		Project Title (This should be a brief synopsis of the project plan. Limited to 20 words.)	Joe's Creek Greenway Restoration and Trail	N/A
			Town of Konneth City, Lastron and	
		List the City(ies)/Town(s)/Village(s) (List all city(ies)/town(s)/village(s) where work is to be performed):	Town of Kenneth City, Lealman, and West Lealman, Unincorporated Pinellas	
		Latitude	County; all within Pinellas County 27°48'56.0"N, 27.815557	N/A N/A
		Longitude	82°41'32.9"W, -82.692462	N/A
				Joe's Creek Greenway Restoration and Trail project spans about 5.5 miles of along Joe's Creek focused on the improvement of Joe's Creek conveyance and construction of a multi-modal trail connecting the communities to the
	Project Location	Project Location narrative (Neighborhood, part of town, intersection, etc.)		larger Pinellas Trail System. The project crosses and connects the historically underserved communities of West Lealman, the Town of Kenneth City, and Lealman. Construction will be focused from 34th Street N (U.S. 19) to 54th Avenue N. See
			Narrative	the Town of Kenneth City, and Lealman. Construction will be focused from 34th Street N (U.S. 19) to 54th Avenue N. See map provided.
		Will any of the work to be performed or fall on state lands?	Narrative	No; All work performed is located on Pinellas County right-of-way so no work will be performed on state lands
		Area Served (If applicable, area served only required for projects that mitigate risks on a regional scale)	Narrative	Not applicable
		Sponsor City/County (if applicable. If the applicant is the sponsor, leave blank.)		N/A
				This project mitigates adverse effects of climate conditions, flooding, and sea level rise by improving channel
				infrastructure. Improvements to the channel geometry, infrastructure improvements, and water quality projects within
		Explain the demonstrated need(s) and how the project will address those needs. (Explain the demonstrated need		Joe's Creek will improve stormwater conveyance capacity for larger storm events and improving water quality for baseflow and mean annual events. Water quality improvements will positively affect the downstream Cross Bayou water
		which the project addresses.)		quality as well as intercoastal connections to the Gulf of Mexico.
Background				Joe's Creek also flows through historically disadvantages communities. Flood reduction and water quality improvements
			Narrative	will have a direct impact on the natural environments surrounding these communities as well as remove homes and businesses from the floodplain.
				This project will improve stormwater conveyance through Joe's Creek to reduce upstream flooding with future climate scenarios being considered. While improving stormwater conveyance, the design intent is to mimic a natural system
		Explain how the proposed project fits into the Project Types chosen.		creek with habitat creation and naturally stable channel slopes rather than relying on hardened/engineered
			Narrative	infrastructure.
		Does the project reduce risk of flooding or sea level rise identified in a		
		comprehensive vulnerability assessment or the comprehensive statewide flood vulnerability and sea level rise assessment? If yes, please explain. (Until July 1, 2024, applicants without a comprehensive vulnerability assessment		
		shall receive points based on risks posed by flooding or sea level rise identified an assessment, report, evaluation, or other documentation of risk that addresses flooding or sea		
		level rise.)	Yes	The flood risks have been identified in the WMP. Require a write-up explaining this to attach to the application.
		Does the project reduce risk of compound flooding identified in a vulnerability assessment or the comprehensive		
		statewide flood vulnerability and sea level rise assessment? If yes, please explain. (Until July 1, 2024, applicants without a comprehensive vulnerability assessment shall receive points based on risks posed by flooding or sea level		
		rise identified an assessment, report, evaluation, or other documentation of risk that addresses flooding or sea level rise.)	Vac	
			101	
		Does the project reduce risk to or adapt a regionally significant asset? This can include relocation. If yes, please explain.		Reduction in flooding in upstream ends of the channel through geometry improvements and infrastructure upgrading will reduce flooding of the industrial park (an important local business center) and Lealman Exchange Community Center
			Yes	(community center serving historically disadvantaged community members).
		What percent of critical assets in the project impact area considered to be vulnerable? Please describe the method used to determine the percent selected as well as provide a list of critical assets in the project impact area.		
