

UPGRADE JAIL CAMPUS INFRASTRUCTURE PHASE 1

SCOPE OF WORK

- Installation of site utilities and security system upgrade.
- New Infrastructure Building housing kitchen, dining, laundry, data center, central control, and central energy plant.
- The central energy plant will feature co-generated power through the use of a 2-megawatt natural gas-powered generator. The waste heat produced by the generator will be used by an absorption chiller to produce chilled water.
- Second floor connection between Infrastructure Building and Central Tower.
- New Facilities Maintenance and Sheriff's Purchasing Warehouse.
- Canopy connection between Infrastructure Building and Health Care Building.
- New freight elevator and staff entry at Central Tower.
- Renovation of South Division Kitchen.
- Demolition of Main Control, North Division Kitchen, and North Division Laundry.
