There is no pandemic. There is no CONTAGIOUS virus. Fraud. A COVID-19 virus was never isolated. The Wuhan investigators who reported on correlating this virus with several Wuhan patients never satisfied Koch's nor River's criteria for an infectious agent – not even close. They identified an RNA sequence with 80% homology with SARS in some patients; that is all. Because the causative agent was never isolated and purified, no valid test for COVID-19 exists because there is no way to furnish true positives and generate a Bayesian analysis. In fact, both the antibody and RT-PCR tests being used have no diagnostic value for the aforementioned reason. Also, an antibody test is always plagued by non-specificity. A PCR-based test is completely unsuited and inappropriate for screen testing as a preponderance of false positives is guaranteed. In sum, there is no proof of a COVID-19 as etiology of a supposed viral pandemic and no proof that anyone dies of a COVID-19 virus. These are objective facts. I am a trained MD-PHD scientist with 35 years experience in basic research and clinical practice. This entire so-called pandemic (the purported cases fall orders of magnitude short of what is required to designate a pandemic) is being promulgated by 24/7 reporting by the MSM and supposed case numbers created by fraudulent testing and blatant falsification of death certificates encouraged by the CDC (a private corporation) and incentivized by government reimbursement to hospitals. The 'atypical pneumonia' reportedly a commonality of the deceased could just as readily explained by environmental toxicity (i.e. air pollution, 5G irradiation etc.).
