2,300 medical scientists along with 2,500 practitioners as quoted in the WSJ on 10-7-2020. Mask science is not settled science. We elected 7 commissioners in Pinellas County....we did not elect an Administrator or several doctors to be the opinions of commissioners. We elected you. If you want expert doctors' opinions, then listen to these 3 doctors and the thousand health experts. If you are waiting for advise from your local doctors to say the virus has 'disappeared', it 'ain't' going to happen. The virus isn't going away. Mask mandates are preventing economic improvement and inhibiting opportunities for individual self-improvement. Your policy is interfering with free markets and destroying opportunities. As long as there are mask mandates, people will not frequent businesses, stores, restaurants, etc. You want us to 'lie' low, and we are, to the detriment of the community. I refuse to go to a restaurant where in between bites, I have to wear a mask...as the California governor wants. That's what we are coming to.

I just want to express my opposition to any easing of mask mandates in Pinellas County. As someone who's spouse is in major retail management and myself who has medical issues, I implore you to keep the mandate in place. We are not out of the woods and heading into the winter months. Unfortunately, for Florida residents, we have an influx of people who come to our state and put us at an even greater risk. In the week since DeSantis relaxed bars and restaurants we have noticed that establishments in our county think this also applies to them. Restaurants are packed, masks are not enforced and even Publix is no longer safe. We were going to restaurants that had distanced outdoor seating but have now stopped patronizing any restaurant. We are also changing our shopping habits and not going to Publix. This will not have a good outcome with health or economy if you push to eliminate and not enforce common sense Public Safety protocols.

Topic Mask Mandate

BCC Agenda Date 10-6-2020

Your Stand on the Issue Oppose

Comments

Please rescind the mask mandate because: Pinellas has had low positivity rate (average 3%) for 4 weeks; there is sufficient hospital capacity to care for those who need medical treatment; people have medical reasons for not wearing a mask, yet people don't know this and hostile confrontations have ensued; doctors have acknowledged that January is peak season for the flu in Florida, yet this is being used as the new reason to continue to mandate a mask. Pinellas needs tourism back and mask mandates are a deterrent. Everyone has different personal risk factors, please give us the freedom of choice!

Dear Governor Desantis and Pinellas County Commissioners,

I have made my opinions known in previous emails. Here are some more links to dangers in mask wearing. Please end this State of Emergency as we are not seeing any significant spikes in our county and the death rates continue to decline. By continuing this mandate and pushing the fear of this virus that has a high survival rate (numbers sent to you in one of my previous emails) you are creating bigger problems in our county.

Shoppers were not wearing masks in the store. When management (including the manager on duty) was asked about it, they indicated that they were told not to enforce it and the signs in the front of the store were indeed gone.

This is not acceptable and I was under the impression that there was a county-wide mask ordinance in place. Is this not the case?

Dear Commissioners,

(1) Governor DeSantis in executive order #20-244 prohibits local jurisdictions from fining people for not wearing a mask:
Section 4. Suspension of COVID-19-related Individual Fines and Penalties This order, consistent with Executive Order 20-92, suspends the collection of fines and penalties associated with COVID-19 enforced upon individuals.

(2) The CDC just released a report that showed public mask-wearing had no measurable effect on contracting COVID-19. The infection rate was about the same between mask-wearers and non-wearers. Of 154 infected people 130 claimed to "always" or "often" wear a mask. "[Community and Close Contact Exposures Associated with COVID-19 Among Symptomatic Adults ≥18 Years in 11 Outpatient Health Care Facilities](#),"

(3) Officials and doctors have been saying from the start that public "mask-wearing" was of questionable value , not really necessary, even a waste of badly needed PPE. At first it HAD to be an N95 filtration mask, now you can just tie a "fashion scarf" around your face. Its all baloney. I see how people wear their masks, I see what they use for a mask,I see how many times they handle their face adjusting it, the whole thing is a joke.

Therefore, considering ALL the science, and my personal experience wearing PPE - for real reasons, I AM DONE WITH YOUR IDIOTIC MANDATE. I get the feeling I not alone in that sentiment. My mask is going in the trash - where your "mandate" belongs.

