

# Pinellas County LMS 2015 Annual Report

## OVERVIEW

Pinellas County, its municipalities, and other stakeholders have developed a Local Mitigation Strategy (LMS) that defines the various types of potential hazards to the community, ways to minimize the impact of these hazards, and roles and responsibilities of the municipalities. The LMS has been in effect since 1998, and the 2014 update to the LMS focused on using the 10-step process consistent with the Federal Emergency Management Agency (FEMA) Floodplain Management Planning (FMP) element of the Community Rating System (CRS).

Each year the LMS Working Group meets and reviews the LMS action items. The action items are updated as appropriate and implemented projects and success stories are added. The Working Group also amends the LMS if they identify any other appropriate changes to the action plan. Once approved by the State, the County posts the updates on the LMS website, [www.PinellasLMS.org](http://www.PinellasLMS.org), sends a media release, and each jurisdiction submits the updates to their governing board.

## 2016 LMS UPDATES

The most recent Pinellas County LMS 5-year update was adopted in May 2015. The LMS Working Group developed the 2015 LMS update schedule in July 2015. Pinellas County and its municipalities reviewed, and revised as needed, the action items. The updates were discussed by the Working Group in October 2015, and further reviewed by a subcommittee. In January 2016 the Working Group reviewed and finalized the 2015 updates and sent them to the state for approval. Attachment 1 contains LMS meeting agendas and minutes detailing these efforts. The action items identified for revision included updates to Appendix 9, Mitigation Initiatives, and Appendix 10, Mitigation Accomplishments and Success Stories, which are detailed in Attachment 2. No other changes were identified.

The State approved the 2015 updates January 29, 2016 and the LMS Working Group subcommittee updated the LMS document and posted it to the LMS website. The County notified the public of the update via a news release and submitted the update to the Board of County Commissioners. Each jurisdiction also submitted the updates to their governing boards.

RE: 2016 Local Mitigation Strategy – Annual Update: Pinellas County

Dear Mr. Anderson:

This letter is to comply with Florida Administrative Code 27P-22, pertaining to the annual update on information regarding the Pinellas County Local Mitigation Strategy (LMS) and its Working Group.

The Chair of the Pinellas County LMS Working Group was elected at a regularly scheduled meeting on January 14, 2015. The Chair for 2015 is Carol Renea Vincent, Community Planning Section Manager. Noah Taylor, CRS Coordinator, City of St. Petersburg will serve as Vice-chair.

The membership consists of two types of members. Voting members representing each municipality, the Pinellas County School Board, Pinellas County Emergency Management Department and Pinellas County Planning Department have one vote. Advisory members do not have a vote, but are consulted for technical expertise and valuable input into the planning process. The Working Group continues to work with and seeks to increased participation of not-for-profit organizations, faith-based associations and the private sector. Attached, for your information, is the current roster of LMS participants in Pinellas County. A regular schedule of quarterly meeting dates is set for 2016 as follows: April 14, July 14, October 13, and Dec. 15. Discussion issues and other pertinent information are disseminated by email, as well as posted on a SharePoint site linked to our public access website: [www.pinellaslms.org](http://www.pinellaslms.org). Quarterly meetings are also posted on Pinellas County's Public Calendar of meetings.

Also attached are the updates to the Pinellas County LMS that were approved by the LMS Working Group at its January 14, 2016 meeting. These updates pertain to Appendix 9 - Mitigation Initiatives, and to Appendix 10 - Mitigation Accomplishments. Attachments for these updates are shown in strike-through/underline format. Clean versions will be placed on the LMS website after receipt by FDEM.

