Description & Comments

(What is it, any issues found, is there a financial impact to current/next FY, does this contract vary from previous FY, etc.)

Approval of the ranking of firms and agreement with GPI Geospatial, Inc. (GPI), for photogrammetric and digital aerial mapping professional services.

This contract provides photogrammetric and digital aerial mapping professional services on an annual as-needed basis for land records management, property appraisals, infrastructure management, engineering pre-design, map production, GIS activities, and land and environmental analysis.

This competitive process was solicited via the Consultant Competitive Negotiation Act 287.055 of Florida Statutes. This agreement with GPI includes Small Business Enterprise firm, Hyatt Survey Services, Inc. This contract replaces the current contract currently held by Pictometry International Corp.

The total not-to-exceed amount, including optional services, increases the total contract by \$387,396.00 or 27.4% (or \$77,479 annually). The base aerial acquisition services are \$250,000 (higher than budgeted \$230,000). The rest of the increase are additional services in case Utilities, PW or any other engineering department chooses to use. The funding for these services will come from the department's operating budgets. The BTS Department didn't anticipate this high of an increase, but inflationary increases, together with an increased jet fuel led to the \$ increase.

The funding is available and included in FY24 Adopted Budget in the amount of \$230,000 within Business Technology Services Fund, BTS GIS Enterprise Geographical Services cost center. In FY24 the contract increase will be offset by the lower than anticipated cost for the LIDAR acquisition project.
