<b>Award Type</b>	
<b>Amount Requested</b>	
<b>Match</b>	
<b>Match Type</b>	
<b>Match Funding Source</b>	
<b>Total Project Cost</b>	
<b>Fiscal Year(s)</b>	

**Description & Comments**

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

This is an intent to apply for the FY23-FY24 Advanced Transportation Technology and Innovation (ATTAIN) Program grant through the U.S. Department of Transportation.

If awarded, this grant will benefit the County by allowing the creation of the Pinellas Advanced SmartTracs System (PASS) project which will deploy, evaluate, and document multiple operational systems that support the goals related to safety, mobility, efficiency, environmental impacts, equity, and return-on-investment (ROI) through the implementation of cutting edge AI and deployment of smart detection systems to improve traffic flow along major arterials, reduce traffic related fatalities and injuries, minimize transportation-related emissions, and provide reliable transportation alternatives for the under-served population.

This grant will be single-year and single-departmental, which will likely impact Fiscal Year 2025. Public Works has already coordinated with the U.S. Department of Transportation.

This grant will be administered by Public Works in close coordination with the U.S. Department of Transportation.

The total application amount is \$2,000,000.00 with \$6,333,620.00 match required. There are no other funding sources associated with this project, which will complete the total project budget of \$8,333,620.00.

This is not budgeted and would likely require a future budget amendment.

Based on the thresholds for delegated approval, this grant application will require Board approval to apply.
