Mask mandate	I surely hope that on May 11th you will lift the mask mandate. If you look at the county statistics everything is much better. The mask mandate has served its purpose but has also done a great deal of damage. There has been great mental problems which seem to be ignored. There has been suicides which are ignored, the percentage since the mandate have gone up significantly. Covid testing should not even be part of the numbers in that every procedure one gets medically calls for a covid test. That is where it is a tonsilectomy or a vari removal. I personally miss seeing the smiles of the people shopping or the stranger on the street. We really need to get back to being normal. Thank you for your support of Science!	Your consideration in this matter would be greatly apprecised. Dear Commissioners, Linow everyone is tried of wearing masks and are ready to put them away but we're almost there. Pinellas County in the last week hash ad 200 to 250 positive coronavirus cases added to the year's total. That translates into 1 in every 12 people testing positive. What about the people who have never been tested? Thanks to your courage to mandate masks for so long, the numbers aren't higher than they are. Other counties in Florida can't say that. There has also been fever cases of the fu and strep throat which means less antibiotics prescribed, just to name a few benefits. Many residents are being vaccinated, which is wonderful but there are many large gatherings being planned in the coming weeks. The high school graduation season is fast approaching and we don't want another' surge" much like we had after all the sping break vaccinos. If people are passionate about no more masks? Then ICHALLENGE them to go through their personal contact lists and thank everyone who has gotten their vaccinations and help those who have not gotten theirs yet. Keep in mind everyone is 6 and older can get their shor how with vaccination locations does to everyone's home. When our own contact lists hit "herd immunity" of about 90%; it'll be time to put the masks in the drawer for good! Thank you again for supporting the county mask mandatel It has kept us safe and has made a world of difference.		2260 Habersham Dr	Clearwater	33764-3725	7275360634	m4hedrich@juno.com	2021-04-25 14:49:36		
Masks	Please do not be influenced by a few people who are inconvenienced by having to wear masks. The simple truth is that this is what is keeping a lot of us alive even with the vaccines. There are a lot of ignorant people out there, like my conn elipibor who doesn't want the vaccine because she says it will interfere with her DNA, who are free to wander around without protection. It is obvious that mother nature is taking advantage of the situation to clean out the gene pool, and that this is a fine example of natural election, but we should not be put in a position to help it. Nor should we fool ourselves into thinking that everything is now okay. It is far from okay and it is far from over. Taking off a mask is not an act of defiance or Declaration of Freedom. It is an act of subvilly.	Judy Ellis	1874 Juarez Way S	Saint Petersburg	33712	7274601586	jellisS610@gmail.com	2021-04-25 14:45:38		
Mandated Face Masks	Here's a troubling article about a new material that is being used in some face masks. This new material graphene has not been proven safe for use in face masks yet it is being added. This is yet another reason why face masks should not be mandated. If people are harmed by the use of these face masks, who is liable? Where there is risk there must be choice.	Heidi Hilliard Natole		Dunedin	34698		heidi.natole@yahoo.com	2021-04-25 12:29:58

Unemployment	You are the problem. We voted for you in good faith and you stabbed us in the back. While you can pay your mortgage and put food no your table, you are depriving others of doing the same. How do you live with yourself knowing the amount of people who you have put out of business, how do you live with yourself knowing how many people you have taken jobs from. Mask Ordinance	I am in favor of continuing the mask ordinance until the CoVid numbers drop to an acceptable level as recommended by the CDC. I thank the commission for keeping this order in place during the past year to help protect the health of the general public and not being swayed by those who wish to make it a political issue. Immediately	Why do you continue to vote to extend this unnecessary and ineffective ordinance? It continues to significantly bursten and adversely effect the livelihood of all businesses. Reducing their financial viability, straining the local economy and all the while you callously and arrogantly prolong the root cause of these problemsyour government overreach with unconstitutional mandates. Stop pretending you are forcing these ordinances on the public for the greater good, when in fact it is just the opposite along with secretiv covering your actions from possible public backdash and legal action. Additionally your actions now will be remembered during the next election.	Sam	2476 Drew St	Clearwater			sdillon73@yahoo.com	2021-04-24 00:11:29	
	Hi, I've been FOR makes since day 1. Still planning on wearing one. This is not the time to drop this mandate. I know people are over it, So am I. I am fully vaccinated and still believe there is a need, too many people think it's their right of the people who want to stay healthy as well. So basically majority wins. Keep the MASKS ON, please. I am a retired nurse and we the people aren't ready, nowhere near here inmunity. Thank you I will continue to wear my mask.	Diana Reichert				7276673980	direicher1258@yahoo.com	2021-04-23 16:16:58	
	I am asking that you please continue to keep the mask ordinance in place when you meet in May, Phellas County will not in ord cote to achieving the herd immulty needed to discontinue masks with 6% to 7% positivity rates. As a senior with pre existing conditions who has been vaccinated, I realize that I can still infect others or be infected by others if we don't continue to wear masks. I am so appreciative that Phellas has that an ask requirement as I fed that has prevented me from getting. Covid. Although I do not appear before you to speak in favor of masks, my feelings in favor of masking are no less fervent than those who come to speak against it. 	If you review the data, you will see that masks have not made a difference in the corona virus situation. The cases have gone up and down since you initially issued a mask mandate. We all know the definition of insanity is doing the same thing over and over and expecting different results! The mask mandate is insanity. Be honest with yourself and everyone. Truly think about it. I understand you think you are following the "science" and what is recommended by the so-called" theath experts," but they have been wrong since the very beginning. Real world data is more valid than any scientific toudy or lab tests. The real world data is showing you the masks do not have any effect. It was reported that SSN of the people who tested positive for the virus wore masks! I understand and respect that you could recommend wearing a mask, but I respectfully request that you end the mask mandate now.				33785		sdelekys⊜tampabay /r.com	2021-04-23 11:22:36	
	I join others as I again write to encourage you to end this mandatory mask wearing. Although your medical expert quotes others as to the efficacy of face coverings, I'm sure that you recognize that there are a nequal mumber of medical experts taking the position that not only are the mask that are being worn, worthless as to the spread of the virus, but that they are contributing to bad health conditions for many people. Please repeal this bad and outlived ordinance.	Fred Robbins	9511 120th St	Seminole	33772	7277421129	firobbins@tampabay.rr.com	2021-04-23 10:55:41	