	Largo/Envir. Services	Biosolids Building - Hurricane Hardening	The Biosolids building is a large industrial, pre-engineered metal building. It houses most of the operating components used to convert wastewater solid into a Class AA Biosolid product, used for fertilization. Due to the essential nature of the facility, and the potential for the facility to sustain significant damage during a hurricane, a study was conducted to evaluate the structural performance of the building, under the effects of a Category 3 hurricane and to provide recommendations for either strengthening the existing structure (\$1.4 million), or total replacement of the building (\$1.8 million). Repair work would include roofing, wall work, structural bracing and stiffening, replacement of doors, windows and fans; and painting of structural steel. This project is not part of the approved CIP. /4	\$1,800,000	<FY17 (Unfunded)	
	Largo/Info. Technology	Computer Server Room Business Continuity	In FY 2010, it was determined that the weight and size of the existing server room was inadequate. The weight is more than the existing City Hall building can bear (computer room on second floor), the size and HVAC requirements are inadequate, and the survivability of the wind rating of the City Hall building is not high enough to protect the City's main (computer) infrastructure - the servers and main telephone switch. A new stand-alone Server and Telephone building (Data Center), survivable up to category 5 hurricane winds, off-site from City Hall is needed. The existing and proposed Data Center supports operational and communications for all City Departments including Public Safety, Environment Services, Public Works and Emergency Management. This project is part of the approved CIP. /4	\$2,000,000	FY12	LOST

Pinellas County  
Local Mitigation Strategy Work Group Meeting  
Thursday, July 16, 2015 1:30 P.M.  
Tampa Bay Regional Planning Council Office  
4000 Gateway Centre Blvd, Pinellas Park

## 1. Welcome and Introductions

Chairperson Renea Vincent welcomed attendees and attendees introduced themselves.

## 2. Review/Approval of Minutes, April 16, 2015:

Dayton Saltsman of the City of South Pasadena made the motion to accept the minutes from the last meeting, April 16, 2015. (?) *inaudible* seconded the motion. Motion passed unanimously.

## 3. Presentation: Pinellas County CRS/LMS results (510 and 610 Activities)

**Rahim Harji, Pinellas County; Lisa Foster, Jones Edmunds ; Sally Bishop, Pinellas County**

Mr. Harji stated that the purpose of the presentation was to share the County's Community Rating System (CRS) with the various municipalities. He explained that most of the content of the presentation was coming from Sections 510 and 610 of the County's Local Mitigation Strategy outreach information that Emergency Management staff does countywide, so that the municipalities could qualify for some of the required points of the system. He also explained that the municipalities would need to modify some of the information so that it is specific to their municipality. Mr. Harji then introduced Ms. Lisa Foster, with Jones Edmunds.

Ms. Foster stated that the Jones Edmunds consulting firm assisted the County with their CRS over the past year and that the County had its verification visit in November 2014. She then gave a basic overview of the CRS.

The CRS has four **(4) components** (core series): **a)** (300) Public Information Activities; **b)** (400) Mapping & Regulations; **c)** (500) Flood Damage Reduction Activities and **d)** (600) Warning & Response Activities. The focus of the presentation was on the 500 and 600 series.

The 300 Series deals with activities such as elevation certificates, in which 90% of them have to be correct before being able to move forward in the CRS program. The activities also deal with outreach projects, flood insurance promotions and the dissemination of flood protection information. The 400 Series deals with activities such as stormwater management, open space preservation, flood data maintenance, floodplain mapping and the assurance that regulations are in place that are going to protect the residents from flooding.

The 500 Series focuses on floodplain management planning. Pinellas County uses the Local Mitigation Strategy (LMS) as their floodplain management plan for their CRS Plan. The 600 Series focuses on Warning and Response. The Pinellas County Emergency Management Department is expecting to earn the maximum points that have yet to be earned in the state of Florida.

There are three **(3) different elements** in the **510 Floodplain Management Planning Activity (Max credit 622 points)**:

- **FMP: Floodplain Management Planning** (382 points for a communitywide floodplain management plan that follows a 10-step planning process: {**Step 1.** Organize; **Step 2.** Involve the public; **Step 3.** Coordinate; **Step 4.** Assess the hazard; **Step 5.** Assess the problem; **Step 6.** Set goals; **Step 7.** Review possible activities; **Step 8.** Draft an action plan; **Step 9.** Adopt the plan; and **Step 10.** Implement, evaluate, revise.}
  - LMS
- **RLAA: Retlitive Loss Area Analysis** (140 points for a detailed mitigation plan for a repetitive loss area.
  - RL Mitigation Plan

- **NFP: Natural Floodplain Functions** (100 points for adopting plans that protect one or more natural functions within the community's floodplain)
  - Comp Plan, Preserve Plans

Ms. Foster explained the prerequisites for the program. She stated that if a community is a repetitive loss community, the following prerequisites must be completed before being able to participate in the CRS program: **a)** a repetitive loss list needs to be generated; **b)** a map; **c)** list of causes; **d)** list of addresses; and **e)** a building count for areas with at least one, but fewer than 10, repetitive loss properties that have not been mitigated or with 10 or more repetitive loss properties that have not been mitigated. Either a Repetitive Loss Area Analysis or a Floodplain Management Plan must be done for those communities with 10 or more repetitive loss areas.

