### Description & Comments

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

This item is for an amendment to the agreement between the County and the City of St. Petersburg for the continued service of Advanced Life Support Emergency Medical Services from first responders.

In this amendment, there is an update to the reimbursable amount that the County will pay for a rescue unit. The amount is being increased to \$230,000 from \$200,000. This increase allows for the purchase of a utility compartment that can be removed and remounted on a new vehicle chassis when the original vehicle chassis has reached the end of its useful life. The utility compartment carries a lifetime warranty and is anticipated to save money over time as only a vehicle chassis will need to be replaced instead of the chassis and utility compartment.

There are three (3) rescue units that will be converted to these new types of rescue units in FY21 at a total cost of \$690,000.

This amendment also provides for \$100,000 towards the purchase of a new medic response vehicle (Medic 7). The contractor will utilize contractor held EMS funds for this vehicle purchase. This new unit is the result of a change on the Medic 1 and Medic 3 units. These units will not be staffed by only paramedics instead of paramedic/firefighters. This change brings a cost savings that will allow the City to implement Medic 7 at not additional cost to the EMS Authority.

The initial contract term of five (5) years, beginning October 1, 2019 and ending September 30, 2024, remains in place along with the option for one (1) five-year extension following the end of the initial term as well.

The amounts included in this contract amendment are consistent with the request included in the FY21 Tentative Budget for the Emergency Medical Services Fund.
