# Midmark M11 UltraClave Automatic Sterilizer

Midmark M11 UltraClave Sterilizers are designed to provide advanced features that meet the autoclaving needs of healthcare professionals in a wide variety of settings. It is an automatic sterilizer with an intuitive display that makes it very user friendly and efficient to operate. The M11 Autoclave includes simple prompts, designed to help busy medical professionals carry out autoclaving of instruments easily and quickly. The control prompts enable staff to select the cycle they need easily, helping improve efficiency in the workplace. Suitable for unwrapped instruments, pouches, handpieces, and packs, the Midmark M11 UltraClave Sterilizer provides a quick, easy, and convenient way to autoclave instruments ready for any procedure, in a short space of time.

The M11 Autoclave has an automatic door, so once the sterilization process is complete, the door of the M11 UltraClave opens automatically, offering improved convenience to its users. The doors also dissipate the steam quickly and quietly, providing efficient and quick drying of the instruments thus making the instruments available faster, which is especially useful in times of emergencies.

The M11 autoclave is designed to meet the latest requirements for the ASME BPVC (Boiler & Pressure Vessel Code). Midmark M11 UltraClave is also supplied with a Canadian registration number ensuring wider application. It also operates on a dedicated (separate) circuit as recommended for these types of sterilizers.

The Midmark M11 Sterilizer is one of the fastest and the easiest-to-use autoclaving devices available on the market today. These machines are highly revered by physicians across the world for the efficient instrument processing, sterilizing and drying they offer.

These autoclaving machines are also designed to meet the optimum standards of effectiveness and reliability for infection control assurance. The compact design of this M11 autoclave maximises space efficiency, whilst the automatic opening door enables speedy instrument drying. Midmark Ritter M11 UltraClave Sterilizers have a truly complementary design that makes it suitable for sterilization areas in most clinics, health centres and hospital environments.

## Key features:

- Easy and fast use for highly efficient instrument processing
- Maximum utilization of space
- Effectiveness and reliability for optimum infection control assurance
- A complimentary design for the sterilization area

- Canadian registration numbers are made available
- Meets the requirements of ASME BPVC (Boiler & Pressure Vessel Code)

### Specifications:

- Overall height w/printer: 45.2 cm (17.8 inch)
- Overall length w/plug: 60.5 cm (23.8 inch)
- Overall width: 45.2 cm (17.8 inch)
- Minimum Countertop area: 45.2 x 53.3 cm (17.8 inch x 21.0 inch)
- Chamber: 18-inch depth (45.7 cm) and 11-inch diameter (28 cm)
- Usable volume: 6.5 gallons (24.6 liters)
- Trays:
  - Two large - 22.9 cm x 2.9 cm x 38 cm (9 inch W x 15 inch L x 1.1 inch D)
  - Two small - 16.8 cm x 2.9 cm x 38 cm (6.6 inch W x 15 inch L x 1.1 inch D)
- Unit weight: 99 lbs. (44.9 kg)
- Water reservoir capacity: 1.4 gallons (5.3 liters)
- Shipping weight: 131 lbs. (59.4 kg)

### Electrical Requirements:

- 115 VAC with a tubular immersion heater (1425 watt)
- 115 VAC with 15 Amps, 50/60 Hz, Single Phase
- 230 VAC with tubular immersion heater (1500 watt)
- 230 VAC with 10 amps, 50/60 Hz, single phase
- UL61010A-1, UL61010A-2-041
- CAN/CSA C22.2 No. 1010.2-041-96
- CAN/CSA C22.2 No. 1010

Meets the requirements of ASME Boiler and Pressure Vessel Code

Canadian registration number available.

A separate (dedicated) circuit is recommended for this sterilizer
