Notes:

190-0457-CN (SS) Utilities Professional Engineering Services approved by the Board of County Commissioners on April 27, 2021.

For FY22 payments thru 9/30/22; total expenditure of project \$600,000.00.

Project: PINELLAS COUNTY 811 DESIGNATES FOR FRONTIER COUNTY WIDE HDD INSTALLATIONS

Proposal attached as a separate PDF document to this Standard Purchase Order

The hourly rates are fully loaded and include all labor, overhead, expenses and profit of any nature including travel within the Tampa Bay Metropolitan Statistical area. Travel outside of that area will be reimbursed in accordance with Section 112.061 F.S.

Continuing Consultants Competitive Negotiation Act (CCNA) contracts are limited to projects in which construction costs do not exceed \$4 million and when the fee for professional service does not exceed \$500,000". Per state statute 287.055 (2)(g).

Standard Purchase Orders written against Contract Purchase Agreements (CPA) cannot exceed \$500,000 unless the work is for a specified nature (project) as specifically outlined in the competitive solicitation and subsequent contract document.

RE: PINELLAS COUNTY 811 DESIGNATES FOR FRONTIER COUNTY WIDE HDD INSTALLATIONS

DEAR MR. BOLLENBACHER:

PROJECT UNDERSTANDING

Pinellas County requires the services of a company that provides SUE services to determine the two-dimensional (SUE Level B) or three-dimensional (SUE Level A) location of County water, sewer, and reclaimed water, to supplement their in-house staff in support of Frontier County wide fiber optic installations by horizontal directional drilling. One to two 2-man crews will be provided daily for the anticipated 1 ½ to 2 year duration of this project. Hourly rates are attached.

SUE QUALITY LEVELS

Quality Level A information obtained by direct exposure of the existing utilities can greatly increase the level of confidence with respect to the location of underground utilities at a particular jobsite. Utility exposure (Quality Level A) permits three-dimensional measurements to be taken on utilities for accurate location at each test hole. The overall level of confidence with respect to the location of site utilities can be raised by increasing the number of test holes examined.

Quality Level B services include the horizontal, above ground detection and marking of underground utilities. Geophysical prospecting and Ground Penetrating Radar methods are used to indicate the presence and surface position of buried utilities. Quality Level B information should not be used for construction purposes, or where exact horizontal and vertical measurements are required.

The accuracy of Quality Level B designating information obtained by utilizing Geophysical and Ground Penetrating Radar equipment and techniques are subject to field and soil conditions beyond our control. McKim & Creed will make reasonable efforts to provide comprehensive and correct positional utility marks to the limits obtainable by the instrumentation used and the existing ground conditions; however, McKim & Creed provides no guarantee that all existing utilities on a particular site will be properly located using these methods.

SCOPE OF SERVICES

- PINELLAS COUNTY UTILITY LOCATES
 - PINELLAS COUNTY will set up an 811 style ticket system with McKim & Creed for daily designate requests. This request will include a map depicting the requested services.
 - M&C will have read only access to the Pinellas County GIS system for anticipated utilities on each site.
 - It is understood that there are three contractors, independent of this work assignment, utilizing thirty drilling rigs in the performance of this project. Daily requests will attempt to be in relatively close proximity to minimize travel and downtime between sites.
 - Frontier contractors, independent of this work assignment, will “white line” each route. M&C will perform Level B SUE work for County owned water, sewer, and reclaimed water only, that cross this route or come within ten feet of the route. All found utilities will be marked with pink paint indicating their horizontal location. Should the route change, Pinellas County will contact M&C, and M&C will return to the site to update the Level B SUE work.
 - If the work is not a linear route, FRONTIER will provide a detailed map depicting the project limits.
 - Utility depths will not be provided.
 - Test holes will not be provided unless specifically requested. The contractor will be responsible for excavating and confirming all paint marks. M&C can excavate and confirm on an as needed basis if requested by Pinellas County, typically on utilities that are deeper than five feet and cannot be exposed with hand tools by Contractors.
 - M&C will take photos of their work and produce sketches of the project area. These photos and sketches will be provided to the contractor.
 - M&C will use Area Wide Protective (AWP) for any lane closure M.O.T. required. Frontier contractor will provide copies of any permits required for the project.

A notice to proceed package will be provided upon approval of SOW. This document does not serve as an executed copy for Pinellas County.

We appreciate the opportunity to provide this proposal to you and look forward to working on the project with you.

Sincerely,

Neil L. Eppig
SUE Project Manager
McKIM & CREED, INC.

I hereby authorize McKim & Creed, INC. to proceed with the work described above.

CLIENT
