| Total | \$ | 1,457,463 | 943,640 | 100.0000\% | \$ | 1,992,537 | 953,485 | 100.0000\% | \$ | 535,074 | 37\% |

Dollar amounts are based on growth assumptions of 3.5\% in FY17-FY18, 3.0\% in FY19 and 2.5\% in FY20-30.
2016 Population Estimates from University of Florida, Bureau of Economic and Business Research, 10/31/2016. 2004 Population Estimates served as basis of Penny III Distribution among County and Municipalities.

Calculation of the Ordinary Distribution to Eligible County and Municipal Governments (218.62 Florida Statutes):
The allocation factor for each county government is computed by dividing the sum of the county's unincorporated area population plus two-thirds of the county's incorporated area population by the sum of the county's total population plus two-thirds of the county's incorporated area population. Each county's distribution is determined by multiplying the allocation factor by the sales tax monies earmarked for distribution within that county.

The allocation factor for each municipal government is computed by dividing the municipality's total population by the sum of the county's total population plus two-thirds of the county's incorporated population. Each municipality's distribution is determined by multiplying the allocation factor by the sales tax monies earmarked for distribution within its respective county.