Ms. Foster introduced the Crosswalk Tool which includes a checklist and the 10 Step planning process, for those communities that are utilizing their own LMS. She then explained how to complete the Crosswalk Tool and went into more detail regarding the specifics of the steps.

She pointed out that regarding Step 3, Coordinating with Other Agencies, other agencies and organizations must be contacted to determine if they have studies, plans, or information pertinent to the floodplain management plan; to determine if their programs or initiatives may affect the community's program; and to see if they could support the community's efforts. It is important to ensure that the agencies and organizations that are contacted are not part of the LMS Committee working group which is comprised of 50% government and 50% stakeholders/public.

Some examples of "other agencies and organizations" include neighboring communities; local, regional, state, and federal agencies; and businesses, colleges, and other private and nonprofit organizations affected by the hazards or involved in hazard mitigation or floodplain management.

Regarding Step 2, Involving the Public, a public meeting separate from the committee meeting must be held within the first two months of the planning process to obtain public input. Another one must also be held at the end of the planning process, at least two weeks before submittal.

Some of the municipalities are very small and may encounter difficulty getting the required points needed so it is important for these communities to work closely with the ISO person from the County, as County points may be awarded to munis. The ISO can recognize any overlap and potential for duplicate efforts.

Step 8, Draft an Action Plan, is where the munis can specify activities appropriate to the community's resources, hazards, and vulnerable properties. The maximum points for this step is 60, the County anticipates 55 points. 50% of the available 60 points are needed to meet Class 4 prerequisites.

Ms. Foster stated that meeting the 50% stakeholder is the most difficult requirement to meet and suggested that each community bring a stakeholder to the next LMS Meeting. Chairperson, Renea Vincent asserted that the LMS Committee is a very broad working group and asked if there was any benefit to maybe shrinking the size of the group so that it would be easier to get the 50% as there are multiple individuals from multiple jurisdictions attending. Ms. Foster replied that as long as the working group is comprised of the required representatives from the various departments for the various jurisdictions (i.e. Planning, EMS, Engineering, etc.) and the match, that that would be acceptable. Ms. Foster added that it was important to be mindful that if points are desired for Step 3, that anyone who is included as a stakeholder cannot be consulted for information. Mr. Harji added that it was also important not to exclude anyone and suggested that a list be formed to see the specific existing representation and then go from there in deciding who is missing and/or needed. Chairperson Vincent asked if all of the positions had to be represented under each municipality. Ms. Foster replied that it is dependent upon the municipality's size and its department composition.

If a community has a floodplain ordinance that is more restrictive than the LMS it is okay; however, it would be in the community's best interest to review the model ordinance of the State and the County.

After seeing that there were no additional questions or comments relating to the 500 series, Ms. Foster moved on to the 600 Series which focuses on Warning and Response. This Series has three **(3) components: a) Flood Warning and Response; b) Levees; and c) Dams.**

There are **6** different **elements** in the **610 Flood Warning and Response Activity (Max credit 395 points):**

- FTR: Flood threat recognition system
- EWD: Emergency warning dissemination
- FRO: Flood response operations
- CFP: Critical facilities planning
- SRC: Storm Ready community
- TRC: Tsunami Ready community

The Flood Warning and Response Activity consists of a Documentation Report (developed by Sally Bishop), a Checklist and several Attachments.

Ms Foster stated that Mr. Harji would make the County's report, checklist, attachments and scoring available to the communities for review as a lot of what the County does is countywide. She suggested that the communities utilize a similar format but each community has to go through the report compare and tweak when necessary to make it community specific. Mr. Harji will send the information to the LMS group/communities and will also post it on the website downloadable in WORD format for easy editing.

Communities that do not have an individualized plan for any specific emergency operation and therefore rely on the County's plan must indicate that and state that the County is aware. The communities were urged to contact their ISO for assistance.

