Proposal Abstract

Pinellas County desires to implement a new computer-aided dispatch system to ensure the dispatch of an appropriate emergency response to telephone calls placed to 911. Many of the computer-aided dispatch and record management systems currently in use throughout Pinellas County have reached or are rapidly approaching the end of their useful life. Pinellas County operates the County's Primary 911 Public Safety Answering Point (PSAP) and is responsible for 911 call-taking and dispatch for all Pinellas County fire departments and emergency medical service (EMS) first responders throughout Pinellas County, Florida, from the PRIMARY PSAP. The Pinellas County Sheriff's Office provides primary law enforcement dispatch service for unincorporated Pinellas County and nineteen of

Pinellas County's twenty-four cities; and each of the Parties are Public Agencies authorized to provide law enforcement dispatch emergency response services within its respective jurisdiction. The City of St. Petersburg, City of Clearwater, City of Largo, City of Pinellas Park, and City of Tarpon Springs provide the primary law enforcement dispatch service for their respective jurisdictions, and each operates a Secondary PSAP. The Parties executed a Memorandum of Understanding which establishes an advisory body, Pinellas Regional Information Management Enterprise (PRIME) to oversee the project. PRIME's goal is to integrate the various information systems used by emergency response agencies throughout Pinellas County, Florida through advanced integrated technology and standardized reporting methods. This will make the dispatch system more efficient and provide a "seamless handoff" when information is passed from one agency to another after residents call 911. Additional benefits of shared data through a common records management system include increasing the efficiency of solving crimes, identifying trends in criminal activity, and forecasting workforce staffing levels for law enforcement.

DUPLICATION OF FUNDING

Instructions: Applicants are required to disclose whether they have pending applications for federally funded assistance or active federal awards that support the same or similar activities or services for which funding is being requested under this application. Be advised that as a general rule, COPS Office funding may not be used for the same item or service funded through another funding source. However, leveraging multiple funding sources in a complementary manner to implement comprehensive programs or projects is encouraged and is not seen as inappropriate. To aid the COPS Office in the prevention of awarding potentially duplicative funding, please indicate whether your agency has a pending application or an active award with any other federal funding source (e.g., direct federal funding or indirect federal funding through state sub-awarded federal funds) which supports the same or similar activities or services as being proposed in this COPS Office application.

5. Do you have any current, active non-COPS Office award with any other federal funding source (e.g., direct federal funding or indirect federal funding through state subawarded federal funds) that supports the same or similar activities or services as being proposed in this COPS Office application?

No

5a. If Yes, for each potentially duplicative non-COPS Office award, provide the following detailed information: name of federal awarding agency, or state agency for subawarded federal funding; award number; program name; award start and end dates; award amount; and description of how this project differs from the application for COPS office funding.

6. Do you have any pending non-COPS Office grant applications with any other federal funding source (e.g., direct federal funding or indirect federal funding through state subawarded federal funds) that support the same or similar activities or services as being proposed in this COPS Office application?

No

6a. If Yes, for each potentially duplicative non-COPS Office grant application, provide the following detailed information: application number (if known); program name; project length; total requested amount; items requested; and describe how this project differs from the application for COPS Office funding.

CAD & GIS Data and Integration Project is a software project to develop improved data management tools and real-time traffic routing specific to emergency response needs to improve operational awareness and expand current routing functionality. Normalize data across many of the County local municipalities and support a data collaborative to improve 911 and law enforcement access to critical spatial data. These would correspond to integrate to get parcels and streets. This is a separate project that the County's Business Technology department is implementing utilizing American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) in the amount of \$900,000. The projected length of project is 9 months. It is different than this COPS funded project in that it is only intended to integrate the new CAD system with the County's GIS system. It is not implementing any component of the new CAD system itself.

NEED FOR FEDERAL ASSISTANCE

10. All applicants are required to explain their inability to address the need for this award without federal assistance. Please do so in the space below. [Please limit your response to a maximum of 250 words.]

The total projected cost of this project is approximately \$15,750,000 (\$15.75M). This includes other associated costs, such as the operating costs for PRIME (the advisory board established to implement and oversee the project). The County is contributing \$9.3M of these costs, and the various user agencies are also each contributing a portion, for a total of approximately \$14.0M. This COPS funding will bridge the gap needed for this very large and crucial project.

PROPOSED TECHNOLOGY AND EQUIPMENT PROJECT

12. Please describe the crime problem(s) that will be addressed with this grant and provide relevant facts or data to show the nature, prevalence, and severity of the problem. Applicants must clearly describe why this project is necessary to fulfill a specific public safety need, how the project will help agencies reorient their mission toward community-oriented policing or enhance their involvement or commitment to community policing, and how this project is responsive to the solicitation. [Limit your response to a maximum of 500 words.]

The replacement of the existing independent computer-aided dispatch and records management systems with advanced technology adhering to national data standards is a crucial priority to all Emergency First Responder Agencies in recognizing that immediate response of first responders is an essential component of effective public safety, and that seconds matter in response to a call for help involving an active and imminent threat to life or great bodily harm. Benefits of a shared common computer-aided dispatch system includes increasing efficiency in workflow, reducing repetition of data entry, and saving time in an emergency, which could save lives. This will make the dispatch system more efficient and provide a "seamless handoff" when information is passed from one agency to another after residents call 911. Additional benefits of shared data through a common records management system include increasing the efficiency of solving crimes, identifying trends in criminal activity, and forecasting workforce staffing levels for law enforcement.

