**RE: Proposal for Geotechnical Services
Pinellas County Jail
Secure Entry Center
Pinellas County, Florida
Our File: DES 2112163P**

Dear Jonathan:

In accordance with your request, we are pleased to furnish a proposal for providing the requested geotechnical services. Included herein is a brief description of the requested scope of services together with associated fees.

SCOPE OF SERVICES

A total of eight (8) Standard Penetration Test (SPT) borings was requested; five (5) in the area of the single-story secure entry center and three (3) in the area of vehicle entry canopies. We have budgeted the entry center test borings to a depth of 30 feet and the canopy areas to a depth of 20 feet.

A total of nine (9) classification borings has also been requested within areas planned for proposed pavements. We have anticipated that each of these classification borings will be performed in areas that are not currently paved. These have been budgeted to a depth of 6 feet. At each location, a hand auger boring and a Hand Cone Penetration test will be performed to assess the relative consistency of the subgrade soils for evaluation of pavement section requirements.

The results of our geotechnical investigation will be included in a report encompassing a presentation and discussion of the following:

1. Logs of the exploratory borings
2. Results of laboratory testing
3. Discussion of subsurface soil and groundwater conditions
4. Recommendations for subgrade preparation and foundation design
5. Anticipated total and differential settlements
