

This Workspace form is one of the forms you need to complete prior to submitting your Application Package. This form can be completed in its entirety offline using Adobe Reader. You can save your form by clicking the "Save" button and see any errors by clicking the "Check For Errors" button. In-progress and completed forms can be uploaded at any time to Grants.gov using the Workspace feature.

When you open a form, required fields are highlighted in yellow with a red border. Optional fields and completed fields are displayed in white. If you enter invalid or incomplete information in a field, you will receive an error message. Additional instructions and FAQs about the Application Package can be found in the Grants.gov Applicants tab.

OPPORTUNITY & PACKAGE DETAILS:

Opportunity Number:	EDA-2018-DISASTER
Opportunity Title:	FY 2018 EDA Disaster Supplemental
Opportunity Package ID:	PKG00240450
CFDA Number:	11.307
CFDA Description:	Economic Adjustment Assistance
Competition ID:	PROPOSAL-CONSTRUCTION
Competition Title:	EDA Proposal Only - Construction
Opening Date:	04/10/2018
Closing Date:	04/10/2022
Agency:	Economic Development Administration
Contact Information:	This Notice of Funding Opportunity (NOFO) is for regions that have received a major disaster designation as a result of Hurricanes Harvey, Irma, and Maria, and of wildfires and other natural disasters occurring in calendar year 2017 only. If you have a project that will be located in one of these disaster-impacted regions declared under the Stafford Act, please contact the appropriate Disaster POC/Regional Environmental Officer listed at www.eda.gov/contact .

ED-900P – Proposal for EDA Assistance

Please answer all questions completely and accurately and provide a concise narrative statement for each of the questions below. Should you choose to submit the information in a separate document, the proposal narrative should be no more than five (5) pages in length. Please refer to the form instructions for additional information on each section. Applicants are encouraged to contact an EDA representative for assistance in preparing this proposal.

I. All Projects

I.A. General Information

Please identify all applicants for this project:

	Name	SAM.gov CAGE Code	SAM.gov Registration Expiration Date
Lead Applicant		4ATJ4	07/25/2018
Co-Applicant 1	STAR-TEC Enterprises, Inc.	6FLK6	12/13/2018

I.A.1. Description of applicant and co-applicants

Pinellas County, Florida is the lead applicant for the proposed project and will design and construct the facility. The Pinellas County Industrial Development Authority, dba Economic Development Authority (PCEDA), a public body corporate created by Pinellas County per Florida Statute F.S. 159.45 will eventually likely be a co-applicant to this proposal. It is the intention of the applicant that the PCEDA will own and maintain the facility. Further co-applicant STAR-TEC Enterprises, Inc., a 501(c)3 non-profit Florida corporation that has been providing incubation services in Pinellas County for 15 years, will operate and manage the incubator. The 2.5-acre site is proposed to be made available for this project at a nominal cost by the City of St. Petersburg.

I.A.2. Description of the region

The City of St. Petersburg is the actual location of the incubator, but is too small to encompass the impacted area. The Applicant believes that the benefits will accrue to Pinellas County and the Tampa Bay region, as the incubator will serve entrepreneurs throughout the counties of the Tampa Bay, but for simplicity the region here is defined as Pinellas County. Pinellas County also is an appropriate region given the strong support the County's government has provided past/current incubation efforts, and will be a major investor in the new incubator. The region's economy has transformed dramatically in recent decades with closure of a major U.S. DOE facility, the Pinellas Plant, and the demise of the construction industry during the Great Recession. Other local, national and international

business trends have led to major job losses, closures and/or relocation of major employers like Transitions Optical, Nielsen, and Professional Surveys of Pinellas. A 2014 study determined that Pinellas County lost over 8,000 primary jobs, during a 12 year period when it needed to gain 29,000 such jobs to maintain a quality economy. In addition to the loss of high quality, high paying jobs, the influx of tourism and retail activity has brought primarily low paying, seasonal positions. The incubator is a critical project for the County to continue to promote and encourage a higher-wage, more diverse and economically resilient economy.

I.A.3. Description of complete EDA project

As described below in section I.A.4, the region had a highly successful business incubator, the Tampa Bay Innovation Center (TBIC), which was located in the former Pinellas Plant facilities and operated by co-applicant STAR-TEC Enterprises, Inc. (STAR-TEC). With the pending sale of the Pinellas Plant facilities, STAR-TEC commissioned a feasibility study to determine if a new incubator elsewhere in the region would be successful. The feasibility study recommended a downtown St. Petersburg location, and subsequently STAR-TEC relocated the TBIC to the campus of St. Petersburg College. Dubbed the Technology and Entrepreneurship Center (TEC Garage), the relocated program includes both incubating and coworking space components. However, the space is far too small to accommodate demand, and also is too small for the incubator to ever achieve financial self-sustainability. Therefore, in partnership with County of Pinellas and City of St. Petersburg, STAR-TEC proposes a newly constructed 40,000 to 50,000 square foot incubation project, funded in part by EDA. This project will be in the newly created Innovation District, in an area of redevelopment and revitalization on the southern edge of downtown St. Petersburg. The incubator is sized to achieve financial self-sustainability within the 3 year timeframe specified by EDA, and is consistent with both the market analysis and financial projections of STAR-TEC's incubator feasibility study. The existing TEC Garage will relocate to and become part of the new incubator.