13. Define the goal and objectives that you are ultimately trying to accomplish through this grant and how the proposed project would fit into an overall effort to address the problems identified above. [Limit your response to a maximum of 500 words.]

1) Provide a common platform for deployment of all Public Safety response resources from a Countywide perspective; (2) Standardize the call entry process for all inbound 911 related events; and (3) Provide a standard basis for conducting data (crime and other) analysis for planning purposes.

14. How will you ensure effective implementation of the project? Applicants must identify any applicable governmental and community initiatives which complement or will be coordinated with the proposed project. Include a detailed timeline with key activities and milestones to take place within the life of the grant. [Limit your response to a maximum of 500 words.]

Implementation will include focused review on the specific project. Timelines and project plans are still being developed as this project as of this application period is still being finalized, however the projected timeline for the implementation is two years.

The following is the COPS Office definition of community policing that emphasizes the primary components of community partnerships, organizational transformation, and problem solving. Community policing is a philosophy that promotes organizational strategies that support the systematic use of partnerships and problem solving techniques to proactively address the immediate conditions that give rise to public safety issues, such as crime, social disorder, and fear of crime.

15. Please provide information on the proposed community policing activities, including partnerships, organizational transformation, and problem solving, that will be implemented or enhanced as a result of grant funding for this project. [Limit your response to a maximum of 500 words.]

Funding for this project will be used to consolidate all first responders to one computer aided dispatch (CAD) system. This has already resulted in a partnership between all Pinellas County law enforcement, emergency medical services and fire department agencies to properly govern the implementation and operation of the new system. Specific partner agencies include: Unincorporated Pinellas County, The City of Clearwater, the City of Largo, the City of Pinellas Park, the City of St. Petersburg, the City of Tarpon Springs and the Pinellas County Sheriff. All of these parties entered into a Memorandum of Understanding to establish a temporary advisory body in order to create the Pinellas Regional Information Management Enterprise (PRIME). PRIME has been created to help manage this new system and will be bound by an interlocal agreement between the listed parties, in addition to the independent fire districts in Pinellas County. This collaboration will be transformational for all organizations involved and will improve the data sharing and problem solving throughout Pinellas County.

16. Please address any applicable consultation with community groups and appropriate private and public agencies in the implementation of the proposed project. [Limit your response to a maximum of 500 words.]

To implement a collaborative effort such as this, leadership consulted frequently with other involved public agencies. Pinellas County, The City of Clearwater, the City of Largo, the City of Pinellas Park, the City of St. Petersburg, the City of Tarpon Springs and the Pinellas County Sheriff. all signed a Memorandum of Understanding (MOU) to ensure all parties would have a voice for the proposed project. During the request for proposal evaluation, all associated parties were invited to participate in product demonstrations at the Pinellas County Sheriff's Office. These demonstrations allowed stakeholders to see each product and meet each vendor. They also allowed unlimited questions so the partners could properly evaluate the vendors that were competing for the proposed project.

17. Please describe to what extent there is community support in your jurisdiction for implementing the proposed award activities. [Limit your response to a maximum of 500 words.]

The Pinellas County Fire Chiefs Association, Pinellas County EMS Advisory Council, and the Pinellas Police Standards Council all wrote letters to their U.S. Congress representatives in support of this project.

18. Please describe to what extent the award activities will impact the other components of the criminal justice system in your jurisdiction. [Limit your response to a maximum of 500 words.]

This award will help with the implementation of a singular computer aided dispatch (CAD) system in Pinellas County. This award will also help with the implementation of a singular records management system (RMS) which will have a dramatic impact on the criminal justice system within Pinellas County. Having a similar records management system will simplify the criminal justice system by creating a unified reporting system for other stakeholders in the system. These stakeholders, which include the Sixth Judicial Court, the State's Attorney's office, the Public Defender's office, and the clerk of the court will all benefit from a uniform reporting system. The ability to use and manage consistent data throughout the criminal justice system will reduce errors and create a much more efficient and effective way for information to flow through the criminal justice system for the jurisdiction.

Indirect Costs

Instructions

Indirect costs are allowed only if: a) the applicant has a current, federally approved indirect cost rate; or b) the applicant is eligible to use and elects to use the "de minimis" indirect cost rate described in 2 C.F.R. 200.414(f). (See paragraph D.1.b. in Appendix VII to Part 200—States and Local Government and Indian Tribe Indirect Cost Proposals for a description of entities that may not elect to use the "de minimis" rate.) An applicant with a current, federally approved indirect cost rate must attach a copy of the rate approval, (a fully-executed, negotiated agreement). If the applicant does not have an approved rate, one can be requested by contacting the applicant's cognizant Federal agency, which will review all documentation and approve a rate for the

applicant organization, or if the applicant's accounting system permits, costs may be allocated in the direct costs categories. (Applicant Indian tribal governments, in particular, should review Appendix VII to Part 200—States and Local Government and Indian Tribe Indirect Cost Proposals regarding submission and documentation of indirect cost proposals.) All requested information must be included in the budget detail worksheet and budget narrative. In order to use the "de minimis" indirect rate an applicant would need to attach written documentation to the application that advises DOJ of both the applicant's eligibility (to use the "de minimis" rate) and its election. If the applicant elects the de minimis method, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. In addition, if this method is chosen then it must be used consistently for all federal awards until such time as the applicant entity chooses to negotiate a federally approved indirect cost rate.
