There has been a great deal of controversy surrounding recent HB1365. HB1365 has become known as the law that makes Homelessness a crime. In effect, prohibiting the homeless population from sleeping outdoors on public property.

Now, Should a person be ticketed with being homelessness and charged in a court of "Competent" Jurisdiction (whatever that means based on Federalist Paper #16), such so-called Court of "Competent" Jurisdiction may charge the Homeless violator with court costs, attorney fees, witness fees and deposition costs. Legislation, Making Homelessness a crime, has Declared this Act is to fulfill an important state interest by insuring the Health, Safety, Welfare, Quality of life and Aesthetics of its so-called Florida Communities in such.

As we all know Florida has a whole lot more people than quality job opportunities. And, those with a job are predominately living paycheck to paycheck. At any given week, mostly any one of us could be thrown out on the streets and be homeless. During the Covid issue a great deal of financial stress forced many people out of their place of residency. Now, let's add the cost of recent inflation such as food, electric, water, gasoline, car insurance, health insurance. And, now let's add the Non-AdValorem Levy to our Property Tax intent on Poll Taxing the civilian population. Coupled with the Reclaimed Water "Variance" of such which has claimed Eminent Domain of both our Personal and Real Property in statute 153.03(5).

Based on these factors this government has stolen our homes and is slowly denying us our right to reside here, evicting us. And, is intent on taking everything we thought we ever had. Falsely assuming dominion over us, the government has formulated comprehensive ways to make our existence a crime. Literally, in time, this government is intent on taking everything from us and is making our life a chargeable offense, taking my right to exist and inadvertently making my life a crime, in such occlusion!