At the conclusion of the PowerPoint presentation, Chairperson Vincent reiterated that the County's report, checklist, attachments etc. will be made available via multiple channels to the LMS group, CRS etc.

Ms. Sally Bishop asked if the Program for Public Information Committee (PPI) was made aware of what was occurring so that the County could take advantage and get some points via that venue. Chairperson responded that the LMS group met once early on in the process to talk about the PPI Committee. Ms. Bishop also stated that the cities could take advantage of the fact that the County is already storm ready; however, if the cities were not storm ready but wanted to be, that they needed to contact Daniel Noah, the County's National Weather Service contact, to start the process. She will ensure that his contact information is made available to anyone who is interested.

Ms. Bishop and Mr. Harji explained that if the cities do not want to be a part of the County's PPI, the cities can take the information that the County has developed and reproduce it at the city level and swap out logos, get the points and have all of the same materials without having to reinvent the wheel. Additionally, if a community doesn't want to create a PPI website, they can simply direct them to the County's website, which would still qualify the community for those points.

Mr. Harji also shared that the communities could utilize the Pinellas County Map Service Center which pulls in data for the entire nation; however, the capability exists for parcel level searches for flood zones, storm surge, contour elevations and other layer information that gets more points. The source of the data must be noted.

Chairperson Vincent added that Pinellas County's Enterprise Egis staff recently added new set of public facing map applications. She will see if a link can be added to the LMS website so that it is easily accessible to the workgroup.

#### 4. LMS Update/Status – Those municipalities that still need to adopt the LMS

Chairperson Vincent stated that there are still a few municipalities that still need to adopt the LMS. She stated that she sent out an email to those specific municipalities and thanked those who got them in. There are 7 remaining municipalities that still have not gotten their adopted LMS Resolutions in to her or Michael Wallach that she will follow up with independently.

#### 5. Appendix 9 and 10, Annual Updates

Chairperson Vincent stated that the group needs to start thinking about Appendix 9 and 10 annual updates which is the list of unfunded projects and the list of accomplishments. There were a few municipalities who identified some things that needed to be corrected after the LMS had been adopted. The information is currently contained on a huge EXCEL spreadsheet. Mrs. Vincent stated that she is open to suggestions for the best way to make corrections. She is hoping to make it available for the October meeting for discussion and get it ready for finalization in December. Noah Taylor, with the City of St. Petersburg stated that there may be some unfunded projects on Appendix 9 that may have been completed that need to be moved to 10. There was a slight modification to the format of the spreadsheet for the last LMS review, as additional information had been requested. For new projects for 9, there will need to be a committee to score them and go through the ranking to get them officially on the list. Noah Taylor and Bob Bray assisted on the committee last time; additional volunteers are welcome.

If a municipality has data errors in the plan, those errors can be corrected during the annual update. Mrs. Vincent said that she will investigate to see what can be done if there are errors elsewhere in the LMS document that need to be corrected. There may be a way to do minor edits to the document without having everyone have to re-adopt the LMS completely. Ms. Vincent stated that she would reach out to Hillsborough for some guidance as they have gone through the correction process before. It would be in the muni's best interest to adopt the plan with the errors and then go through the correction process. As it is a countywide process, it has already been approved for adoption so it is important for everyone to get it adopted. If a municipality does not have an adopted LMS Resolution, they will not be able to apply for any of the hazard mitigation funding opportunities that may be available in the future.

Pinellas County  
Local Mitigation Strategy Work Group Meeting  
Thursday, October 15, 2015 1:30 P.M.  
Tampa Bay Regional Planning Council Office  
4000 Gateway Centre Blvd, Pinellas Park

## 1. Welcome and Introductions

Chairperson Renea Vincent welcomed attendees and attendees introduced themselves.

## 2. Review/Approval of Minutes, July 16, 2015:

Mr. Gregory Becker, Pinellas County Emergency Management made the motion to accept the minutes from the last meeting, July 16, 2015. Mr. Danny Taylor, Indian Rocks Beach seconded the motion. Motion passed unanimously.

