Our main concern regarding building on this property is how it will affect the drainage on our property, which we have owned without any flooding problems since February 1970. The property in question has some very low areas, and we were told by a previous owner that he was unable to obtain a building permit because of the negative effect it would have on drainage to nearby properties. We would like assurance that grading or other changes won't be made that causes water to to run into our properties.

Thank you.