Why don't you people actually "follow the science", and the law for a change?

"Sic Semper Tyrannis" - George Mason 1776

Subject: Virus Facts

CAUTION:

This message has originated from **Outside of the Organization**. Do Not Click on links or open attachments unless you are expecting the correspondence from the sender and know the content is safe.

Commissioners,

The Facts

- The US death rate per million of population is twenty (20) times greater than Sweden's death rate per million (**see current graph below**). **Sweden is now the safest country in Europe.**
- The death rate resulting from the imposed lock-downs, quarantine, and mask requirements are exceeding the death rate of COVID itself (**see quote from the director of the C.D.C. below**).
- The increase in deaths spiking in countries such as Canada substantiate the hypothesis that trying to prevent the spread only delays the inevitable result.
- Relying on a vaccine (which historically have been only 40% effective preventing similar virus/flu outbreaks) is not required as Sweden now has natural immunity.

It is with the above facts in mind that the following becomes increasingly evident:

If your original goal was to prevent death and destruction of American lives and their livelihoods we have actually and effectively doubled the deaths and destruction of otherwise viable citizens of all ages.

The tactic now being utilized in attempting to contain/control the virus from spreading is, in effect, the worst solution for the general population causing resulting in needless deaths and despair among the younger citizens.

The correct approach was to intensely care for the vulnerable and leave the masses free to enjoy their livelihoods.

Obviously the prudent approach was adopted by the Swedes. Their success is actively being suppressed by the media as well as the medical elite for two reasons.

1. Political outcome of the 2020 elections.
2. The medical elite will never admit to their mistake making them complicit to the resulting unnecessary loss of life and prosperity.

Sadly, although well meaning, I believe that you too have been so indoctrinated with anxiety, fear by the Left controlled media, that you have lost your focus. Please reconsider your stand and open the County, save lives. Please realize that your actions, although well meaning, are enabling the radical Left to accomplish their goals.

