CHAP LEAD SCREENING WORKSHEET

About this Tool

The CHAP Lead Screening Worksheet is intended to guide grantees through the lead-based paint inspection process to ensure compliance with the rule. CHAP staff can use this worksheet to document any exemptions that may apply, whether any potential hazards have been identified, and if safe work practices and clearance are required and used. A copy of the completed worksheet along with any additional documentation should be kept in each program participant's case file. Please see the CHAP Lead-Based Paint Requirements Summary for additional information.

Instructions

To prevent lead-poisoning in young children, CHAP grantees must comply with the Lead-Based Paint Poisoning Prevention Act of 1973 and its applicable regulations found at 24 CFR 35, Parts A, B, M, and R. Under certain circumstances, a visual assessment of the unit is not required. This screening worksheet will help program staff determine whether a unit is subject to a visual assessment, and if so, how to proceed. A copy of the completed worksheet along with any related documentation should be kept in each program participant's file.

Note: ALL pre-1978 properties are subject to the disclosure requirements outlined in 24 CFR 35, Part A, regardless of whether they are exempt from the visual assessment requirements.

	Basic Information	
Name of Participant		
Address		Unit Number
City	State Zip	p
CHAP Program Staff		

Part 1: Determine Whether the Unit is Subject to a Visual Assessment

If the answer to one or both of the following questions is 'no,' a visual assessment is not triggered for this unit and no further action is required at this time. Place this screening worksheet and related documentation in the program participant's file.

pro	ogram staff should continue to Part 2.				
1.	Was the leased property constructed before 1978? Yes No				
2.	Will a child under the age of six be living in the unit occupied by the household receiving CHAP assistance?				
Pa	Part 2: Document Additional Exemptions				
rec	he answer to any of the following questions is 'yes,' the property is exempt from .the visual assessment quirement and no further action is needed at this point. Place this screening sheet and supporting cumentation for each exemption in the program participant's file.				
	he answer to all of these questions is 'no,' then continue to Part 3 to determine whether deteriorated nt is present.				
1.	Is it a zero-bedroom or SRO-sized unit? Yes No				
2.	Has X-ray or laboratory testing of all painted surfaces by certified personnel been conducted in accordance with HUD regulations and the unit is officially certified to not contain, lead-based paint? Yes No				
3.	Has this property had all lead-based paint identified and removed in accordance with HUD regulations?				
4.	Is the client receiving Federal assistance from another program, where the unit has already undergone (and passed) a visual assessment within the past 12 months (e.g., if the client has a Section 8 voucher and is receiving CHAP assistance for a security deposit or arrears)? Yes (Obtain documentation for the case file.)				
5.	Does the property meet any of the other exemptions described in 24 CFR Part 35.115(a)? Yes No				
	Please describe the exemption and provide appropriate documentation of the exemption.				
6.	Will a child under the age of six be living in the unit occupied by the household receiving CHAP assistance? Yes No				

If the answer to both of these questions is 'yes,' then a visual assessment is triggered for this unit and

Part 2: Document Additional Exemptions

If the answer to any of the following questions is 'yes,' the property is exempt from the visual assessment requirement and no further action is needed at this point. Place this screening sheet and supporting documentation for each exemption in the program participant's file.

pu.	int is present.			
1.	Is it a zero-bedroom or SRO-sized unit?			
2.	Has X-ray or laboratory testing of all painted surfaces by certified personnel been conducted in accordance with HUD regulations and the unit is officially certified to not contain lead-based paint? Yes No			
3.	Has this property had all lead-based paint identified and removed in accordance with HUD regulations? Yes No			
4.	Is the client receiving Federal assistance from another program, where the unit has already undergone (and passed) a visual assessment within the past 12 months (e.g., if the client has a Section 8 voucher and is receiving CHAP assistance for a security deposit or arrears)? Yes (Obtain documentation for the case file.)			
5.	Does the property meet any of the other exemptions described in 24 CFR Part 35.115(a)? Yes No			
	Please describe the exemption and provide appropriate documentation of the exemption.			
Pai	rt 3: Determine the Presence of Deteriorated Paint			
cor	determine whether there are any identified problems with paint surfaces, program staff should nduct a visual assessment prior to providing CHAP financial assistance to the unit as outlined in the

If rec pai	rp://www.hud.gov/offices/leadltraining/visualassessmentlhOO10l.htm no problems with paint surfaces are identified during the visual assessment, then no further action is quired at this time. Place this screening sheet and certification form (Attachment A) in the program rticipant's file. In problems with paint surfaces are identified during the visual assessment, then continue to rt 4 to determine whether safe work practices and clearance are required.			

If the answer to all of these questions is 'no,' then continue to Part J to determine whether deteriorated

Part 4: Document the Level of Identified Problems

All deteriorated paint identified during the visual assessment must be repaired prior to clearing the unit for assistance. However, if the area of paint to be stabilized exceeds the de minimus levels (defined below),

the use of lead safe work practices and clearance is required.

If deteriorating paint exists but the area of paint to be stabilized does not exceed these levels, then the paint must be repaired prior to clearing the unit for assistance, but safe work practices and clearance are not required.

1.	Does the area of paint to be stabilized exceed any of the de minimus levels below?
	• 20 square feet on exterior surfaces?
	• 2 square feet in any one interior room or space?
	• 10 percent of the total surface area on an interior or exterior component with a small surface area, like window sills, baseboards, and trim?
	any of the above are 'yes,' then safe work practices and clearance are required prior to clearing the it for assistance.
Paı	rt 5: Confirm All Identified Deteriorated Paint Has Been Stabilized
dui de are	ogram staff should work with property owners/managers to ensure that all deteriorated paint identified ring the visual assessment has been stabilized. If the area of paint to be stabilized does not exceed the minimus level, safe work practices and a clearance exam are not required (though safe work practices a always recommended). In these cases, the CHAP program staff should confirm that the identified teriorated paint has been repaired by conducting a follow-up assessment.
cle pro sar	the area of paint to be stabilized exceeds the de minimus level, program staff should ensure that the arance inspection is conducted by an independent certified lead professional. A certified lead professional may go by various titles, including a certified paint inspector, risk assessor, or mpling/clearance technician. Note, the clearance inspection cannot be conducted by the same firm that repairing the deteriorated paint.
1.	Has a follow-up visual assessment of the unit been conducted?
2.	Have all identified problems with the paint surfaces been repaired? Yes No
3.	Were all identified problems with paint surfaces repaired using safe work practices? Yes No Not Applicable – The area of paint to be stabilized did not exceed the de minimus levels.
4.	Was a clearance exam conducted by an independent, certified lead professional? Yes No Not Applicable – The area of paint to be stabilized did not exceed the de minimus levels.
5.	Did the unit pass the clearance exam? Yes No Not Applicable – The area of paint to be stabilized did not exceed the de minimus levels.

Note: A copy of the clearance report should be placed in the program participant's file.
