Subject:

Award of bid to Rowland, Inc. for the Georgia Avenue to Avery Bayou drainage improvement project.

Recommended Action:

Approve the award of bid to Rowland, Inc. for the Georgia Avenue to Avery Bayou drainage improvement project.

Bid No. 178-0037-CP(RG); PID No. 002116A; in the amount of \$894,519.00 on the basis of being the lowest responsive, responsible bid received meeting specifications; all work is expected to be completed within 270 consecutive calendar days. Authorize the Chairman to sign and Clerk of Court to attest.

Strategic Plan:

Ensure Public Health, Safety, and Welfare
2.5 Enhance pedestrian and bicycle safety

Practice Superior Environmental Stewardship
3.2 Preserve and manage environmental lands, beaches, parks, and historical assets
3.3 Protect and improve the quality of our water, air, and other natural resources

Foster Continual Economic Growth and Vitality
4.4 Invest in infrastructure to meet current and future needs
4.5 Provide safe and effective transportation systems to support the efficient flow of motorists, commerce, and regional connectivity

Summary:

The purpose of this project is to construct a drainage system to eliminate structure flooding, and reduce roadway and residential yard flooding in the Crystal Beach area. The project limits are along Georgia Avenue between Seaford Avenue and Disston Street, including the diverting of stormwater

runoff along Disston Street into Avery Bayou at the west end of Lorraine Street.

Background Information:

The existing topography, lack of a defined drainage system and stormwater outfall location in this area has resulted in structural, roadway and yard flooding. This project will install a defined drainage system that will eliminate structural flooding at one major location and significantly reduce flooding of the roads and yards within the project area. The project will also provide an outfall location for the stormwater drainage to allow a defined location for stormwater to discharge. Drainage system improvements will include new curb inlets, manholes, ditch bottom inlets, 1,253 linear feet of concrete storm pipes ranging from eighteen (18) to thirty (30) inches in diameter, with additional swales to direct stormwater runoff to the inlets and restoration of all disturbed areas. This project will also resurface some of the roads being impacted by the installation of the new drainage system.

Fiscal Impact:

Expenditure not to exceed \$894,519.00

Funding is derived from the Local Infrastructure Sales Tax (Penny for Pinellas), and budgeted in Physical Environment, Storm Sewer Rehab projects program allocation of the Capital Improvement Program.

Staff Member Responsible:

Rahim Harji, Director, Public Works
Joe Lauro, Director, Purchasing
