### Description & Comments

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

This construction agreement authorizes Applied Drilling Engineering, Inc. to drill and complete a managed aquifer recharge well and perform subsurface testing at Chestnut Park in Pinellas County, Florida, for a total amount not to exceed \$3,265,600. The contractor must begin work within 15 days of notice to proceed and complete the project within 540 consecutive calendar days, while complying with all permitting, insurance, and state, local, and federal requirements. The agreement outlines standard county provisions for payments, change orders, indemnification, public records compliance, and termination, and is governed by Florida law.\*

Funding for this agreement is available under Chesnut Park Aquifer Storage and Recovery System project 004364A, included in the FY26-FY31 Capital Improvement Plan, funded by the Sewer Renewal and Replacement Fund in the amount of \$10,445,000.00.

Funding in excess of the agreement amount is dedicated to phase two (2) construction of surface facilities. Phase two (2) is currently estimated at \$23,000,000.00. Completion of the project is expected to generate additional revenue through the sale of surface water credits and additional reclaimed water to north county customers. The exact amount of expected revenue is still unknown.