## 3. Appendix 9 and 10, Annual Updates/Adoption Schedule

Chairperson Vincent stated that she had received the strike-thru underline Appendix 9 & 10 updates from nearly half the jurisdictions. She informed the attendees that a compiled document had been sent to everyone that hopefully reflected everyone's updates accurately and requested that they speak to her or email her if there were any comments. She also stated that she didn't have all of the updates for Pinellas County yet and that Rahim Harji is in the process of completing the updates dealing with stormwater projects and associated items. She informed the group that the October 1, 2015 deadline had been extended to October 30, 2015 for additional updates which also included new projects. She then turned the meeting over to Vice-chair, Bob Bray to explain the scoring sheets.

Mr. Bray explained that the scoring sheet has a column which asks for a score to be entered from 1-5, and once that score is entered it will accurately calculate an associated point in the point column. The spreadsheet has been set up to automatically tabulate the scores so no mathematics is required. Mr. Bray further stated that it was important to be as detailed as possible in the description section as it will help to support the score. All of the new projects that come in must be reviewed by the subcommittee and a detailed project description will minimize questions.

Mrs. Vincent added that if the jurisdiction's projects are not listed, the jurisdiction would not be eligible to apply for funding for the unlisted projects. Mr. Bray added that the scores are ranked across the county. There is a grand total that the funding comes out of. One of the determining factors along with being listed in the LMS document is where the jurisdiction's score falls in the LMS document. If there is a tie or a shortage of funding, a better score is going to get the extra points. Mrs. Vincent stated that she had sent out several emails regarding the score sheets and hopes that everyone can get any additional projects in by the October 30<sup>th</sup> deadline, as it will give the subcommittee time for adequate review.

Mrs. Vincent informed the group that the subcommittee included Bob Bray, Noah Taylor, and her. The same individuals functioned as the subcommittee last year and were unopposed by the group to function in the same capacity this year as well. She explained that the subcommittee, basically review, check the scoring and do an apples to apples comparison to make sure that everyone is scoring similarly. Sometimes there are some interpretation questions as to what something really means when the spreadsheet is filled out. A tentative date of November 19<sup>th</sup> at 2:00 pm has been set for the subcommittee to meet and review the projects. This time frame would give the subcommittee enough time to have the review process completed for the January meeting and have the board bless the new projects as well as the Appendix 9 & 10 changes.

A question was posed as to whether or not the scoring was supposed to be done countywide opposed to by individual city. It was the understanding of one of the attendees that it had been previously done this way so that if and when there was a tie or a need to use that list at the state

level, that they would be able to see the overall list opposed to having to look through 25 municipalities. Mrs. Vincent deferred to Mr. Brady Smith for a response. She asked Mr. Smith if the LMS had changed since the last time. Mr. Smith stated that he couldn't remember off the top of his head but stated that this was the way that Betty\_\_\_\_\_ had entered the information as it was the easiest way to do it. Mrs. Vincent stated that she would touch base with Michael Wallick to find out. She added that it is much easier to do strike-through underline in a WORD document than making changes in an EXCEL spreadsheet. Several attendees were in agreement. She further added that it was done this way and reordered as a part of the LMS update. She stated that it is not in the LMS Plan in numerical sequence but is in there by jurisdiction. She will check with Michael Wallick to find out the best way to do it.

There was some question as to exactly how long the projects need to stay on the list. For example, there are some projects listed dating back to 2001. An attendee made Mrs. Vincent aware that the narrative also needed to be updated. A comment was made that if the projects were kept on the list, it would be able to show what we have succeeded at because otherwise the successes would just get buried in records management files. Mrs. Vincent stated that she would send the list of questions/suggestions up to Michael Wallick for guidance.

Mrs. Vincent asked if a formal action of a vote was needed to approve Bob, Noah and she as the subcommittee. Yes, was the general response. She asked if anyone wanted to make a motion confirming Bob, Noah and she as the subcommittee. Gregory Becker, made the motion and Anthony Mastracchico seconded it. With none opposed, the motion carried. Mrs. Vincent stated that the subcommittee meeting was an open meeting and was scheduled for November 19, 2015 at 2:00 pm in Bob Bray's office.

