This Exhibit forms an integral part of the agreement between **Pinellas County** (hereinafter referred to as the **COUNTY**) and Kisinger Campo & Associates Corp (KCA) (hereinafter referred to as the **CONSULTANT**) relative to the transportation facility described as follows:

1. PROJECT TITLE

Professional Engineering Services for bridge widening design of the **EAST LAKE ROAD (CR-611) – BRIDGES OVER BROOKER CREEK – Bridge No. 154158 (Northbound) and Bridge No. 154159 (Southbound)**.

2. OBJECTIVE

The objective of this Exhibit is to define the responsibilities of the **CONSULTANT** and the **COUNTY** in connection with the design and preparation of a set of construction contract documents and incidental engineering services, as necessary, for improvements to the transportation facility known as East Lake Road (CR-611) – BRIDGES OVER BROOKER CREEK – Bridge No. 154158 (Northbound) and Bridge No. 154159 (Southbound). This project aims to widen these two existing bridges on East Lake Road over Brooker Creek to provide a six-lane divided roadway from Cove Drive to Pasado Drive with improvement in shoulder width on either side while maintaining a 10-ft wide trail on the southbound bridge and the existing 6-ft sidewalk on the northbound.

While a Project Development and Environment (PD&E) Study for improvements to the East Lake Road from South of Curlew Road to North of Trinity Boulevard is underway, a Preliminary Corridor Analysis and Alternative Development Study Report – East Lake Road from South of Curlew Road to North of Trinity Boulevard – dated September 22, 2022, includes the widening of the corridor as a recommended alternative to improve capacity and safety.

3. PROJECT DESCRIPTION

The East Lake Road (CR-611) – BRIDGES OVER BROOKER CREEK – Bridge No. 154158 (Northbound) and Bridge No. 154159 (Southbound) are located 1.5 miles north of Tampa Road (CR-752) in unincorporated Pinellas County commonly referred to as East Lake. These bridges were built in 1991 over the Lake Tarpon Brooker Creek. The northbound and southbound structures each have a bridge length of 160 feet with three spans of 40, 80, and 40 feet, providing a combined bridge length of 320 feet. Both bridges have an overall width of 51'-8" and a roadway width of 41'-6" with an 8' sidewalk. The existing northbound roadway provides three 11-ft lanes with two 4'-6" and 2'-6" shoulders on the northbound, while the southbound roadway provides two 12-ft lanes with two 10'-0" and 6'-6" shoulders. The **CONSULTANT** is to examine a minimum of 2 design alternatives for the widening of these bridge structures based on criteria listed in Section 6.1 Typical Section and provide a Bridge Development Report (BDR) before the 30% submittal.

Utility adjustment plans will be prepared on reproducible copies of the plan and profile sheets, cross section sheets, drainage structure sheets and signalization plans, if applicable. The **CONSULTANT** is to identify all potential utility conflicts or constructability issues (i.e., OSHA clearance issues with equipment relating to overhead power lines) based on the data provided within the Survey, horizontal and vertical field investigations, and information provided by the UAOs. Any Quality Level D utility information received from UAOs should not be incorporated into the plans but will be used for additional Survey or SUE investigation. A conflict matrix itemizing utility conflicts by UAO shall be prepared by the **CONSULTANT** and submitted to the **COUNTY**.

The **COUNTY** will distribute plans to UAOs. Four weeks on average should be allowed for each UAO to respond with appropriate resolution. The **CONSULTANT** shall coordinate with the **COUNTY** and UAOs to determine areas of apparent conflict or constructability concerns and request Subsurface Utility Engineering activities (Conflict Resolution) to confirm whether a conflict exists and to what degree. The 100% design review submittal shall include final utility adjustment plans that reflect the final disposition of all public and private utilities. Any subsequent utility conflicts are to be resolved and all final design revisions complete at the final design submittal.

Utility Coordination Meetings - The **CONSULTANT** shall attend utility coordination meetings to be held after the 60% design submittal and prior to the 100% final design submittal. The meetings will be held an average of 30-45 days after notification to utility agencies. The **COUNTY** will be responsible for organizing these meetings. The **COUNTY** will prepare formal correspondence issuing project plans and/or Civil 3D files as outlined above. The **COUNTY** should moderate the meeting. The **CONSULTANT** will discuss the project design (roadway, sidewalk, drainage, etc.) with particular emphasis on potential utility conflicts and constructability concerns. The **CONSULTANT** will prepare detailed minutes and distribute to all attendees. OR

Plans were sent to the UAOs and no relocations/adjustments are required.

9. ENVIRONMENTAL AND PERMITTING

PERMITTING - The **CONSULTANT** shall prepare permit applications, technical data, and supporting documentation for permits to be submitted by the **CONSULTANT** with the **COUNTY** as the applicant. The **CONSULTANT** shall act as an Agent of the **COUNTY** to acquire state and federal permits for the proposed project. The **CONSULTANT** shall provide the **COUNTY** PM with receipt of the permit submittal so that the **COUNTY** can submit the permit application fee. Prior to the completion of the 30% design phase, the **CONSULTANT** shall contact the **COUNTY** PM and Permit Coordinator to schedule a pre-application meeting with the Southwest Florida Water Management District (SWFWMD) to discuss and identify specific permitting requirements for the project.