I.A.4. Need for the project

A major impact of Irma was declines in the size of the labor force and the employed population. Typically, Pinellas County's labor force and employment decrease slightly during the 4th Quarter, but the magnitude was significantly greater in 2017 after Irma when compared with previous years. Irma illustrated two large problems facing the County: its low workforce participate rate and vulnerability to economic shocks. Compared to other large urban counties, Pinellas has a low workforce participation rate and a larger contingent of marginally employed persons. The County has an economy that is greatly influenced by external shocks, in particular, real estate and tourism are two base industries that are volatile and low paying. The incubator will help create a more entrepreneurial, diversified and resilient economy.

While the region has suffered the loss of numerous high quality, high paying jobs, it has seen a surge in entrepreneurial activity and technology-related business development. This was evidenced by the successful development and operations of the TBIC, and the TEC Garage. But despite these incubation successes, the entrepreneurial support of the

region is jeopardized by its incubator transitioning from a financially-self sustaining operation in the former Pinellas Plant, to a undersized operation at St. Petersburg College that cannot continue to operate long term because of its heavy reliance of operating subsidies. It is imperative that the incubator relocate out of the current location into one where it can reach financial self sustainability, and serve the large and growing entrepreneurial population of the region. The incubator feasibility study, completed in 2013, concluded that there is a market for an incubator in the region, in part because of interest by almost 200 market survey respondents in becoming part of the incubator, including 66 potential tenants. The existence of this market, and its interest in a downtown St Petersburg location, are evidenced by the successful operation of the TEC Garage on the College campus, and its continuing 100% occupancy. In less than 4 years since its October 2014 opening, the TEC Garage has received over 900 inquiries from entrepreneurs, and has served approximately 40 clients per year, despite being constrained to a small, 6000 square foot space with limited programming and other resources necessitated by its relocation into its temporary location at St. Petersburg College. Additional developments since the original feasibility study was completed provide evidence for even greater need for the proposed incubator including the development of a 225,000 SF research/education complex by Johns Hopkins All Children's Hospital in downtown St. Petersburg will drive additional entrepreneurial demand from faculty/staff, as well as outside entrepreneurs who are serving and/or leveraging JHACH technology, that will further expand the market demand for the incubator. And the St. Petersburg Chamber of Commerce's Competitive Assessment of the city and region confirmed the city has experienced losses in some higher-wage skills-based sectors, including information technology and manufacturing. But it also noted that entrepreneurship was an excellent economic development opportunity for the City and region: "Positive signs abound in its entrepreneurial economy as an ecosystem builds around a host of key assets and skilled talent is attracted to the walkable and amenity-rich Downtown." This project included a comprehensive public input process, with an online survey available to all regional stakeholders that garnered 1,510 responses. That survey showed strong support for adding to the City and region both acceleration programs (supported by 46% of respondents), and incubation facilities (50%).

I.A.5. Basis of economic distress cited for eligibility

The proposed St Petersburg incubator qualifies under the "Special Need" distress criterion, by a demonstrated loss of over 600 jobs within the past 12 months. Also, the intended location of the incubator is within an area where the unemployment rate and per capita incomes levels are an acute problem. The project location is within Census Tract 121030205.00. This tract has a 12 percent unemployment rate which is 4.6 points above the national rate, and per capita income of \$13,063 or 43.79% of the national per capita income of \$29,829 (Source: STATSAMERICA Distress Tool). Due to these distress levels, this census tract has been designated as a federal Opportunity Zone.

Pinellas County is one of the Florida counties designated under the DR-4337. Hurricane Irma illustrated the County's reliance on industries more easily subject to disruption by natural and/or economic disturbances. The economic adjustment priority is Recovery & Resilience as the incubator

is key to the region's efforts to strengthen its economic resiliency by diversifying and broadening its economic base and strengthening its high-wage industry sectors.

The Tampa Bay CEDS was adopted in August 2017. The proposed incubator is specified in Objective 3- "Invest in small business training and incubators" under Goal 3- "To improve the capacity of small businesses, disadvantaged businesses and businesses within distressed and redeveloping communities to participate fully in Tampa Bay's economic activities."

