Pinellas County Public Works	Baypointe Stormwater Conservation Area	Minimize Riverine or Inland Flooding Losses in the 25, 50, and 100-year Flood Zone	Property Protection	\$21,690,591	\$16,267,943	Yes	Yes

Project Description (Include how the project will address the Goal and Objective identified above.)

The Baypointe Stormwater Conservation Area project is a regional project that consists of a proposed 40+ acre Stormwater management facility which will provide stormwater storage, flood protection and reduction, attenuation, and treatment; habitat restoration, creation, and mitigation for considerable offsite drainage (202 acres). Once complete this project will create a more disaster resilient community and minimize inland or riverine flooding losses; as well as create future opportunities for public education. The proposed project will expand both the acreage of surface waters on the property as well as address regrading and system improvements which will provide flood protection and enhance public safety as repetitive localized flooding continues to occur as recent as late 2024. The proposed project will also expand the acreage of wetlands and prevent a significant amount of nitrogen from being discharged into coastal receiving waters per year.

***If the project is already listed in the LMS, please use the same project name as what is shown in Table D-1 Mitigation Initiatives.**

Please fill out a scoring sheet for each project even if the project is already listed in the Table D-1.

****Note that applicants can only request a maximum of 75% of the total project cost unless seeking a Global Match (Global Match process is explained in the Notice of Funding Availability - Page 4)**
