SECTION E – SCOPE OF SERVICES**SECTION E – SCOPE OF WORK****A. OBJECTIVE:**

Solid Waste requires professional engineering consulting services associated with landfill management and other related landfill ancillary facilities, programs, projects, and other related activities on an as needed basis.

B. BACKGROUND:

The County owns two (2) landfills; the active Bridgeway Acres (BWA) Landfill that includes a Class I area and a Class I Non-Putrescible area, and the closed Toytown Landfill. The County's Solid Waste Management Facility also includes a scale facility; an administrative building; a mini-transfer station for individual citizen waste deliveries; a household chemical collection center; a yard waste/mulching operation; and other appurtenant facilities. The site also includes 3,150 tons per day waste-to-energy (WTE) facility, a 2.0-million-gallon water per day (mgd) industrial water treatment facility (IWTF) and a metals recovery facility. The WTE facility is not included in the scope of work. The Solid Waste Management Facility is managed by the County Solid Waste Department (SWD). In the year 2022, the County received over 1,140,000 tons of solid waste at the facility. DSW also manages an artificial reef construction program and recycling drop-off program. The BWA Landfill is an approximately 705-acre slurry wall-lined landfill. The Class I landfill primarily receives ash from the WTE facility and by-pass waste. Waste Management operates the Class I and Class III landfills, under contract to the County. The Toytown Landfill is a 235-acre closed slurry wall-lined Class I landfill. Both landfills have extensive ground and surface water monitoring programs, gradient control systems, and stormwater management facilities.

Review existing permits and advise of potential changes to reflect current operations or impacts on proposed programs or facilities. Assist with the preparation and delivery of permit modifications. Attend meetings with state regulators, as required.

Design Engineering – Design of facilities and systems as may be required including landfill expansion areas, landfill closure, stormwater facilities, landfill gas systems, waste processing and transfer facilities, roadways and monitoring systems. Engineering and design may also include site water management controls and automation. Work may include design, drawings, specifications, and assistance during bidding, and construction administration services.

Construction and Engineering – construction administration and engineering services as an independent third party where the CONSULTANT was not the designer to ensure work is completed per specifications.

Future Needs Projections – Provide landfill life expectancy evaluations and air space utilization calculations including compaction. Assist in preparing solid waste quantity projections.

Environmental Monitoring – Assist the COUNTY in conducting environmental monitoring programs including evaluation and analysis of results, FDEP report generation and making recommendations. This work includes evaluating the gradient monitoring program including hydrology with special consideration to hydrogeological influences and the negative gradient required on the site by permit conditions. Work may include assessment of the slurry wall.

System Improvements – Analyze and recommend improvements to existing facilities and operations, and management programs. Services include preparation of conceptual analyses, layouts and engineers estimate of construction and
