**Petition to Oppose Rezoning of FLU-25-03 and 04**

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbird to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a Scenic Non-Commercial Corridor in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TV will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

**This MUST be done prior to rezoning approval.**

- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

**Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.**

**This MUST be done prior to rezoning approval.**

## Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This **MUST** be done prior to rezoning approval.

Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

**Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.**

**This MUST be done prior to rezoning approval.**

**Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01**

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

**There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.**

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.

Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

**Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.**

**This MUST be done prior to rezoning approval.**

**Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01**

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

**There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.**

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