	Tier 1 Criteria Information	(Vulnerable critical assets are those at risk of flooding based on applicable scenarios and standards outlined in paragraph 380.093(3)(d), F.S. Until September 1, 2024, if evaluation of those scenarios and standards is unavailable for		
		the project impact area, best available data can be used to determine the percent.)		Archeological site For the following calculation, it was assumed that the entirety of the Joe's Creek project impact area contain critical
		-None		assets or would affect adjacent critical assets. Critical assets include transportation assets, evacuation routes, major
		-At least one critical asset but less than 20% -20% or more but less than 40%		roadways, South Cross Bayou WRF, lift stations, stormwater treatment facilities, stormwater pump stations, parks, shorelines, surface waters, wetlands, recreational and cultural assets. Vulnerability was determined if the area fell within
		-40% or more but less than 60%		the FEMA's 100-year floodplain. The total acreage of the project impact area ("4485.9 acres) and the total acreage of project impact area within FEMA's 100-year floodplain ("977 acres) were determined and the percentage of vulnerable
		-60% or more but less than 80% -80% or more		critical assets that fell within the FEMA's 100-year floodplain was calculated, hence an approximate 22% of critical assets
			20% or more but less than 40%	are considered to be vulnerable.
		Does the project contribute to existing flood mitigation projects that reduce upland flood damage cost by incorporating new or enhanced structure or natural system restoration and revegetation? If yes, please explain.		
		No		
		-No -Yes, by incorporating new or enhanced structure		
		-Yes, by incorporating Natural system restoration and revegetation -Yes, by incorporating BOTH new or enhanced structure and Natural system restoration and revegetation	Yes, by incorporating BOTH new or enhanced structure and Natural system	
			restoration and revegetation	
		What is the current frequency of flooding or erosion in the project impact area? (If area has been flooded 3 times in 5		
		years or is experiencing ongoing erosion, supporting documentation must be submitted with the application)	Has been flooded at least 3 times in the	
		-No current flooding or erosion	last 5 years or is experiencing ongoing erosion. If area has been flooded 3	
		-Has experienced flooding or erosion in the last 3 years -Has been flooded at least 3 times in the last 5 years or is experiencing ongoing erosion. If area has been flooded 3	times in 5 years or is experiencing	
		times in 5 years or is experiencing ongoing erosion, please explain and provide documentation	ongoing erosion, please explain and provide documentation	Need to pull documentation over.
		What is the current severity of flooding or erosion in the project impact area? (If area has been flooded greater than 1		
		foot in the current and each of the previous three calendar years, been flooded for 7 consecutive days or erosion is critical for the asset class, supporting		
		documentation must be submitted with the application)		
		-No current flooding or erosion		
		-Flooding greater than 3 inches in last 3 years or has ever experienced unmitigated erosion -Flooded greater than 1 foot in the current and each of the previous three calendar years, has been flooded for 7		
		consecutive days or erosion is critical for the critical asset class. If area has been flooded greater than 1 foot in the current and each of the previous three calendar years, been flooded for 7 consecutive days or erosion is critical for the	Flooding greater than 3 inches in last 3	
		current and each of the previous three calendar years, been nodeed for 7 consecutive days or erosion is critical for the critical assest class, supporting documentation must be submitted with the application.	years or has ever experienced unmitigated erosion	
		What is the status of project design? (To receive points for a completed design, plans properly certified by a professional in the relevant field must be submitted with the application.)		
Brolost Conduct State	Tier 2 Criteria Information			
Project Scoring Criteria		-Not designed -Partially design or site-specific environmental or geotechnical reports have been completed	Partially design or site-specific	
		-Design is complete. To receive points for a completed design, plans properly certified by a professional in the relevant field must be submitted with the application.	environmental or geotechnical reports have been completed	what defines this? I'd say "Not designed"
		Permitting and easement acquisition status. If applicable, please provide a list of necessary permits/easements and		In the second state of the stat
		application statuses.		
		-Necessary permits and easements have been identified -All permits have been applied for or at least one permit has been approved		
		-All necessary permit(s) and easement(s) have been authorized/ obtained	Necessary permits and easements have	
		-No permits or easements are required for the project Are local funding sources committed as cost share or is the project in a financially disadvantaged small community as	been identified	
		Are local funding sources committed as cost share or is the project in a financially disadvantaged small community as defined in 380.093(5)(e), F.S.? If yes, please explain and provide documentation.	Yes	Penny for Pinellas/Capital Improvement Projects Fund is committed as cost share, as well as SWFWMD cooperative funding and FDEO CDBG-MIT grant funding to provide the 50% matching funds required for this project.
