### Description & Comments

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

This is for approval and signature of a Joint Funding Agreement with the United States Geological Survey (USGS), Department of Interior, for the Caribbean-Florida Water Science Center Water Resource Investigations. USGS constructed and installed data gathering stations at various locations throughout the County to collect continuous monitoring data, including flood stages, discharge, and rainfall. The obtained data is utilized to meet the County's National Pollution Discharge Elimination System (NPDES) stormwater permit water quality requirements, watershed planning and stormwater modeling, and flood forecasting.

This is a Countywide effort with funding of \$300,100 for 1 year split \$228,374.00 (76%) for the County's contribution and \$71,726.00 (24%) for the USGS contribution. Funding for the County's contribution is included and consistent with the FY23 Adopted budget.