I.A.6. Description of documentable impact

The Applicant estimates the anticipated economic impacts of the proposed incubator based on data from STAR-TEC (from operating the TBIC and TEC Garage), a business incubation program in nearby Orlando, and the National Business Incubation Association (now known as iNBIA). Using these data, Applicant estimates the economic impacts of the proposed incubator, as shown in Table 1. As indicated there, job created and retained will be approximately 670 positions, and client revenues will be about \$100 million.

Table 1. Economic Impact of TBIC Incubator

	Lowest Estimate	Highest Estimate	Midpoint
Jobs	252	1086	669
Client Revenues	\$30 million	\$171 million	\$101 million

Approximately 75% of the 40,000 to 50,000 square feet of space will be incubator space, which would include conference rooms, reception area and common areas serving the incubator tenants. A maximum of 15,000 square feet would be available as non-incubator space, potentially for an anchor tenant. The incubator space will provide support programs and services such as business mentoring/coaching, idea validation, strategy development, marketing assistance, network opportunities, workforce development, access to capital, access to b-schools and interns, and standard office resources.

I.A.7. Funding and cost share matrix

Applicant estimates project to cost to be \$12 million with 75% of the funding coming from EDA (\$9 million) and 25% of funding from Pinellas County (\$3 million). In addition, the City of St. Petersburg will make the land available on which the incubator will be built.

I.A.8. Description of any known environmental concerns or public controversy

The City has issued a Request for Proposals for the site, which is due on July 30, 2018. Pinellas County will be responding to the RFP and expects to secure the site by the time a full grant application will be due. The City has previously made this site available at a nominal cost for the incubator project. The eastern part of the property is located in Bayboro Harbor Community Redevelopment Area (CRA) and the western part is located in the South St. Petersburg CRA. Both CRAs have established plans and the proposed use of this property is consistent with the CRA plans to encourage expansion and support for job creating and employment oriented uses. The property was rezoned in 2014 which required public hearings and staff analysis of the proposed incubator use. The use was deemed to not have any negative impacts on the roadway level of service, or the City's adopted standards for public services and facilities including schools, potable water, sanitary sewer, solid waste, traffic, mass transit, recreation and stormwater management. The western-most portion of the property has been

identified as a location for a "trailhead" park. It is the intention of the County, City and TBIC to include parking spaces and signage for the trailhead. The property is located within a flood zone and has various drainage and a sanitary sewer easements. Therefore, preliminary design of the incubator calls for an elevated facility, including parking underneath at ground level.

I.A.9. Have you reviewed and considered the federal regulations that govern EDA awards, including EDA's regulations at 13 C.F.R. Chapter III and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 C.F.R. Part 200?

☒ Yes ☐ No

II. Construction Projects and Design and Engineering Only Projects

II.A. Property Requirements

II.A.1. Briefly describe plans for the ownership, operation, maintenance and management of project facilities, including any land, improved land, structures, appurtenances thereto, other improvements or personal property.

The land will be either leased long term or purchased from the City of St. Petersburg. The building will be owned and maintained by Pinellas County, the applicant, through its Industrial Development Authority. The co-applicant, STAR-TEC Enterprises, Inc., a 501(c)3 non-profit with extensive experience in operating incubators in Pinellas County, will operate and manage the property.

II.A.2. Will real property or project facilities to be acquired or improved with the EDA investment assistance be owned, operated, managed or maintained by an entity other than the proponent?

☒ Yes (explain below) ☐ No

Pinellas County, Florida is the lead applicant for the proposed project and will design and construct the facility. Pinellas County has a dependent special district, the Pinellas County Industrial Development Authority, that will own and maintain the facility. STAR-TEC Enterprises Inc. (d/b/a Tampa Bay Innovation Center) is a Florida 501(c)(3) that will operate and manage the incubator.

II.A.3. Is or was any real property connected to the proposed project subject to eminent domain proceedings?

☐ Yes (explain below) ☒ No

II.B. Environmental Requirements

II.B.1. Briefly describe the project site's physical attributes, including a description of any known sensitive environmental areas.

The site of the proposed new St. Petersburg incubator is on the southwest corner of 11th Avenue South and 4th Street South within the city limits of St. Petersburg. This vacant lot consists of about 2.5 acres, is just south

of downtown St. Petersburg, and is in an active redevelopment area. The site is rectangular in shape, and devoid of any significant topographical features. It is crossed by a variety of drainage easements, as well as a sanitary sewer easement, which will require creativity in the architectural and site designs. Google Maps shows Booker Creek to the west and south of the site, but site plans show it to be incorporated into the aforementioned drainage easements. There are no known environmentally sensitive areas on the site.

II.B.2. Attach maps of the project site (such as Google maps or other readily available maps) with project components and beneficiaries clearly indicated.

Innovation District and Sit