#### 4. LMS 2016 Meeting Schedule

Chairperson Vincent presented the proposed LMS 2016 Meeting Schedule, suggesting that the meeting remain a quarterly meeting on the third Thursday of the meeting month at 1:30 pm at the Tampa Bay Regional Planning Council. No objections were noted; whereupon, Mr. Bob Bray moved, seconded by Mr. Noah Taylor and carried unanimously, that the schedule be approved. The approved meeting dates are:

**January 14, 2016; April 14, 2016; July 14, 2016; and October 13, 2016.**

#### 5. Other Business

Gulfport and Dunedin are the only two jurisdictions that have not yet submitted their Resolutions of Approval on the LMS. Mrs. Vincent stated that Dunedin's is done but has not yet been received and didn't know the status of Gulfport's. She then thanked everyone else who had submitted theirs.

All jurisdictions were encouraged to attend the January 14, 2016 meeting so that a vote can be taken to send the updates up to Tallahassee as well as to elect new officers.

Mr. Bray suggested that the cities consider starting the annual updates earlier opposed to waiting and having to rush to get them done.

Mrs. Vincent stated that the group had a very good presentation by Rahim back in July regarding the County's CRS cycle and how the County uses the LMS as well as some other resources that the cities can take advantage of. The presentation is posted on the County's LMS website. She told the attendees to feel free to reach out through her or directly to Rahim if/when they are going through CRS reviews, as there were a lot of things that the County was able to max out points on that the cities, with a few minor modifications and links should be able to take advantage of, especially for emergency management notifications. She then informed anyone that wasn't aware that the County went from a 7 to a 5.

Mr. Brady Smith, addressing Mr. Bray stated that Mr. Bray had mentioned that Climate Change and Sea Level Rise was something that had been identified in this last 2015 LMS update and continued that there was significant work currently going on in these areas. The Regional Planning Council had recently worked with a scientific advisory panel to develop a recommendation for sea level

rise scenario based projections and suggested that it might be a good presentation for the January meeting. Mrs. Vincent stated that she'd note that as a presentation for January.

Mr. Noah Taylor stated, regarding the points that the jurisdictions can get piggybacking off of the County's emergency management notifications, that if a jurisdiction gets close to a new class, a request can be made for a modification which can be done once a year. He found this out when he was submitting information for his city's yearly recertification, which is in the CRS manual. Additional items would need to be submitted but it would be things that were missing before doing the LMS. There is no need for a full blown audit to get a modification and it only takes about a week. It could be huge for your community if you would like to get an extra 5% on your CRS. He also stated that Danny Hinson was in the process of sending out a memo to all of the communities that can be used to request state materials which can get you so many points for outreach as long as you are displaying them in your community. He will send a template in which you fill in your community's information and then indicate where you plan to display the requested material.

## **7. Adjournment**

There being no further business, Mrs. Vincent asked if there was a motion to adjourn. Mr. Bob Bray made the motion and Ms. Catherine Porter seconded the motion. The meeting adjourned at 1:55 pm. The next meeting is scheduled for Thursday, January 14, 2015 at 1:30 pm.

	Largo/Envir. Services	Biosolids Building - Hurricane Hardening	The Biosolids building is a large industrial, pre-engineered metal building. It houses most of the operating components used to convert wastewater solid into a Class AA Biosolid product, used for fertilization. Due to the essential nature of the facility, and the potential for the facility to sustain significant damage during a hurricane, a study was conducted to evaluate the structural performance of the building, under the effects of a Category 3 hurricane and to provide recommendations for either strengthening the existing structure (\$1.4 million), or total replacement of the building (\$1.8 million). Repair work would include roofing, wall work, structural bracing and stiffening, replacement of doors, windows and fans; and painting of structural steel. This project is not part of the approved CIP. /4	\$1,800,000	<FY17 (Unfunded)	
	Largo/Info. Technology	Computer Server Room Business Continuity	In FY 2010, it was determined that the weight and size of the existing server room was inadequate. The weight is more than the existing City Hall building can bear (computer room on second floor), the size and HVAC requirements are inadequate, and the survivability of the wind rating of the City Hall building is not high enough to protect the City's main (computer) infrastructure - the servers and main telephone switch. A new stand-alone Server and Telephone building (Data Center), survivable up to category 5 hurricane winds, off-site from City Hall is needed. The existing and proposed Data Center supports operational and communications for all City Departments including Public Safety, Environment Services, Public Works and Emergency Management. This project is part of the approved CIP. /4	\$2,000,000	FY12	LOST
