Hello

I am a resident with opposition to the 9 docks at 1028 Sunset Point. Summarizing...

- These docks don't conform to properties with docks WITHIN this estuary, one of the permit requirements the city Community Development Board simply ignored
- More boating launched within the east side of the bridge will invite much additional traffic inside the delicate estuary
- And will threaten mangroves which had been planted in a multi million dollar dredging effort to improve the creeks health and navigation
- More fast boating will threaten manatee, and all wildlife critical to maintain the estuary's health— in spite of signage as it is not enforced
- and MOREOVER, if successful these docks will set a BAD precedent. The SERENA highrise on Edgewater advertises multiple docks adjacent to 1028 Sunset Pt. and sold with the assumption they will exist. Surely they will, or are applying for THEIR docks
- The Creek cannot support the potential of 20 additional boat props scaring of the bottom & mangrove areas on the "sandbars" in this extremely shallow body, thereby never allowing it to heal and support life

Please at a minimum, acknowledge receipt .

Thank you for your consideration.
