In-Person and Virtual Board of County Commissioners Public Hearing  
7/21/2020, 6:00 PM - 8:00 PM (ET)

Amend § 58-444.(2) To include any external entertainment music, especially bass frequencies, to not be perceptible by any person within the walls of another person's home at any time of day.

We are being subjected to 100-watt bass pulses from another property within 100 feet. We sometimes hear the pulse energy inside our home at levels that distract us and impair enjoyment of our property which we have resided at since 1976. We bought a quiet property at the time and expect that modern technology and consumer irresponsibility will not be allowed to impact our lives.
