BOCC JUNE 7, 2022

With all the infectious diseases of today, we should Not be disposing of our *greywater* where it has access to our respiratory system. The transmission of Reclaimed water via our sprinkler system could very easily spread *Respiratory Diseases* through society.

The Reclaimed Water "variance" application clearly states that, the applicant literally owes their Health, Safety and Religion. The Variance is seen as an Eminent Domain contract in statute 153.03.

Such legislation fail to qualify as government and may (soon) be denounced as a treasonous insurrection of power.

At this time I feel it is necessary that we establish Splash beds/Dry beds that allow our grey water the process it needs to *naturally percolate* and filter thru the soil horizons to "aerobically" and safely replenish our ground water supply.

Another source of water contamination is our garbage landfills. The current garbage system is simply moving *waste problems* from one place and creating problems in another, solving nothing.

Our landfills are toxic waste dumps and such "dereliction" in garbage disposal (in respect to the ecology) is unacceptable.

In regards to replacing our current garbage system, Clean, Efficient Recycling Bins should be made convenient in every neighborhood. Half Measures on this effort are unacceptable. All of our products must be manufactured with the concept of recycling being a major focus upon disposal. Everything must be recycled.

We also must find ways to dispose of our Human Waste.

Defecating in the water is Not an *Essential* use of our *Vital* water supply.

Fecal contamination in the water supply is rapidly becoming a critical concern of society.

We must find ways to recycle our biological waste products in a safe manner.

The perfidiousness of our governments neglect on such issues is criminal. And, such paid "political lack-of-performance" is to be held liable for such dereliction of duty..

Application for Variance
From Pinellas County Code 82-3

County Reclaimed Water Shortage Conservation Measures

EMINENT
DOMAIN
153.03(5)
STATUTE

PRIVATE
PUBLIC
PARTNERSHIP

Important Instructions and Information

RECLAIMED WATER FACILITY (NOT UTILITY)

- Pinellas County may grant a variance from the terms of Pinellas County Code 82-3, County Reclaimed Water Shortage Conservation Measures, when such variance will not be contrary to the public interest and where, owing to special conditions, a literal enforcement of the provisions of the ordinance would result in hardship, irrigation system limitations, religious convictions, or the health and safety of the applicant.
- Written application for a variance shall be submitted to the Pinellas County Utilities Conservation Department.
- The application for variance shall demonstrate that:
 - The variance shall not be in conflict with any other applicable ordinance or state law
 - The variance will not adversely affect the reclaimed water supply
 - The variance will not violate the general spirit and intent of the ordinance nor will it be inconsistent with the County Comprehensive Plan
- Pinellas County shall consider a variance from the County Reclaimed Water Shortage Conservation Measures as soon as possible after submittal of the written application.
- In granting any variance, Pinellas County may prescribe appropriate conditions and safeguards to assure conformance.
- Violations of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be deemed a violation of this section.
- Application shall be mailed to the following location:
