

January 1, 2024

To: NOAA Office for Coastal Management

Project name: Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub

Subject: NOAA Climate Resilience Regional Challenge (2023)

To whom it may concern:

The Lealman Community Association understands that Pinellas County Public Works is applying for grant funding through the NOAA Climate Resilience Regional Challenge Program for the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project. This grant investment will fund a transformative project that will restore Joe's Creek in accordance with the County's resilience vision.

This project provides a unique opportunity to address both physical and community resilience in an underserved portion of the County. The project will include restoration of Joe's Creek channel to reduce coastal climate risk, build the greenway trail to provide urban greenspace to mitigate heat island effects and improve air quality and mental health through recreation; increase connectivity to jobs and public transit; enhance the LEX resilience hub by increasing sheltering capacity and provide workforce development training that will help grow the workforce to become climate resilient. The multiple initiatives of this project will work in concert with each other to achieve a more resilient Joe's Creek and Pinellas County community.

The collaborative nature of this project through its multiple components will promote community engagement and involvement in the project and will foster long-term community resilience.

The Lealman Community Association believes Pinellas County's use of this grant funding will achieve resilience in this coastal region while promoting regional collaboration, equity and enduring capacity. We encourage NOAA to approve Pinellas County's application to fund the Joe's Creek Restoration project.

Sincerely,

The Lealman Community Association Board of Directors

Re: NOAA Climate Resilience Regional Challenge Program

Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub - Support Letter

Dear Ms. Levy:

As part of our Local Department of Transportation District Seven (FDOT-D7) Planning Office, which includes Pinellas County as a key local County Government within the D7 boundary, we are writing in support of approving Pinellas County's application to the NOAA Climate Resilience Regional Challenge Program for the **Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project**. This regional infrastructure project includes a regional multi-modal trail, channel restoration to improve resiliency, while supporting economic opportunity and redevelopment in a lower income community.

In 2017, a joint-effort trail alignment study for the Joe's Creek Greenway Trail was completed, which identified the Joe's Creek Channel corridor as the recommended route for the proposed regional trail. The trail-study was a joint-funded effort amongst Forward Pinellas, Florida Department of Health, Pinellas County, and other local community partners, including:

- Forward Pinellas
- Tampa Bay Regional Planning Council
- Lealman Community Redevelopment Agency (CRA)
- Southwest Florida Water Management District (SWFWMD)
- Town of Kenneth City
- City of Pinellas Park
- City of St Petersburg
- Police Athletic League
- Florida Dream Center
- Pinellas County Economic Developments

The **Joe's Creek Greenway Trail and Channel Restoration** project will bring forth multi-dimensional benefits much needed to transform the underserved LMI communities along Joe's Creek Channel, in terms of:

- **Safety** (multi-modal trail provides safe and affordable access links to public transit and to work / businesses/ public recreational amenities)
- **Environmental Sustainability** (improve regional resiliency through flood reduction, enhance natural habitats and surface water quality, and air pollution reduction from vehicular emissions)
- **Quality of Life** (using enhanced trail & channel corridor design elements, to promote quality of life and provide beautified recreational amenities)

- **Economic Equity / Competitiveness** (incentivize economic redevelopments in low-moderate income (LMI) communities along project corridor and create jobs)
- **State of Good Repair** (significantly reduce maintenance costs on repair major channel erosion, flooding damage, roadway repaving maintenance, and vehicular repairs)
- **Innovation** (utilizing green infrastructure (GI) engineering technologies to stabilize channel embankment to avoid repeated erosion and improve drainage capacity)
- **Partnership** (multi-jurisdictional project supports received from local / state agencies, and local municipalities within the Joe's Creek Watershed)

Multimodal Infrastructure: The **Joe's Creek Greenway - Trail** component will provide safe and affordable access for residents in the underserved Lealman community to the Joe's Creek Greenway Park, the Lealman Exchange, and businesses along 54th Avenue North and 34th Street (US 19), as well as connecting regionally to the Pinellas Trail (soon to become a 75-mile loop around the county) and to future bicycle/pedestrian facilities in the adjacent cities of Kenneth City and St. Petersburg. The trail will provide direct access to transit service operated by the Pinellas Suncoast Transit Authority (PSTA) and will create a well-connected network of walking and bicycling facilities in this area of south-central Pinellas County. The area has a high percentage (about 25 percent) of households with incomes below the poverty level and without vehicles available. Many residents are separated from destinations by high-speed, high-volume roadways slicing through the Lealman community and need safer mobility options.

Resiliency: The **Joe's Creek Greenway - Channel Restoration** component will provide flood reduction benefits, creek bank stabilization utilizing green infrastructure (GI) innovative technologies, surface water quality improvements, natural habitats enhancements, erosion control, and removal of invasive/exotic plant species. The reshaping and stabilization of the Joe's Creek main channel will improve regional resiliency capacity against sea level rise and flooding concerns within *Joe's Creek Watershed*, by improving channel capacity and restoring Joe's Creek Channel's original design flowline elevation from early 1900's.

Equity: The **Joe's Creek Greenway** project corridor is bordered by under-served low to medium income (LMI) communities with very limited transportation modes. The Joe's Creek Greenway project will provide an economic catalyst to support desired redevelopment and affordable housing in the low-income area and connect the LMI-households to available public transit amenities and other points of service locations like schools, parks, and public service agencies. The proposed world-class trail amenity will also improve the Quality of Life for all surrounding LMI residents. Additionally, this project will enhance the Lealman Exchange Resilience Hub by increasing sheltering capacity and provide workforce development training that will help grow the workforce to become climate resilient.

The Advantage Pinellas 2045 Long Range Transportation Plan and Active Transportation Plan place a priority on completing the Joe's Creek Greenway Trail. Reflecting the important issues of economic opportunity, public health, community redevelopment, environmental quality, and sustainability, we ask your support for this wise investment in public dollars that will leverage other public and private resources and contribute to a stronger community.

Sincerely,

Abdul Waris

FDOT D7

District Drainage Design Engineer

Subject: **Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project**

Dear Reviewers,

The St. Petersburg Innovation District would like to share our support for the **Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project**. This important endeavor is being submitted to the NOAA Climate Resilience Regional Challenge Program by Pinellas County Public Works. The grant investment will fund a transformative project that will restore Joe's Creek in accordance with the County's resilience vision. This project provides a unique opportunity to address both physical and community resilience in an underserved portion of the County. The project will include restoration of Joe's Creek channel to reduce coastal climate risk; build the greenway trail to provide urban greenspace to mitigate heat island effects and improve air quality and mental health through recreation; increase connectivity to jobs and public transit; enhance the LEX resilience hub by increasing sheltering capacity and provide workforce development training that will help grow the workforce to become climate resilient. The multiple initiatives of this project will work in concert with each other to achieve a more resilient Joe's Creek and Pinellas County community.

The Innovation District is particularly supportive of the collaborative nature of this project to promote community engagement and involvement, and foster long-term community resilience. This approach aligns well to the work of the Innovation District's Maritime and Defense Technology Hub, a shared space for maritime technology firms, as well as the Ocean Team, a premier maritime consortium in the Southeast. Our 50+ members have first-hand experience and expertise that comes from living and working directly on the coast, and through their efforts at leading organizations in the marine science/oceanography, life science, and technology sectors. We have committed our network to support this important effort.

The Innovation District believes Pinellas County's use of this grant funding will achieve resilience in this coastal region while promoting regional collaboration, equity, and enduring capacity. We encourage NOAA to approve Pinellas County's application to fund the Joe's Creek Restoration project.

Sincerely,

A handwritten signature in cursive script, appearing to read "Alison Barlow".

Re: NOAA Climate Resilience Regional Challenge Program

Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub - Support Letter

Dear Ms. Levy:

We are writing in support of approving Pinellas County's application to the NOAA Climate Resilience Regional Challenge Program for the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project. The Pinellas County Department of Economic Development is pleased to continue to collaborate with Pinellas County Public Works on this worthy project. This regional infrastructure project includes a regional multi-modal trail, channel restoration to improve resiliency, while supporting economic opportunity through the enticement of redevelopment in a lower income community and an existing industrial park.

The 2017 Joe's Creek Greenway Trail Alignment Study proposed alignment of a regional trail along the Joe's Creek corridor to provide connectivity from the Raymond H Neri Park to the countywide Pinellas Trail network and St. Petersburg's future 71st St North Trail. The Advantage Pinellas 2045 Long Range Transportation Plan and Active Transportation Plan place a priority on completing the Joe's Creek Greenway Trail, to complete regional trail loop connectivity.

The 2016 Joe's Creek Watershed Management Plan and the 2018 Joe's Creek Channel 1 Bank Restoration study contain recommendations to improve flood protection, water quality, and resiliency through improvements such as channel and culvert improvements and implementation of green infrastructure. As part of this Plan, Economic Development provided an in-house evaluation of the Joe's Creek Industrial Park that is located within the Lealman CRA and the Plan area, home to approximately 90 businesses that employ nearly 1,110 workers. The proposed multi-modal trail, channel improvements, stormwater best management practices, community placemaking and workforce development are expected to attract redevelopment in the Lealman CRA and will support the community on a regional level.

The Pinellas County Department of Economic Development is pleased to collaborate with Pinellas County Public Works on the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub

Re: NOAA Climate Resilience Regional Challenge Program

Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub

Dear Ms. Levy:

As a local municipality partner of Pinellas County, we are writing this Letter of Support for Pinellas County's grant application to the NOAA Climate Resilience Regional Challenge Program for the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project. The City of Pinellas Park is pleased to collaborate with Pinellas County Public Works on this worthy project. This regional infrastructure project includes a regional multi-modal trail, channel restoration to improve resiliency, while supporting economic opportunity and redevelopment in a lower income community.

The City of Pinellas Park partnered with Pinellas County and the Southwest Florida Water Management District to jointly develop the watershed master plan for Joe's Creek. We fully support Pinellas County as they pursue implementing the plan helping to reduce the threats, we are all facing threats from flooding and other hazards, and we appreciate the County Government seeking this funding to improve the resiliency in the Joe's Creek Watershed.

This regional project is identified by the watershed management plan for watershed-wide flood protection, erosion control, and water quality improvements using green infrastructure (GI) concepts to minimize flood risk, improve regional resiliency, and help catalyze redevelopment in the Pinellas Park Community Redevelopment Area (CRA) and other low-moderate-income (LMI) areas of the watershed. These efforts are highly interdependent and will benefit from a coordinated project approach. Our mission aligns with this transformative project that will improve the quality of life of residents and we welcome the opportunity to provide resources and decision-making for the various aspects of this project.

If you have any questions, please do not hesitate to contact me at (727) 369-0697. We look forward to working with you on this important project.

Bart Diebold

City Manager

City of Pinellas Park

Re: NOAA Climate Resilience Regional Challenge Program

Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub - Support Letter

Dear Ms. Levy:

As executive director of Forward Pinellas, which serves as the countywide planning council and the metropolitan planning organization (MPO) for Pinellas County, I am writing in support of approving Pinellas County's application to the NOAA Climate Resilience Regional Challenge Program for **the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project**.

This is an important Triple Bottom Line project for Pinellas County that will provide a regional multi-modal trail facility, protect the environment, and improve resiliency, while supporting economic opportunity and redevelopment in a lower income community. In 2017, our agency completed an alignment study for the Joe's Creek Greenway Trail with funding from the Florida Department of Health and support from Pinellas County and community partners. The 2017 Joe's Creek Greenway Trail Alignment Study proposed alignment of a regional trail along the Joe's Creek corridor to provide connectivity from the Raymond H Neri Park to the countywide Pinellas Trail network and St. Petersburg's future 71st St. North Trail. The Advantage Pinellas 2045 Long Range Transportation Plan and Active Transportation Plan place a priority on completing the Joe's Creek Greenway Trail.

As for the drainage component, the 2016 Joe's Creek Watershed Management Plan (WMP) and the 2018 Joe's Creek Channel 1 Bank Restoration study contain recommendations to improve flood protection, water quality, and resiliency through improvements such as channel and culvert improvements and

implementation of green infrastructure (GI). The proposed multi-modal trail, channel improvements, and stormwater best management practices (BMPs) are expected to incentivize redevelopment in the Lealman Community Redevelopment Area and complement adopted land use and redevelopment policies established through Forward Pinellas' Target Employment and Industrial Lands Study (TEILS) update, completed in 2023.

The project will provide safe and affordable access for residents in the underserved Lealman community to the Joe's Creek Greenway Park, the Lealman Exchange, and businesses along 54th Avenue North and 34th Street (US 19), as well as connecting regionally to the Pinellas Trail (soon to become a 75-mile loop around the county) and to future bicycle/pedestrian facilities in the adjacent cities of Kenneth City and St. Petersburg. The trail will provide direct access to transit service operated by the Pinellas Suncoast Transit Authority (PSTA) and will create a well-connected network of walking and bicycling facilities in this area of south-central Pinellas County. The area has a high percentage (about 25 percent) of households with incomes below the poverty level and without vehicles available. Many residents are separated from destinations by high-speed, high-volume roadways slicing through the Lealman community and need safer mobility options.

Reflecting the important issues of economic opportunity, public health, community redevelopment, environmental quality, and sustainability, Forward Pinellas is pleased to collaborate with Pinellas County Public Works on this worthy project. Forward Pinellas will serve as a collaborator by reviewing materials, engaging with stakeholders, and undertaking complementary planning and project development activities.

Sincerely,

Re: NOAA Climate Resilience Regional Challenge Program Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub

Dear Ms. Levy,

I am writing in support of Pinellas County's application to the NOAA Climate Resilience Regional Challenge Program for the Joe's Creek Restoration and Greenway Trail and Lealman Exchange Resilience Hub project.

According to Pinellas County, the project involves the design and construction of a regional trail for multi-modal transportation connectivity and channel restoration of Joe's Creek to improve resiliency and habitat restoration. Pinellas County shared with my office that this project would promote workforce development and economic redevelopment in a low-income community along the project corridor by creating jobs and improving quality of life for residents.

Pinellas County believes that this project uniquely addresses all of NOAA's program priorities. Climate risk reduction adaptation actions for this coastal community include mitigating flood risk, stabilizing bank erosion, improving water quality, restoring habitat, combatting urban heat through enhanced greenspace, and increasing sheltering capacity.

For the reasons above, I hope that Pinellas County and its application will be given every consideration.

Sincerely,
