This declaration needs to be cancelled...there is a great deal of information from top scientists, doctors, and viral specialists that the Covid tests create false positives. Thus those who are asymptomatic don't actually carry enough viral load to be able to spread it. There is evidence that the actual death statistic is far less than the mainstream media reports. We need our city to be open and start economic recovery. Let those at risk isolate themselves, wear masks and gloves. And do not require masks on children.

The local state of emergency needs to end. Businesses need to be able to open and service people so that folks can make a living. We are allowed to swim at the beach without a life guard and do so at our own risk. The risk of getting covid and actually dying are so low that it does not warrant this state of emergency to continue. It is doing more harm than good. In the commission you are still getting paid but many people are struggling. Those who are so immune compromised can stay home and let the rest of us get on with life. You are harming more people then you are helping. The long term effects on our society far outweigh the potential of some to get ill and even less to die from this.
