

Solid Waste

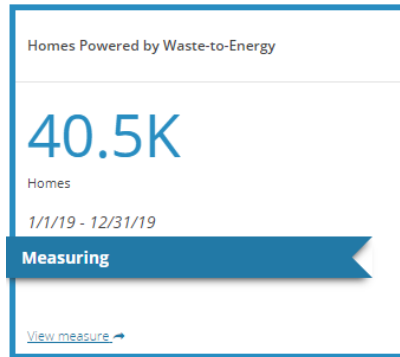

Department Purpose

Pinellas County Solid Waste (SW) provides safe and environmentally sound integrated solid waste services to all citizens of Pinellas County. These services emphasize public awareness and communication that enable citizens to make educated choices concerning responsible management of their solid waste. In support of that mission, SW operates and administers the landfill, the Waste-to-Energy (WTE) plant, household hazardous waste collection, waste reduction and recycling programs, and other solid waste management functions. These responsibilities primarily support the Board of County Commissioners strategic goals to Practice Superior Environmental Stewardship and Deliver First Class Services to the Public and Our Customers.