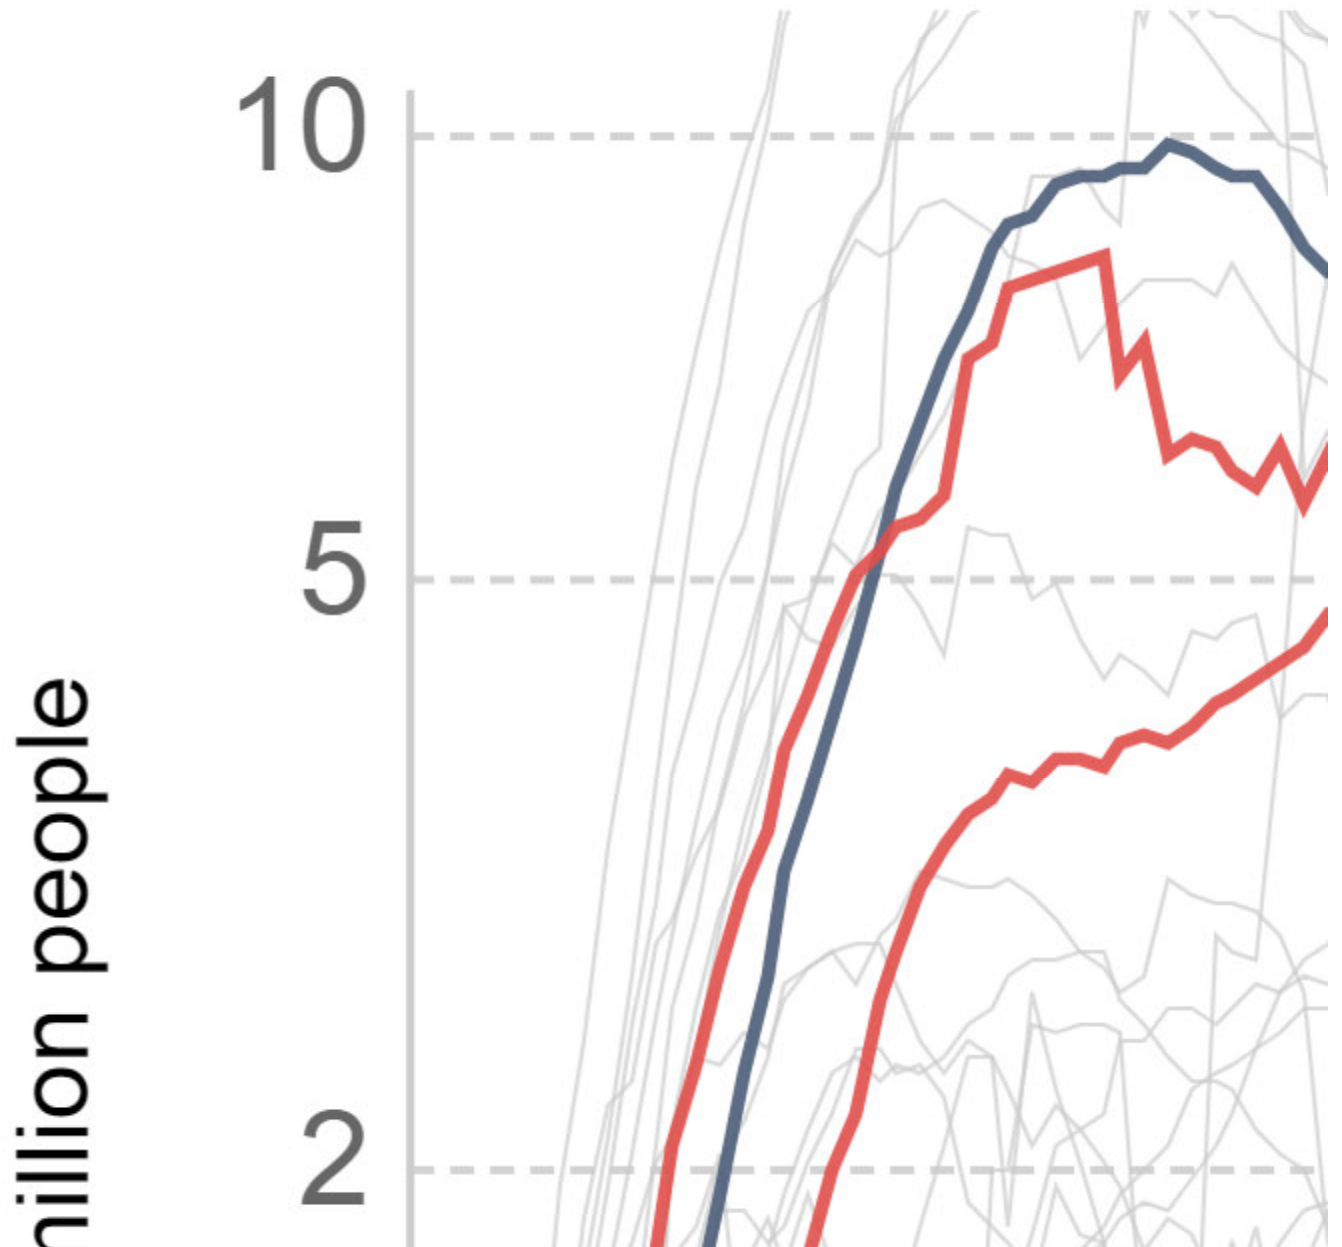

Quote: CDC Director Robert Redfield during a Buck Institute webinar on July 14th 2020.

“We're seeing, sadly, far greater suicide now than deaths from COVID.

We're seeing far greater deaths from drug overdose, that are above excess, than we had as background, than we are seeing deaths from Covid.”

Subject: REMOVING MASKS IN SCHOOLS

CAUTION:

This message has originated from **Outside of the Organization**. **Do Not Click** on links or open attachments unless you are expecting the correspondence from the sender and know the content is safe.

Good afternoon.

[Unmask Our Children](#) - please take these mother's testimonies into consideration.

Unmask Our Children

I am a mother of a 7th grader and Tarpon Springs Middle School. I do not want my son wearing a mask in school, it has been causing headaches and stress. He received in school suspension at the end of his seventh period on Friday because he put it under his nose. He cannot breathe properly with the mask it causes him much stress and discomfort. I hope you are able to watch the link to the video above from mothers of school-age children who want the mask mandate in the schools removed. There is no scientific evidence to prove that this is effective and it certainly is a very ineffective in children! We should not be teaching our children to fear others, or germs.

