Description & Comments

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

This item is for the Safety & Emergency Services Department (SES) to submit an electronic attestation to keep an automatic payment that was received on December 16, 2020 from the CARES Act in the amount of \$292,923.47.

These funds must be used to prevent, prepare for, and respond to COVID-19 related expenditures and reimburse for COVID-19 related expenses or to make up for lost revenues that are attributable to COVID-19. The department must agree to certain terms and conditions with the acceptance of the funds. The main condition that the County needs to adhere to is to not bill a patient beyond what a commercial health insurance plan would cover for ambulance transportation. Commercial plans are approximately 20% of the payer mix for ambulance transport revenues. These terms and conditions will only apply to COVID-19 related ambulance transports. This does not prohibit the County from billing patients for co-payments and deductibles related to any ambulance transports, whether it is COVID-19 related or not.

There will be an estimated \$40,000.00 of ambulance billing write-offs to comply with these terms and conditions. Taking the write-offs into effect, this would equate to a net revenue impact of \$252,923.47.

The revenue and estimated write-off expense are not included in the FY21 Budget for the Emergency Medical Services Fund.
