Good afternoon,

I have received the attached correspondence from the public concerning cases FLU-25-03 (Legistar item 25-0919A) and DMP-25-01 (Legistar item 25-0907A) for the July 22, 2025 BoCC Meeting. Please let me know if you have any questions or need any more information from me.

Thank you,

Marie Admire

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

Subject: Re: Ideas for the meeting

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC) oppose zone changes from Banking to Commercial Car wash. Rezoning will impact our community as follows:

- 30% increase of TWC in an already congested residential area of TWC. This area has experienced an increase in traffic since covid due to various kind of deliveries from groceries, amazon, UPX, FEDEX, trash pickup, etc...
- 30% increase in East Lake Corridor traffic at this intersection forward (6+ miles) which transition from Three lanes to Two Lanes each way.
- TWC traffic and demographics have changed over the years from 50% snowbirds to 80% fulltime residents.
- 100% New noise factor impacts due to car wash equipment operating on average of 10hrs+/day seven days a week.
- 100% increase in street lights which will impact wild life
- 30% pollution impacts from car wash verses commercial banking at this location.
- 30% increase of traffic at TWC is endangering off wildlife including Deers and turkeys
- Pinellas County must complete a study of traffic impact and auto accidents before approval is granted.
- There are already over ten car wash and semi self service car washes within 5 miles radius of this

location including adjacent car wash at the gas station/store

- The county needs to address the impact similar to TWC similar to the Eastlake woodland community impact from the Tidal Wave car wash.

Subject: Ideas for the meeting

Once the zoning is changed to commercial, anything could be built at that space. The current interest is in a car wash but could change to any other business model with commercial zoning. McDonald's, Chick Fil-A, another gas station.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. - 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersign resident of Tarpon Woods Community (TWC) oppose zone changes from Banking to Commerical Car was. Rezoning will impact our community as follows:

- 30% increase of TWC in an already congested residential area of TWC. This area has experienced an increase in traffic since covid due to various kind of deliveries from groceries, amazon, UPX, FEDEX, trash pickup, etc...
 - 30% increase in East Lake Corridor traffic at this intersection forward (6+miles) which transition from Three lanes to Two Lanes each way.
 - TWC traffic and demographics have changed over the years from 50% snowbirds to 80% fulltime residents.
 - 100% New noise factor impacts due to car wash equipment operating on average of 10hrs+/day seven days a week.
 - 100% increase in street lights which will impact wild life
 - 30% pollution impacts from car wash verses commercial banking at this location.
 - 30% increase of traffic at TWC is endangering of wildlife including Deers and turkeys
 - Pinellas County must complete a study of traffic impact and auto accidents before approval is granted.
 - There are already over ten car wash and semi self service car washes within 5miles radius of this location including adjacent car wash at the gas station/store
-
- The county needs to address the impact similar to TWC similar to the Eastlake woodland community impact from the Tidal Wave car wash.

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.

**PETITIONS TO OPPOSE CASES
FLU-25-03 & DMP-25-01**

**Received by Pinellas County
Zoning Division on 07/07/2025**

Delivered by Y. Chomanczuk

Petition to Oppose Rezoning of FLU-25-03 and DMP-25-01

I, the undersigned resident of Tarpon Woods Community (TWC), oppose zone changes from Banking to Commercial at this location. The request is initiated by a business looking to open a car wash. Once rezoned, any commercial business would have the ability to move into this area.

There are already more than ten car wash businesses, full and/or self-service, within a 5-mile radius of this location, including two within one mile of this intersection.

Rezoning will have an extreme and immediate impact on our community:

- 1- 30% increase of traffic at the intersection of East Lake Rd and Tarpon Woods Blvd, which is already extremely congested. This area has already experienced an increase in traffic since the pandemic. Due to increases in online shopping, there are additional deliveries from groceries, Amazon, UPS, FEDEX, etc. TWC demographics have changed in recent years from 50% snowbirds to 80% full-time residents, which has added to the congestion at the intersection outlet to East Lake Rd. There is only one other intersection exit from the community, which is Ridgemoor Blvd.
- 2- The East Lake Corridor in this area is designated a **Scenic Non-Commercial Corridor** in the Countywide Plan map. East Lake Corridor traffic going north (6+miles) transitions from a 6-lane highway to 4-lanes prior to the Tarpon Woods Blvd intersection. Traffic to and from Trinity, especially during commuting hours, currently clogs this highway. A 30% increase of traffic at TWC will endanger deer, turkey and other wildlife of the area.
- 3- 100% new noise factor due to car wash equipment operating on average 10hrs+/day, seven days a week. Noise will increase with more traffic, as well.
- 4- 30% pollution increases from car wash verses commercial banking at this location, along with increased vehicle emissions.

Pinellas County must complete a study of the traffic & environmental impact this business would have on the TWC, the Brooker Creek Watershed Preserve, the Wellhead Protection Overlay, as well as John Chestnut Park, which is adjacent to this property.

This MUST be done prior to rezoning approval.