		Does the project include environmental habitat enhancement or nature-based solutions? If yes, please explain.		Water quality improvements will incorporate nature-based solutions and design of channel is intended to enhance and
		Does the project include environmental natural ennancement of nature-based solidons in yes, prease explain. Does the project impact area include area that is identified as state or federal critical habitat for threatened and	Yes	create habitats.
	l	endangered species? If yes, please explain.	No	

		Is the project cost-effective? If yes, please explain.	Yes	The project includes benefits of safe space for non-vehicular travel and enhanced community using the US Department of Transportation Benefit-Cost Analysis Guidance for Discretionary Grant Programs. Comparisons of capital expenditures and future maintenance costs for the project against benefits of mortality reduction, reduced accidents, improved journer quality with the trail. Benefit-Cost ratio calculated as 2. Dates of obsented to trail.
		Is 50% local, state, or federal cost share secured for the project? If 50% cost share has been secured, please provide	10	Johney quarty warrane dain, benefit east and calculated as 2.2 based on benefits of rain.
		documentation with the application.		
		-No (unless the project is in a financially disadvantaged small community) -Cost share has been identified but not appropriated or released		
		-Cost share has been secured		
		-The project is in a financially disadvantaged small community and cost share is not required Has state funding previously been awarded for the project? If so, for what? Please explain and provide information		N/A
		sufficient for the Department to verify previous state funding. (Pre-construction activities are defined in s. 380.093(2)(c), F.S.)		
	Tier 3 Criteria Information	-None -Preconstruction activities (defined in a. 380.093(2)(c), F.S.) other than design and permitting		
		-Design		
		-Permitting -Construction (previous phases)		N/A
		Will this project exceed Florida Building Code flood-resistant requirements and local floodplain management regulations? If yes, please outlines the specific requirements and details relating to how the design exceeds the		
		criteria.		
		No		
		-Yes -These regulations do not apply to the project	These regulations do not apply to the project	
				Green infrastructure technologies are integrated into the project including pervious pavement, bioswales, and
		Does this project include innovative technologies designed to reduce project costs and provide regional collaboration? If yes, please specify which technologies will be used and explain why they are innovative as well as		storage/infiltration chambers underneath the trail to attenuate peak flows. Additionally, restoring the creek slopes and
		how they will reduce cost and provide regional collaboration. (For this criterion, "innovative" means an emerging		integrating native plants into the design helps to prevent erosion, reduce maintenance, create habitat, and improve water quality through natural systems bank stabilization. Cooperative funding is from American Rescue Plan Act,
		technology or a proven technology used in a unique way to adapt one or more critical assets to the effects of flooding or sea level rise.)		Community Development Block Grant - Mitigation, and Southwest Florida Water Management District continues to
			Yes	reduce economic impact of the project on the financially disadvantaged community. The trail system connects these communities to the Pinellas Trail and to innovative industry (like the new Tesla Center) at the Joe's Creek Industrial Parl
	Tier 4 Criteria Information			
				Yes, the project impact area contains financially disadvantaged communities as determined by the U.S. Department of
		Does the critical asset being adapted or the project impact area contain a financially disadvantaged community? If yes, please explain the metric used to determine financial disadvantage (ex. Local income compared to state average).		Transportation's (DOT) Disadvantaged Census Tracts. Economically disadvantaged is classified by the U.S. DOT as "areas and populations with high poverty, low wealth, lack of local jobs, low homeownership, low educational attainment, and
		prease exprom the metric used to determine infancial disadvantage (ex. Local income compared to state average).		high inequality." 11 of the 13 census tracts within the project impact area are designated as financially disadvantaged.
				Additionally, according to the 2019 American Community Survey (ACS) 5-Year Estimates, the median household income
		Will this project benefit a spring? If yes, please explain.	Yes No	for the project impact area is \$39,077, while the median household for the State of Florida is \$55,660.
		Will this project protect water sources using alternative water supplies? If yes, please explain.	No	
		Will this project construct, upgrade or expand facilities to provide waste treatment? If yes, please explain.	No	
Additional Information		Will this project convert septic to sewer? If yes, please explain.	No	
		Has this project been submitted to other programs for funding? If yes, please explain.		Project has received funding from the Florida Department of Economic Opportunity CDBG-MIT, the Southwest Florida Write Management Dicted Connecting Euclidea and continue to Aurora other funding apportunities including the
			Yes	Water Management District Cooperative Funding, and continues to pursue other funding opportunities including this Resilient FL grant, NOAA's Climate Resilience Regional Challenge, and USDOT's XYZ grant.
