AGREEMENT

EXHIBIT A - STATEMENT OF WORK

OVERVIEW

- a. Many areas of Pinellas County are low lying and may be flooded for several days following a disaster event. Contractor must become familiar with the geography of Pinellas County in order to effectively stage personnel and equipment.
- b. There is no guarantee of minimum or maximum amounts per contract item.
- c. No adjustments to contract prices will be considered due to the increases or decreases in estimated quantities.
- d. No adjustments to contract prices due to variable costs of goods/services will be considered during the period of this contract (i.e., cost of fuel, etc.)
- e. The Contractor is required to perform at least thirty (30%) percent of the work with its own forces.
- f. Depending upon the nature of the disaster, the Contractor may be required to perform work for the County and all participating municipalities, or as few as a single municipality.

Pinellas County will assign a Debris Manager (DM) or designee, who will establish and staff a Debris Management Center (DMC) which will provide overall coordination between the Contractor, Pinellas County, the County's contracted debris monitoring firm and municipalities.

The Contractor should expect the following categories of debris to be generated from a disaster event, such as a hurricane:

- Vegetative debris (tree limbs, stumps, brush, leaves, etc.)
- Construction and Demolition (C&D) debris i.e., wood, glass, metal, wallboard, roofing, and flooring
- White Goods (refrigerators, stoves, water heaters, washers, dryers)
- Household furniture, mattresses, carpet, etc.
- Household Hazardous Wastes and other hazardous wastes or materials
- Vehicles and vessels
- Animal carcasses
- Sand, mud, or soil

The amount of the debris to be removed under this contract will be dependent upon the size and severity of the emergency.

PREPARATION AND MOBILIZATION

The Contractor must communicate with the DM annually to discuss any special considerations required by the Contractor for the respective planning year. Pinellas County will provide the Contractor a copy of the County's current Debris Management Plan and the Contractor may be requested to review the Debris Management Plan and provide input or comments. Contractor may be requested to provide technical guidance and consultation prior to, during and after the disaster event.

When a major disaster occurs or is imminent:

- a. Pinellas County and/or Responsible Municipalities will issue a Notice to Proceed (NTP) to the Contractor (The Notice to Proceed establishes the lines of communication between the Contractor's representatives and the Responsible entity and notifies Contractor that they should send a Project Manager (PM) to Pinellas County within 24 hours, as specified in the NTP, to begin planning and mobilization).
- b. Pinellas County will issue the first Task Order and Purchase Order authorizing the Contractor to begin mobilizing personnel and equipment necessary to perform the work.
- c. The Task Order directs the Contractor to execute the required Performance and Payment Bonds. The Contractor should anticipate receiving the Task Order from Pinellas County within the first 24 hours following landfall of an eligible hurricane or occurrence of other disaster.
- d. The DM will direct the specific schedule to be used after ascertaining the scope and nature of the disaster's impacts.
- e. Location of DMS sites will be identified and supplied to Contractor by Pinellas County. Specific DMS may be required for different types of debris.
- f. The DM may also establish designated homeowner drop-off sites from which Contractor will be required to remove the debris collected on a daily basis.

AGREEMENT

- g. Contractor is responsible for the collection, reduction (if applicable) and hauling for disposal of debris by-products generated at all debris management sites or temporary debris storage and reduction (DMS) sites. Disposal, recycling or reuse of debris and related by-products inside the County's jurisdictional boundaries requires written approval of the DM and is to be appropriately permitted.
- h. Pinellas County may require removal of debris from publicly maintained drainage areas. The DM will identify these areas and provide the appropriate authorization as described in this Scope of Services to conduct this work.
- i. The Contractor shall not mix Eligible Debris hauled for Pinellas County under this contract with any debris hauled for other counties or out-of-County municipalities under separate contracts. Debris Reduction

The following three (3) methods may be selected for the reduction of vegetative debris:

36. Above-Grade Air-Curtain Burning
37. Portable Air-Curtain Burning
38. Chipping and Grinding

Above and Below -Grade Air-Curtain Burning

39. The air-curtain pit burning method incorporates an earthen pit, constructed by building above grade, and a blower. The blower and pit make up an engineered system that must be precisely configured to properly function.
40. See the drawing provided in ATTACHMENT B for details.
Minimum required air velocity measured at the nozzle is 8,800 feet/minute (100 mph).
Minimum airflow rate measured at the nozzle is 900 cubic feet per min per linear foot of pit length.
(For example, a 20-foot-long pit would require a blower with a nozzle velocity of 8,800 ft/min and nozzle output rate of 18,000 cfm).
41. Pit should be a maximum of 8 feet wide, and from 12 to 20 feet deep. The actual pit dimensions should be such that the system functions properly.
42. Pit must be constructed out of a highly compactable material that will hold shape and support the weight of the loading equipment.
 - There shall be an impervious layer of clay or limestone on the bottom of the pit to provide a barrier for ground water protection and capable of supporting the wheel weight of the loading equipment.
 - The bottom layer shall be a minimum of one (1) foot thick and be repaired as necessary after each ash removal operation.
43. There must be a minimum distance of 100 feet between the burn area and the nearest debris piles, building and/or people or workers.
44. The ends of the pits must be sealed with dirt or other material to a minimum height of four feet.
45. A twelve-inch dirt seal must be placed on the lip of the burn pit area to seal the blower nozzle. The nozzle should be three-to-six (3 – 6) inches from the edge of the pit.
46. There must be one foot (1') high wheel stops running the length of the pits to alert equipment operators when they are close to the pit. The warning stops should be constructed of fireproof material.
47. The airflow should hit the wall of the pit at about two feet below the edge of the pit and the debris should not break the path of the airflow, except during dumping.
48. Length of the pit should be no longer than the length of the blower system, and the pit should be loaded uniformly along the length.
49. The burn will be extinguished at least two hours before removal of the ash mound. Wetting of the ash will be necessary to reduce dust while removing ash. The Contractor shall be responsible for dust control while handling ash materials.
50. No hazardous or contained-ignitable material is to be dumped into the pit.
51. Contractor is responsible for ensuring that the public is protected from the burn operation. Signs, fences, and other measures must be used, if necessary, depending on site conditions.
52. Contractor shall apply for, and obtain, all local, state, and federal permits for air curtain incineration and meet all applicable emission standards.

Portable Air-Curtain Burning

53. Portable incinerators use the same principles as air-curtain pit systems. The primary difference is that portable incinerators utilize a pre-manufactured pit in lieu of an on-site constructed earth or limestone pit. The pits are engineered to precise dimensions to complement the blower systems. These types of units come in various sizes and are the preferred method of air-curtain burning because of their portability and ease of operation.

AGREEMENT

54. Minimum required air velocity measured at the nozzle is 8,800 feet/min (100 mph). Minimum airflow rate measured at the nozzle is 900 cubic feet per min per linear foot of pit length. (As an example, a twenty (20') foot long pit would require a blower with a nozzle velocity of 8,800 feet/min and nozzle output rate of 18,000 cfm).
55. There must be a minimum distance of 100 feet between the portable incinerator and the nearest debris piles, buildings, and/or people and workers.
56. There must be one-foot-high warning stops running the length of the pits to alert equipment operators when they are close to the pit. The warning stops shall be constructed of fireproof material.
57. The burn will be extinguished at least two hours before removal of the ash mound. Wetting of the ash will be necessary to reduce dust while removing ash. Contractor is responsible for dust control while handling ash materials.
58. No hazardous or contained-ignitable material is to be dumped into the pit.
59. Contractor is responsible for ensuring that the public is protected from the burn operation. Signs, fences, and other measures must be used, if necessary, depending upon site conditions.
60. Contractor shall apply for and obtain all local, state, and federal permits for air curtain incineration and meet all applicable emission standards.

Chipping and Grinding

61. The average chip size produced is dependent on the needs of the end user or as defined by the DM. The reduction in volume of the vegetative debris shall be at least a 4:1 ratio. Contractor shall provide the DM specifications of the grinder screen size and the reduction ratio for each grinder used on this contract for approval, prior to commencing chipping or grinding operations.
62. Contaminants are not permitted in the chips or mulch.
 - Plastics, metals, pressure treated lumber, and other non-vegetative debris shall be eliminated.
 - Sand and dirt should be minimized as much as possible.
 - To help eliminate contaminants, root rake loading equipment should be used to feed material to the chipper/grinder.
 - Hand laborers must be utilized to pull out contaminants prior to feeding the chipper/grinders.
 - Shaker screens are required when processing stumps with root balls or when large amounts of soil are present in the vegetative debris.
63. Chips/mulch should be stored in piles no higher than twelve (12') feet and meet all state and local laws.
64. Contractor must obtain authorization to make any changes to the processing requirements above in writing from the DM.

Load Tickets

65. Contractor must ensure that no debris is transported into a DMS without an accompanying properly completed load ticket.
66. A five (5) part load ticket must be used for recording volumes of debris removed, processed, and disposed.
 - Contractor must provide ticket forms with pre-printed unique ticket identifier.
 - Load ticket provided by Contractor must be approved by the DM prior to being used.
67. The Load Ticket must include the following information completed:
 - Street address or coordinates of where debris is picked up
 - Amount of debris picked up; and
 - Amount of debris hauled; and
 - Amount of debris disposed
68. A Load Site Monitor will issue a 5-part load ticket to the driver prior to departure from the loading site and will retain one copy of the ticket.
 - Upon arrival at the DMS, the vehicle operator will give the remaining four parts to the Tower Monitor at the DMS Inspection Tower.
 - The Tower Monitor will validate the ticket and enter delivered volume as appropriate.
 - The Tower Monitor will keep the one copy and give the remaining three parts to the vehicle operator.
 - Contractor will ensure that the remaining 3 parts of the load tickets are retained for record and invoicing as appropriate.
69. Debris removal sub-contractors will not be permitted to unload the debris at a DMS without an approved Load Ticket that was supplied by and partially completed by the Load Site Monitor.
70. Sub-contractor(s) will not receive a load ticket for any loads that were not observed by a Load Site Monitor during loading without the approval of the DM.