Mask Mandate	Briefly, my wife and I were going to celebrate a wedding anniversary today (4/23/21) by enjoying a salibat charter out of Clearwater Marina, this is until we became aware of Pinellis County's *outdoor* mask requirement, so we cancelled our trip, and as It hapens, we how the operator and we how that he's having financial difficulties. Good news in this was we found another charter operator in Pasco County who will now get our business. Prior to covid, we spent more time and money in Pinellis County than we did here in Pasco Countyfor my money you might just as well join with your kindred spirits in Oregon and make the fascist mask mandate permanent as your county is now dead to us. Political Games	Why is your body and Pinelias county schools scheduling meetings on the same days and even at the same hour? You may do as you like but we are NOT going away/We will KKPOSE what is happening all around the country and not stop until you relent. We have so much evidence regrading bacteria and even E coli found on masks and yet you all STILL dig in your heels. You require that small children against their better judgement be forced to wear nasty little petri dishes on their faces and yet we see pictures of MK-Flowers a few days ago mask free. So really MS Flowers you expose yourself as a fighter for rights?? Rights for WHO?? Rights for YOU and YOURS right?? Yet kids who have No Choice must live under your ideology of "Rules for you, NOT for MeI!" The hypocrisy is overwheiming. these children are the ones stuck in the middle.	Since the School Board and BCC communicate, it would seem from the repeating scheduling conflicts that the BCC and PCSB are working together in a divide and conquer technique scheduling meetings around the same day and time. Why heart has been with helping children in schools so they arear thasked 7 hours a day, but from the beginning I knew the focus should be with the BCC because the county mandate would have to end before the schools would end their mandate. Enough with political games, these children are the ones stuck in the middle. Usit a local school and witness a 5 year old behind a mask for yourself. 	make the progress we've made. Now that the vaccine is widely available and anyone who wants it may get								
	it, I believe it is time to rescind the emergency mask mandate. It served it's purpose, and current case leve								
	is a fraction of what it once was. We aren't seeing nearly as many Covid cases in the hospital. You can go a								
	whole shift in the ER now and not see any, and that can happen for a week at a time. While Covid is real								
	and scary, it also isn't going anywhere. The current case level is what we were only dreaming and hoping								
	for when this mandate was put in place, making the mandate no longer necessary. Every adult is eligible								
	for the vaccine now, and should be encouraged to get it. But the masks are no longer necessary. They were a wonderful and necessary intervention that have served their purpose. Reward the citizens who								
	have done their part, working hard and obeying rules, and allow us to make our own decisions moving								
1	forward about if we need to wear a mask or not. People who still wish to mask may do so, but the current	1				1			
	case numbers, case trajectory, and the vaccine prevalence just do not support further required masking in								
	every situation. Lastly, please consider how kids are being affected by this mandate: even though the								
	ordinance is written with exceptions for kids, it is NOT being interpreted that way, and kids are being	1				1			
	made to wear masks even during outdoor activities such as Girl Scouts, sports, etc., as everyone is interpreting the rules differently. While that was just something to deal with when the pandemic was	1				1

