

**Pinellas County Local Mitigation Strategy (LMS) Working Group**  
**Intent to Apply: Hazard Mitigation Grant Program (HMGP) Application for COVID-19 (DR-4486)**

Applicant Name	Project Name*	LMS Goal Project Addresses	LMS Objective Project Addresses	Estimated Total Project Cost	HMGP Funds Requested**	Is 25% Match Currently Funded?	Is project currently listed in the LMS?***
Pinellas County Public Works	McKay Creek Operable Lake Controls and SCADA (004134A)	Become a More Disaster Resilient Community	Prevention	\$4,375,000	\$2,500,000	Yes	Yes

**Project Description (Include how the project will address the Goal and Objective identified above.)**

The McKay Creek Watershed Lake Levels Operation Study Technical Memo (March 2020) shows \$3,400,000 as conceptual level design/construction cost estimates. The requested HMGP funding amount is \$2.5M (74%). The objective of this project is to implement lake level SCADA controls at Taylor Lake and Walsingham Reservoir in the McKay Creek Watershed. The goal is to temporarily "lower" the lake levels before major hurricane / storm events. The "lowered" tail water condition and additional flood-volume in the lakes will significantly improve storm system conveyance and help improve / prevent flooding conditions in the watershed.

\*If the project is already listed in the LMS, please use the same project name as what is shown in Table D-1 Mitigation Initiatives  
\*\*Note that applicants can only request a maximum of 75% of the total project cost unless seeking a Global Match (Global Match process is explained in the Notice of Funding Availability)  
\*\*\*If the project is not currently listed in the LMS, please include the Project Scoring Sheet provided as an email attachment along with this form.

**Pinellas County Local Mitigation Strategy (LMS) Working Group**  
**Intent to Apply: Hazard Mitigation Grant Program (HMGP) Application for Hurrican Irma (DR-4337)**