Children and all humans not compromised have the ability to fight viruses and germs through their immune system. If the teachers are compromised or elderly than they can wear the masks if they feel they help, or they can choose to work remotely. The children should not be forced to wear these masks! I am pleading with you and I hope you take our plea's very seriously.

I would have my son learn virtually from home however my job entails that I work from home 8 full hours. I am a single mom with zero help. I do not have the time to homeschool my son while working full time. I also strongly feel that he needs to be socialized and work directly with his teachers. When we had to homeschool after COVID hit, it was extremely frustrating and stressful for both of us. It's just myself and my son. Please consider the single working parents who have little choice.

Thank you for your time.

Jill Mossor, Concerned Parent

Dear Pinellas County School Board and Pinellas County Commissioners,

Unmask our children. There is zero data to support the safety of children wearing masks for an entire school day. Children with working parents often go to before/after care programs and are required to wear masks at some of these programs too, now extending forced wearing up to 12 hours per day. Working parents do not have the choice to keep their kids at home for online school, they do not have the choice to not send their kids to before/after care programs. They do have the right to a public education for their children without impeding their health. The likelihood of us seeing unintended consequences of mask-wearing in a child is high. Do you accept the responsibility of the results of your actions? Children are becoming depressed, suicidal, and sick from wearing masks. They are missing out on seeing smiles, giving smiles, and communicating appropriately with their peers and teachers. This is detrimental, yet is still being pushed without any evidence to support.

At the 9/24/20 Governor's Roundtable Discussion on Public Health, Harvard Medical School's Dr. Kulldorf weighed in on whether or not mitigation measures such as face masks and social distancing are necessary in school age children. "There are some things that make sense and don't have a bad impact, for example, if some of the lessons are outdoors, being outdoors is good for many reasons, so there's never anything wrong with that. Making sure that the classrooms are clean is also a good idea for many reasons. Maybe it's a good idea to avoid large school gatherings with the whole school or hundreds of kids in the same room. Those are very simple measures to take in addition to ensuring that children with symptoms are sent home. But to do more than that, there is no evidence that that would lower the risk of anybody."

Masks are already starting to cause many problems. This school system in Michigan that had to shut down due to outbreak of Strep throat due to mask wearing:

[Health department investigating after high number of strep throat cases reported at Shepherd schools](#)

The governor moved us into phase 3 over 2 weeks ago. It's time to move on. Let the mandates expire. Unmask our children. Let their smiles shine.

Thank you,

Amy Mack

Subject: Great News! THE FLU IS AS OR MORE DEADLY THAN COVID 19 PER CDC & WHO

CAUTION:

This message has originated from **Outside of the Organization**. Do Not Click on links or open attachments unless you are expecting the correspondence from the sender and know the content is safe.

Hello Pinellas County School Board and Commissioners: This is great news for everyone!!! You should no longer be frightened by COVID-19. The FLU IS AS OR MORE DEADLY THAN COVID 19 based on the CDC/WHO's own numbers. I have my MBA in Advanced Finance and my CRC and CTP certifications, and have been doing analysis such as this for the past 15 years in banking. I did this analysis prior to WHO just announcing 10% of world population may have been infected, which supports the study used to calculate the 24x undetected cases (highlighted green).

In reference to how COVID-19 compares to the Flu, I ran the numbers based on the sourced information below. When including the estimate in undetected cases (which ranges from 6x to 24x per the study below), the FLU IS AS OR MORE DEADLY when comparing the number of cases to recorded deaths - this is even more true if you assume COVID-19 had a vaccine with the effectiveness similar to the Flu vaccine. Also, this does not take into account the reported COVID-19 deaths caused by other illness/injuries, which would further reduce the COVID-19 death rate. I have not seen the data compiled and comparing it like this anywhere - REMEMBER THESE ARE NOT MY NUMBERS, THESE ARE YOUR (GOVERNMENT) NUMBERS PROVIDED BY THE CDC AND WHO.

Also, keep in mind that these numbers fall in line with predictions based on the R0 and Asymptomatic spread of COVID-19 as reported by the same agencies. Given this information, there is absolutely, 100%, no reason to wear a mask or for any other COVID-19 mandates. Unless, you want these mandates in place FOR NO REASON. There is no mask debate at this point, whether they are effective or not effective, whether it is healthy or not healthy for children, whether it causes them emotional harm or it does not cause emotional harm. There is NO MASK DEBATE WHEN THERE IS NO NEED TO WEAR A MASK - their numbers do not lie. STOP ALL COVID-19 MANDATES NOW, THERE IS ABSOLUTELY NO REASON FOR THEM.

As of 10/7/20
of Total COVID Deaths (CDC)
of COVID deaths over 65 (CDC)

Commissioners,

Please, don't look back 5 years from now & have to admit that you spent an entire year of your life wearing a mask, cooped up in your house & avoiding all the people you love. A year in your life that you'll never get back.

And let me say this, I am not saying this virus isn't real, or that there aren't people that could really be affected. If you're at risk, take precautions, absolutely. Every single day is a risk. Car accident, flu... our days were numbered before this. That has not changed.

BUT, we should not be forced to live in fear. We went from being a free nation to being told we couldn't go to school, couldn't go to church, couldn't go to our grandmas house, couldn't pay respects to a loved one through a funeral.... and when we were allowed to do these things, we were told how long we could be there, how far apart we have to be, what to wear...

Yes, our health matters. But you know what else matters? Family. Friends. Church. School dances. Football games. County fairs. Family vacations. Neighborhood BBQs. Life.

One day, you'll hug your grandma, mom, dad, brother for the last time. One day, your best friend will cry on your shoulder for the last time. One day, your son will play his last football game. One day, your daughter will wear her last prom dress. One day, they'll have their last day of school. One day, you'll spend your last day laughing with your Mama. One day, you'll dance your last dance.

Don't waste the days you have by living in fear.

Your time here on earth matters & God didn't put us here to be afraid of everything He's blessed us with.

Live your life while you have the chance. God is gonna call you home when it's your time. Virus or no virus.

Please copy & paste it.

I did.

And will never regret it.

Stop living in fear.

What in the world is wrong with you people? Have you got no common sense? Have you forgotten why we locked down in the first place? To not overload our healthcare system. Well, that NEVER happened. So why haven't you ended the bullshit unnecessary restrictions? You are DESTROYING businesses and peoples lives! I am grateful that I am one of the smart ones that doesn't abide to your unconstitutional bullshit mandates but there are others who are and it is disgusting and disgraceful because they are living in such fear. Especially when I see the children suffering! Children are NOT meant to wear a mask and social distance from their peers. That is INHUMANE!!! I hope to hell you have all educated yourself on what this virus is! How much money are you getting to try to keep these restrictions?
COMPLETE MALARKY!!!

On Thu, Sep 24, 2020 at 10:52 AM luvyrpets@gmail.com <luvyrpets@gmail.com> wrote:

The CDC has updated and issued the infection fatality rates for COVID

Here is the updated survival rate by age group:

99.997% for 0-19

99.98% for 20-49

99.5% 50-69

94.6" 70+ We all know why this happened. Sick people were returned to long term care facilities where it spread like wildfire to those we should have been protecting.

I understand that you are now solely responsible for the health and well being of Pinellas County as it pertains to the current State of Emergency.

All ramifications of continuing the State of Emergency are on you because the Commissioners no longer want to take public comment on it.

I respectfully ask that you end the state of emergency. The virus metrics no longer warrant this SOE. The negative effects of the state of emergency to the community far outweigh any benefits.

The hospitals are not overwhelmed. They NEVER were. I work for one. The rate of infections has been below 5% for weeks and weeks.

END THE STATE OF EMERGENCY. We need to get small businesses back up and profitable. Do what South Dakota and Idaho have done. Follow the smart states who care about their citizens. This is no longer about the cold virus. IT IS ABOUT MONEY!!!

Thank you.

The time has come for local Government officials to represent the people who elected them and not bow down to health professions who are biased and have agendas.