	capitalism-privacy-freedom.html								
	The endless variants (dozens) will render the COVID vaccines nearly useless, which means the "vaccine								
	passports" will also be pointless. By the end of this year there's no telling how many variants there will be.								
	Vaccinated people are already getting sick around the country. COVID vaccine are not the "end all, be all"								
	answer and masks are certainly not the answer as evidenced by the latest CDC study deeming cloth masks								
	and neck gaiters to be less than 2% effective (and that's within the margin of error).								
	After Dr. Choe reaches 50% vaccinations in the public, he'll start in with the "variants, knowing full well that not only that this vaccine may be ineffective for future variants, but that those who receive the COVID								
	vaccination could be affected adversely by future COVID strands. For example, the vaccinated are affected								
	8 times more adversely by the South African variant than those who are unvaccinated. (See the		1						
	Washington Examiner article on the Tel Aviv study). I wait with trepidation to see how those vaccinated		1						
	with this fast tracked vaccine react to the other variants. I for one will not be getting a vaccine when I		1			1			
	don't have long term data on the future side effects and you should not be pushing this on the public.								
			1	1		1			
	Dr. Choe is not going to give guidance to unmask the population any time soon and we in the public are								
	full aware of this. Forcing pointless cloth masks is about social control, not protecting against a virus, which		1						
	it does not protect against according to scientific research. Doctors that go against the narrative are								
	blocked, banned and removed from their positions so of course Dr. Choe is pushing masks and will								
	continue to do so. When only one side is represented, I do not consider this "science" but "scientism." Please research guidance from the numerous doctors outside the sphere of power and influence, like the								
	respected doctors in Governor DeSantis' round table discussions. They are not controlled by the narratives								
	of others but by scientific research. I trust science, not scientism and I do not agree with the Board

T\ Thank you for all you do for us, Sincrerely, Julie Hudson Clearwater I request the Commission to direct County agencies to publish the number of wildlife fatalities on County roads. According to Public Works, there were 89 calls this year regarding dead animals on County roads. However, there is no public information available beyond that. Please make publicly available the following information: 1. How many animals are killed on County road scatch year (and YTD). 2. Track and publish individual types of animals, including - Sandhill Crane, deer, gopher tortoises, etc. Especially any species that are listed as endangered, threatened or species of concern by federal or state agencies. 3. Publish the posted speed of the roads on which animals are killed. Making this information publicly accessible will help the public to understand the state of the environment, and how traffic patterns may factor in fatality rates. Thank you for your consideration. This peer reviewed study proves stat masks are not only ineffective but they're actually harmful. We have been continuously bringing this up and you as commissioners have chosen to ignore this. 	I am allergic to masks and have difficulty breathing. Some authorities accept my explanation, some are

	Using common sense, I feel that when a child is born, it is fighting for the first breath. Unobstructed

It's time to rescind county mask requirement	wear a mask. Stop this absurdity and let's move on to other issues. Thank you Even though we often disagree with each other, Americans value freedom. This includes the freedom to make our own health care decisions and freedom to run our businesses according to our principles.	Michael Nieminen	690 Main St, Unit 99	Safety Harbor	34695	7273857693	mnieminen@gto.net	2021-04-17 21:07:39	
	Rescinding the mask ordinance in Pinellas County will NOT instantly stop businesses from enforcing masks. Many businesses will continue to require them. Habits have set in over the past year, and they will take time to unwind. Many customers will continue to prefer businesses that enforce masks, while others will seek out businesses that do not require masks. Let capitalism sort this out!								
	It was never fair to put business owners into the position of bylaw enforcement. You have a chance to make this right on May 11th. Please, let Pinellas County business decide for themselves when and where to require masks and give the residents back their freedom.								
The Wearing of Face Masks	I am writing to ask that the face mask ordinance remain in effect until we have reached, which we hopefully will, herd immunity. I have noticed, as I'm sure you have as well, that the number of cases in the state are rising again.	Patricia F. Borowiec	2604 OAK CIR	Tarpon Springs	34689	7279356319	pfduxbury2@aim.com	2021-04-17 20:59:39	
	Perhaps the sense of comfort alforded by having been vaccinated, has extended to a presumption of immunity from all variants now in circulation, especially in Florida. This, of course, is not true when it comes to the Brazilian strain which the governor is apparently ignorant of since travel between the state and that country is still allowed.								
	Please let us continue to rely upon your level-headed actions, based upon science, which have helped to protect us during this "continued" pandemic in the face of decisions based upon economics and politics rather than public safety concerns.								
	Again, I thank you so much for continuing to take your representative responsibilities to all of the county's citizens and their well-being seriously.								
	Most sincerely, Patricia F. Borowiec

	As the owner of Dunedin Lanes I am writing to ask you to repeal the mask ordinance and the other social distancing requirements effective May 11, 2021. Enforcing the mask requirement has become very challenging with customers being argumentative when we force them to vear one. It is a confrontation we no longer need to have, as the COVID pandemic has been difficult enough. Please end it. Thanks for your time.

