The Application is currently being prepared by the County's consultant, with anticipated completion by March 14, 2024. The final completed Grant Application will then come back to the Board through a future Legistar item.

The existing bridge has reduced capacity due to ongoing deterioration and is classified as structurally deficient and functionally obsolete. The Bridge is currently posted for loads limits. Reevaluation (June 2021) of the Bridge condition resulted in the National Bridge Inventory (NBI) rating substructure rating dropping from 6 (satisfactory condition) to 4 (poor condition) on a scale from 0 to 9. This reduction in rating resulted in a Sufficiency Rating of 18.1 on a scale of 0-100.

The proposed new Beckett Bridge will meet all current design and safety standards, provide enhanced bicycle and pedestrian facilities, and eliminate the need for frequent repairs.