AGREEMENT

Measurements

71. Measurement for the management and processing of all incoming debris will be by the cubic yard as determined through truck and trailer measurements.

EXHIBIT E - DISPUTE RESOLUTION FOR PINELLAS COUNTY BOARD OF COUNTY COMMISSIONERS IN MATTERS OF INVOICE PAYMENTS:

Payment of invoices for work performed for Pinellas County Board of County Commissioners (County) is made, by standard, in arrears in accordance with Section 218.70, et. seq., Florida Statutes, the Local Government Prompt Payment Act.

If a dispute should arise as a result of non-payment of a payment request or invoice the following Dispute Resolution process shall apply:

- A. Pinellas County shall notify a vendor in writing within 10 days after receipt of an improper invoice, that the invoice is improper. The notice should indicate what steps the vendor should undertake to correct the invoice and resubmit a proper invoice to the County. The steps taken by the vendor shall be that of initially contacting the requesting department to validate their invoice and receive a sign off from that entity that would indicate that the invoice in question is in keeping with the terms and conditions of the agreement. Once sign off is obtained, the vendor should then resubmit the invoice as a "Corrected Invoice" to the requesting department which will initiate the payment timeline.
 1. Requesting department for this purpose is defined as the County department for whom the work is performed.
 2. Proper invoice for this purpose is defined as an invoice submitted for work performed that meets prior agreed upon terms or conditions to the satisfaction of Pinellas County.
- B. Should a dispute result between the vendor and the County about payment of a payment request or an invoice then the vendor should submit their dissatisfaction in writing to the Requesting Department. Each Requesting Department shall assign a representative who shall act as a "Dispute Manager" to resolve the issue at departmental level.
- C. The Dispute Manager shall first initiate procedures to investigate the dispute and document the steps taken to resolve the issue in accordance with section 218.76 Florida Statutes. Such procedures shall be commenced no later than 45 days after the date on which the payment request or invoice was received by Pinellas County, and shall not extend beyond 60 days after the date on which the payment request or invoice was received by Pinellas County.
- D. The Dispute Manager should investigate and ascertain that the work, for which the payment request or invoice has been submitted, was performed to Pinellas County's satisfaction and duly accepted by the Proper Authority. Proper Authority for this purpose is defined as the Pinellas County representative who is designated as the approving authority for the work performed in the contractual document. The Dispute Manager shall perform the required investigation and arrive at a solution before or at the 60 days timeframe for resolution of the dispute, per section 218.76, Florida Statutes. The County Administrator or his or her designee shall be the final arbiter in resolving the issue before it becomes a legal matter. The County Administrator or his or her designee will issue their decision in writing.
- E. Pinellas County Dispute Resolution Procedures shall not be subject to Chapter 120 of the Florida Statutes. The procedures shall also, per section 218.76, Florida Statutes, not be intended as an administrative proceeding which would prohibit a court from ruling again on any action resulting from the dispute.
- F. Should the dispute be resolved in the County's favor interest charges begin to accrue 15 days after the final decision made by the County. Should the dispute be resolved in the vendor's favor the County shall pay interest as of the original date the payment was due.
- G. For any legal action to recover any fees due because of the application of sections 218.70 et. seq., Florida Statutes, an award shall be made to cover court costs and reasonable attorney fees, including those fees incurred as a result of an appeal, to the prevailing party. If it is found that the non-prevailing party held back any payment that was the reason for the dispute without having any reasonable lawful basis or fact to dispute the prevailing party's claim to those amounts.

The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence [Appendix II to 2 CFR Part 200].

ATTACHMENT B - AIR CURTAIN COMBUSTOR GENERAL ARRANGEMENT ABOVE AND BELOW GRADE

BELOW GRADE:

A power source, either electric motor or diesel power unit, drives a fan which in turn creates an air curtain by forcing air through a plenum and nozzle. This high velocity air travels across the top of the pit, in which a fire has been started.

The air curtain traps smoke and small particles and re-circulates them to enhance combustion and reduce smoke. The very large volume of air accelerates combustion and provides for high pit temperatures between 1800 degrees F and 2200 degrees F.

The pit provides a safe combustion chamber that helps prevent heat loss.