	The endless variants (dozens) will render the COVID vaccines nearly useless, which means the "vaccine passports" will also be pointless. By the end of this year there's no telling how many variants there will be. Vaccinated people are already getting sick around the country. COVID vaccine are not the "end all, be all"								
	answer and masks are certainly not the answer as evidenced by the latest CDC study deeming cloth masks and neck gaiters to be less than 2% effective (and that's within the margin of error).								
	After Dr. Choe reaches 50% vaccinations in the public, he'll start in with the 'variants, knowing full well that not only that this vaccine may be ineffective for future variants, but that those who receive the COVID vaccination could be affected adversely by future COVID strands. For example, the vaccinated are affected and the the strange of th								
	8 times more adversely by the South African variant than those who are unvaccinated. (See the Washington Examiner article on the Tel Aviv study). I wait with treoidation to see how those vaccinated								
	with this fast tracked vaccine react to the other variants. I for one will not be getting a vaccine when I								
	don't have long term data on the future side effects and you should not be pushing this on the public. Dr. Choe is not going to give guidance to unmask the population any time soon and we in the public are

	We are fast approaching the (1) one year anniversary of your Mask Mandate of June 23rd. Even though								
	there are decades of sound medical research and historical data to show mask are not effective against								
	catching a virus, your decision based on the CDC and the modeling provided by experts like Dr. Fauci								
	made it prudent to impose a mask mandate. However, we now know that experts like Dr. Atlas, and								
	decades of medical research were right all along. That along with 10 months of historical data on COVID -								
	we (and you should know)mask have had no noticeable effect on the transmission of COVID. Even your								
	own data in Pinellas County showed early on mask were not effective, since the virus continued to rise								
	drastically 2 weeks after the mandate and throughout the last 10 months. But please don't stop there- side								
	by side comparison of Counties in FL and States with and without mask mandates show no difference in								
	infection rates.								
	Its time to stop the madness with the mask- doomsday experts like the CDC and Dr. Fauci should have a voice, but you should Never make public policy based on their out dated or even worse their exaggerated								
	model numbers. The longer you do the more data shows the mask mandate is nothing more than a								
	political motivated stunt, rather than protecting the safety of the residents of Pinellas County. A voluntary								
	mask policy allows those that want to "feel safe" continue to do so- Thank you for your time!

Ending the mask mandate in Pinellas	Dear Commissioners,			Seminole			mitzikaysmith@gmail.com	2021-04-14 05:56:20		
County Schools	Please give strong consideration to ending the mask mandate in Pinellas County Schools, given the widespread availability of COVID vaccine. Please note that we appreciate all of our teachers and would not									
	be asking for this consideration if the vaccine was not widely available and without data showing its									
	efficacy. Your attention to this request is most appreciated.									
	Respectfully yours,									
	Parent of a kindergartener this 2020-2021 school year									
Please end the Mask Mandate	Hello,	Richard Bates	2231 Harbor Point Place	Palm Harbor	34683	727-482-9480	gulftraceresidents@gmail.com	2021-04-13 22:59:39		
	I am respectfully asking that we as a community and you as a board that represents this community simply									
	follow the science of this virus and not the media's focus on emotion and fear. At the beginning of this situation we understand that we all exercised our decisions on extreme caution as we were missing the									
	crucial data that we needed to make informed decisions. Now however we are a full year into this and									
	know much more facts about this virus and who are the most at risk, as well who seem to be carriers and									
	potential spreaders of the virus. The good news is the data supports children under the age of 18 seem to									
	be the least effected by this virus and least infected by this virus. There is also very little data supporting									
	that our children are carriers of the virus or spreaders of this virus. I understand that we need to protect									
	our faculty as well but the ages across most of our faculty are also at ages that have proven to be resilient									
	to this virus and have mild or no symptoms at all. These masks are not healthy for our children physically									
	or mentally. Mandating that our children wear a mask all day only instills fear in our youth instead of									
	strength and confidence. It also makes it extremely difficult for our children to relate to one another and socially bond with one another which may be a more important characteristic they develop then learning									
	itself. I hope you will consider the children when making this decision and the facts and data of their ages									
	and not the hyperbolic media and the fear they would like us to believe. Yes this virus is serious but we									
	now have the information we need to enable us to keep our children and faculty safe and still allow our									
	children to be children and enjoy themselves and not stress over things that they need not to be									
	concerned with. As a child their are always stresses they endure it is time we stop adding another one to									
	them that truly does not effect them. Thank you for taking the time to read my thoughts and concerns.