In Pinellas County, OUR County Commission has yet to invite or listen to an "expert" with an opposing view to THEIR "face covering ordinance" or ANY other EXPERT regarding the virus itself. Today, in a press conference, a liberal Democrat mayor from St Petersburg stated that face coverings are here to stay until a "vaccine" is here! What a joke he is and thankfully I don't live in that city! Obviously he leads a political party agenda in which certain Pinellas County Commissioners are a part of and REFUSE to go against their masters and truly represent their people!

It's time for change and it's time for accountability. Residents WILL be making changes November 3rd, hopefully sooner! Commissioners, individually, take an OATH to protect and defend the Constitution. They need to be held personally responsible and not protected by County attorneys and tax-payer dollars!

We ask that the testing, the testing stations, the results, the officials all be looked into. These appointed "health officials" need to be held accountable and let the facts and evidence lead the way regardless of POLITICAL PARTY (either one) or AGENDAS!

We the people of Pinellas County want the local mask mandate rescinded immediately and request changes to your state orders be made to keep these local, biased officials from using their platform for power moves!

Thank you,

Pinellas County resident

Dear Chairperson Gerard,

Yes I am aware we are not locked down. However you are forcing masks upon us with only one side being listened to. It doesn't even seem like the fact that our numbers are at 3.1% and the fact that the survival rate is high makes a difference in regards to the state of emergency or masks with the commissioners.

Masks are not mentioned because they are not necessary. From the article, "Those who are not vulnerable should immediately be allowed to resume life as normal. Simple hygiene measures, such as hand washing and staying home when sick should be practiced by everyone to reduce the herd immunity threshold."

Please consider that there are plenty of reliable sources that refute masks. Instead of complaining about what constituents are sending to you, maybe look into it.

Thank you

Dear Pinellas County Commissioners and Governor Desantis,

At the last county meeting on October 6th and in previous meetings several of the commissioners have complained about taking calls from constituents on a weekly basis because it's "the same people with the same information". It is your job to listen to the constituents and since you have us under a state of emergency with no end in sight you should absolutely be taking calls EVERY week. You have stated that there are no doctors in our county that disagree with the mandates put in place which I don't believe as I've talked to those who do disagree with you but won't speak out for fear of retribution.

Here is a commentary from very distinguished epidemiologists refuting the steps taken in shutting our communities down. I hope you will read it and truly take it into consideration while forcing this state of emergency on us.

As I recall the only commissioner that said we should watch what other counties are doing but that's where it should stop was Commissioner Eggers. I did not hear any of the other commissioners say that what Hillsborough decides won't sway them. In fact Commissioner Long talked about how many people go back and forth between the two counties and that it should be a regional approach. I listened again just to make sure I heard her right.

I'm thankful also to Commissioner Peters for asking why there is still not a plan or criteria in place to end this. We the citizens are not getting any answers and watching this just continuing to be pushed back every week.

On behalf of the County Commission, thank you for the follow-up email on this matter, as well as the additional information you provided.

To clarify, the County Administrator explained at the last BCC meeting, that the Counties are not partnering, but are communicating about each other to learn as to what their plans are during this emergency.

Thanks again.

Stay safe, and be healthy.

Dear Governor Desantis and Pinellas County Commissioners,

I have written several times about the need for the State of Emergency and mask mandates to end in Pinellas County. As previously stated the numbers just don't warrant such actions at this time.

I have pleaded with you all to look at the statistics and science regarding the fact that masks in fact do not really help prevent the spread. Governor Desantis, I beg you to please look into what is going on over here in the Tampa Bay area. Please look into the actions of not only the Pinellas County Commissioners but also at how they are trying to partner with Hillborough county to keep us in masks and in this State of Emergency.

Here are some articles and studies on how they can be dangerous.

School district in Michigan shut down due to a strep outbreak from forced mask wearing

Here are steps required to minimize skin conditions from mask usage as suggested for medical personnel. Do you think the general public is abiding by these steps? I see people pulling them out of pockets and handbags. I've seen people reusing masks meant for one time use.

Best article with multiple resources. If you read nothing else, please read this and look at the data. These mandates are not good for any community and if you all care for our community as you claim, you want to do what's right and not what is based on politics and agenda.
